Tradition And Modernity Tradition And Modernity:

Tradition and Modernity, 2009 The Question for Twentieth Century China has been the integration of tradition and modernity In this collection of essays written over a period of some twenty years 1987 2006 Chen Lai reflects on the question in an informative and original way He reads behind the political slogans and engages with the thought both of Max Weber Talcott Parsons and Western sociology and representative Chinese thinkers notably Feng Youlan and Liang Shuming While the focus is on China the book also appeals to anyone interested in this fascinating question of how to modernise whilst retaining the positive values of tradition Chen Lai s unique and balanced grasp of society marks him out as the foremost thinker in China on this topic today *Habermas and Giddens on Praxis and Modernity* Craig Browne, 2017-01-02 In *Habermas and Giddens on Praxis and Modernity* Craig Browne investigates how two of the most important and influential contemporary social theorists have sought to develop the modernist visions of the constitution of society through the autonomous actions of subjects Comparing Habermas s and Giddens s conceptions of the constitution of society interpretations of the social structural impediments to subjects autonomy and attempts to delineate potentials for progressive social change within contemporary society Browne draws on his own work which has extended aspects of the social theorists approach to modernity Despite the criticisms developed over the course of the book Habermas and Giddens are found to be two of the most important theorists of democratization and social democracy the dynamics of capitalist modernity and their paradoxes social practices and reflexivity and the foundations of social theory in the problem of the relationship of social action and social structure **Race, Modernity, Postmodernity** W. Lawrence Hogue, 1996-10-03 Reads and interprets eight works of literature by people of color foregrounding the philosophical debate about modernity vs postmodernity rather than solely issues of race **Tradition Through Modernity** Pertti J. Anttonen, 2005 When studying social practices that are regarded as traditional tradition is usually seen as an element of meaning Whose meaning is it Is it a meaning generated by those who study tradition or those who are being studied In both cases particular criteria for traditionality are employed whether these are explicated or not The individuals groups of people and institutions that are studied may continue to uphold their traditions or name their practices traditions without having to state in analytical terms their criteria for traditionality This cannot however apply to people who make the study of traditions their profession especially those engaged in the academic field of the science of tradition a paraphrase given to folklore studies Traditions call for explanation instead of being merely described or used as explanations for apparent repetitions reiterations replications continuations or symbolic linking in social practice values meaning culture and history In order to explain the concept of tradition and the category of the traditional scholars must situate its use in particular historically specific discourses ways of knowing speaking conceptualisation and representation in which social acts receive their meanings as traditional This book argues that since the concepts of tradition and modern are fundamentally modern what they aim to and

are able to describe report and denote is epistemologically modern as that which is regarded as non modern and traditional is appropriated into modern social knowledge through modern concepts and discursive means Modernity cannot represent non modernity without modern mediation which therefore makes the representations of non modernity also modern Accordingly the book deals with the modernness of objectifying representing and studying folklore and oral traditions The first section focuses on modern and tradition as modern concepts and the conception of folklore and its study as a modern trajectory The second section discusses the politics of folklore with regard to nationalism and the role of folk tradition in the production of nation state identity in Finland
