Transatlantic Abolitionism Age Revolution International:

Transatlantic Abolitionism in the Age of Revolution John R. Oldfield, 2013 *Transatlantic Abolitionism in the Age of Revolution* offers a fresh exploration of anti slavery debates in the late eighteenth and early nineteenth centuries It challenges traditional perceptions of early anti slavery activity as an entirely parochial British European or American affair and instead reframes the abolition movement as a broad international network of activists across a range of metropolitan centres and remote outposts Interdisciplinary in approach this book explores the dynamics of transatlantic abolitionism along with its structure mechanisms and business methods and in doing so highlights the delicate balance that existed between national and international interests in an age of massive political upheaval throughout the Atlantic world By setting slave trade debates within a wider international context Professor Oldfield reveals how popular abolitionism emerged as a political force in the 1780s and how it adapted itself to the tumultuous events of the late eighteenth and early nineteenth centuries

A Cultural History of the Sea in the Age of Empire Margaret Cohen, 2023-02-09 Across the 19th century maritime globalization expanded at a hitherto unimaginable pace transforming transport and communications over the seas into oceanic networks at a planetary scale These networks shaped culture in its most expansive sense affecting seafaring warfare empire commerce communications passenger travel leisure and science Authors recover the sea experience of people and groups entangled with and yet neglected in an earlier

generation of maritime history focused on conquest empire and knowledge Thus across a century when Britannia nominally ruled the waves military control emerges as both opportunistic harboring slavers as well as partial giving agency to mutineers and enslaved crew members including on the Royal Navy's own fleet the wreck of Arctic exploring voyages such as the Erebus and the Terror takes readers to PanInuit exploration over sea ice around the Arctic circle colonial and mercantile transport in the Indian Ocean reveals the role of lascars the seafarers of color who for centuries had practiced these waters on the coasts of industrial nations the professional establishment of marine sciences depends on the pathbreaking contributions of female amateur naturalists As part of its revisionary aim this volume gives voice to the physical environment Thus we discover contrasting perspectives about this environment under threat today of European mariners for whom it was deadly and treacherous and for maritime Aborigines who lived in its shelter Considering literature and art as well as history authors further trace how the paradoxes of sea practice shape some of the most memorable ocean fantasies of the Western tradition fostering both a celebration of work and technology and a preservation of secular magic in a disenchanted world
