Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth and they develop and learn at a rapid pace in their early years This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning Despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well Transforming the Workforce for Children Birth Through Age 8 explores the science of child development particularly looking at implications for the professionals who work with children This report examines the current capacities and practices of the workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for effective professional learning Young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour, J. Kent Chrisman, 2016-03-15 The general public often views early childhood education as either simply babysitting or as preparation for later learning Of course both viewpoints are simplistic Deep understanding of child development best educational practices based on development emergent curriculum cultural competence and applications of family systems are necessary for high quality early education Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research accurate practical applications of research historical foundations and key facts from the field of contemporary early childhood education Through approximately 425

entries this work includes all areas of child development physical cognitive language social emotional aesthetic as well as comprehensive review of best educational practices with young children effective preparation for early childhood professionals and policy making practices and addresses such questions as How is the field of early childhood education defined What are the roots of this field of study How is the history of early childhood education similar to yet different from the study of public education What are the major influences on understandings of best practices in early childhood education

Handbook of Research on the Education of Young Children Olivia N. Saracho,2019-10-30 The Handbook of Research on the Education of Young Children is the essential reference on research on early childhood education throughout the world This outstanding resource provides a comprehensive research overview of important contemporary issues as well as the information necessary to make knowledgeable judgments about these issues Now in its fourth edition this handbook features all new sections on social emotional learning non cognitive assessment child development early childhood education content areas teacher preparation technology multimedia and English language learners With thorough updates to chapters and references this new edition remains the cutting edge resource for making the field s extensive knowledge base readily available and accessible to researchers and educators It is a valuable resource for all of those who work and study in the field of early childhood education including researchers educators policy makers librarians and school administrators This volume addresses critical up to date research on several disciplines such as child development early childhood education psychology curriculum teacher preparation policy evaluation strategies technology and multimedia exposure Handbook of Research on Leadership and Advocacy for Children and Families in Rural Poverty Greene, H. Carol,Zugelder, Bryan S.,Manner, Jane C.,2020-03-27 Rural poverty encompasses a distinctive deprivation in quality of life related to a lack of educational support and resources as well as unique issues related to geographical cultural community and social isolation While there have been many studies and accommodations made for the impoverished in urban environments those impoverished in rural settings have been largely overlooked and passed over by current policy The Handbook of Research on Leadership and Advocacy for Children and Families in Rural Poverty is an essential scholarly publication that creates awareness and promotes action for the advocacy of children and families in rural poverty and recommends interdisciplinary approaches to support the cognitive social and emotional needs of children and families in poverty Featuring a wide range of topics such as mental health foster care and public policy this book is ideal for academicians counselors social workers mental health professionals early childhood specialists school psychologists administrators policymakers researchers and students Transforming the Financing of Early Care and Education National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Financing Early Care and Education with a Highly Qualified Workforce,2018-08-17 High quality early care and education for children from birth to kindergarten entry is critical to positive child development and has the potential to generate economic

returns which benefit not only children and their families but society at large. Despite the great promise of early care and education it has been financed in such a way that high quality early care and education have only been available to a fraction of the families needing and desiring it and does little to further develop the early care and education ECE workforce. It is neither sustainable nor adequate to provide the quality of care and learning that children and families need, a shortfall that further perpetuates and drives inequality. Transforming the Financing of Early Care and Education outlines a framework for a funding strategy that will provide reliable accessible high quality early care and education for young children from birth to kindergarten entry including a highly qualified and adequately compensated workforce that is consistent with the vision outlined in the 2015 report Transforming the Workforce for Children Birth Through Age 8. A Unifying Foundation. The recommendations of this report are based on essential features of child development and early learning and on principles for high quality professional practice at the levels of individual practitioners, practice environments, leadership systems, policies, and resource allocation.

Vibrant and Healthy Kids National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood

Development: A Health Equity Approach, 2019-11-27 Children are the foundation of the United States and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science Practice and Policy to Advance Health Equity builds upon and updates research from Communities in Action Pathways to Health Equity 2017 and From Neurons to Neighborhoods: The Science of Early Childhood Development 2000. This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

Children and Community, 1989 This report focuses on children and the community. In the opening address, Dr. Willem H. Welling, Executive Director of the van Leer Foundation, describes the history of the foundation and the content of previous seminars. He concludes the address with a discussion of community empowerment. Father Gerard Pantin, the keynote speaker, discusses the helper's role in community development. The seminar summary and recommendations are divided into three sections. The first section concerns the management of the social and physical environment of the young child and the family. It stresses the importance of community programs and local empowerment in easing the stresses of changing family roles. The second section explores ways of caring for and educating the young child. These include quality day care programs, home care play groups, and programs for teenaged mothers and hard-to-reach families. The third section discusses the process of sharing and implementing a new model of early childhood education and care. Factors which may affect implementation of the model include available resources, networking steps in the process, evaluation, advocacy, and cooperation. RJC
