Transparency Transparency:

Transparency and Critical Theory Jorge I. Valdovinos, 2022-02-26 This book takes an interdisciplinary approach to the critique of contemporary ideology offering an innovative genealogy of one of its most fundamental discursive manoeuvres the ideological effacement of mediation Providing a comprehensive historical revision of media from the Greeks to the Internet this book identifies several critical junctures at which the tension between visibility and invisibility has overlapped with conceptions of neutrality a tension best incarnated in today's use of the word transparency Then it traces this term's evolving semantic constellation through a variety of intellectual discourses exposing it as a key operator in the revaluation of ideals sensibilities and modalities of perception that lie at the core of our contemporary attention based economy Transparency and the Open Society Roger Taylor, Tim Kelsey, 2016-06-20 Greater transparency is increasingly seen as the answer to a wide range of social issues by governments NGOs and businesses around the world However evidence of its impact is mixed Using case studies from around the world including India Tanzania the UK and US Transparency and the open society surveys the adoption of transparency globally providing an essential framework for assessing its likely performance as a policy and the steps that can be taken to make it more effective It addresses the role of transparency in the context of growing use by governments and businesses of surveillance and database driven decision making The book is written for anyone involved in the use of transparency whether campaigning from outside or working inside government or business to develop policies

Transparency, Democracy, and Autocracy James R. Hollyer, B. Peter Rosendorff, James Raymond Vreeland, 2018-09-27 Increasing economic transparency benefits democracy it helps elections work Yet under autocracy transparency contributes to political instability

Transparency in a New Global Order Christina Garsten, Monica Lindh De Montoya, 2008-01-01 This book argues that transparency is a concept that has gained increasing currency and favour as an organizing principle and administrative goal in recent years Calls for transparency have been directed towards states markets corporations and national political processes as well as towards large institutions such as the European Union Focusing on empirically rich case studies the contributors explore the ideas and practices of transparency in different contexts encouraging a discussion of the many facets of the term and its strengths ambiguities and limitations They aim to shed light on the powerful global discourse and practices contained in the concept and to fill a gap in the literature since few attempts have until now been made to examine the actual content and practice of transparency Also discussed are the complex negotiations through which it is determined what should be displayed and what should remain hidden the uses of power and control and the processes through which transparency is or is not achieved This analysis of the concepts models and metaphors that guide and shape organizational social and aesthetical practices today will provide a much needed contribution to the literature for academics researchers and students focusing on these areas *Trust and Transparency in an Age of Surveillance* Lora Anne

Viola, Paweł Laidler, 2021-11-29 Investigating the theoretical and empirical relationships between transparency and trust in

the context of surveillance this volume argues that neither transparency nor trust provides a simple and self evident path for mitigating the negative political and social consequences of state surveillance practices Dominant in both the scholarly literature and public debate is the conviction that transparency can promote better informed decisions provide greater oversight and restore trust damaged by the secrecy of surveillance The contributions to this volume challenge this conventional wisdom by considering how relations of trust and policies of transparency are modulated by underlying power asymmetries sociohistorical legacies economic structures and institutional constraints They study trust and transparency as embedded in specific sociopolitical contexts to show how under certain conditions transparency can become a tool of social control that erodes trust while mistrust rather than trust can sometimes offer the most promising approach to safeguarding rights and freedom in an age of surveillance The first book addressing the interrelationship of trust transparency and surveillance practices this volume will be of interest to scholars and students of surveillance studies as well as appeal to an interdisciplinary audience given the contributions from political science sociology philosophy law and civil society The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Ethical and Social Implications of Next Generation Human Genomics and Genetic Medicine Malte Dreyer,Jeanette Erdmann,Christoph Rehmann-Sutter,2016-01-12 Genetic Transparency tackles the question of who has or should have access to personal genomic information Genomic science is revolutionary in how it changes the way we live individually and together and how it changes the shape of society If this is so then the authors of this volume claim the rules that regulate genetic transparency should be debated carefully openly and critically It is important to see that the social and cultural meanings of DNA and genetic sequences are much richer than can be accounted for by purely biomedical knowledge In this book an international group of leading genomics experts and scholars from the humanities and social sciences discuss how the new accessibility of genomic information affects interpersonal relationships our self understandings ethics law and healthcare systems Contributors are Kirsten Brukamp Gabrielle Christenhusz Lorraine Cowley Malte Dreyer Jeanette Erdmann Andrei Famenka Teresa Finlay Caroline F ndling Shannon Gibson Cathy Herbrand Angeliki Kerasidou Lene Koch Fruzsina Moln r G bor Tim Ohnh user Christoph Rehmann Sutter Benedikt Reiz Vasilja Rolfes Sara Tocchetti On the Optical Transparency of Certain Specimens of Fluorite John Francis Todd Young, Henry John Cunningham Ireton,1920 **A Manual of clinical chemistry, microscopy, and bacteriology** Martin Klopstock,1912 *An Integration of Weaving and Surface Design Using Airbrush Application of Dye to the Textured Surface of Waffle Weave* Mary E.
