War Is Not Inevitable On The Psychology Of War And Aggression:

War Is Not Inevitable Henri Parens, 2014-07-22 In 1932 Einstein asked Freud Is there any way of delivering mankind from the menace of war Freud answered that war is inevitable because humans have an instinct to self destroy a death instinct which we must externalize to survive But nearly four decades of study of aggression reveal that rather than being an inborn drive destructiveness is generated in us by experiences of excessive psychic pain In War Is Not Inevitable On the Psychology of War and Aggression Henri Parens argues that the death instinct based model of aggression can neither be proved nor disproved as Freud s answer is untestable By contrast the multi trends theory of aggression is provable and has greater heuristic value than does a death instinct based model of aggression When we look for causes for war we turn to history as well as national ethnic territorial and or political issues among many others but we also tend to ignore the psychological factors that play a large role Parens discusses such psychological factors that seem to lead large groups into conflict Central among these are the psychodynamics of large group narcissism Interactional conditions stand out hyper narcissistic large groups have in history caused much narcissistic injury to those they believe they are superior to But this is commonly followed by the narcissistically injured group s experiencing high level hostile destructiveness toward their injury perpetrator which in time will compel them to revenge Among groups that have been engaged in serial conflicts wars have followed from this psychodynamic narcissism based cyclicity Parens details some of the psychodynamics that led from World War I to World War II and their respective aftermath and he addresses how major factors that gave rise to these wars must can and have been counteracted In doing so Parens considers strategies by which civilization has and is constructively preventing wars as well as the need for further innovative efforts to achieve that end **Signs, Intentionality, and**

Imaginability Horst Ruthrof, 2025-10-13 This book contains essays by Horst Ruthrof tracing the author s intellectual history from his encounter with literature to his critique of the philosophy of language If you have ever felt that our linguistic and philosophical approaches to language lack an explanation of what renders it so powerful you share the author s motivation for writing these essays With tools from Locke Kant Peirce and especially Husserl the author redefines natural language as a set of social instructions for schematically imagining and acting in a world and gradually identifies what grants natural language its power imaginability **The Handbook of Psychoanalytic Holocaust Studies** Ira Brenner, 2019-08-28 This book is a unique compilation of essays about the genocidal persecution fuelling the Nazi regime in World War II Written by world renowned experts in the field it confronts a vitally important and exceedingly difficult topic with sensitivity courage and wisdom furthering our understanding of the Holocaust Shoah psychoanalytically historically and through the arts Authors from four continents offer their perspectives clinical experiences findings and personal narratives on such subjects as resilience remembrance giving testimony aging and mourning There is an emphasis on the intergenerational transmission of trauma of both the victims and the perpetrators with chapters looking at the question of evil comparative studies

prevention and the misuse of the Holocaust Those chapters relating to therapy address the specific issues of the survivors including the second and third generation through psychoanalysis as well as other modalities whilst the section on creativity and the arts looks at film theater poetry opera and writing The aftermath of the Holocaust demanded that psychoanalysis re examine the importance of psychic trauma those who first studied this darkest chapter in human history successfully challenged the long held assumption that psychical reality was essentially the only reality to be considered As a result contemporary thought about trauma dissociation self psychology and relational psychology were greatly influenced by these pioneers whose ideas have evolved since then This long awaited text is the definitive update and elaboration of their original contributions

Religious Knives Jouni Suistola, Vamik Volkan, 2017-09-01 In this timely multidimensional study historian Jouni Suistola and psychoanalyst Vamik D Volkan draw on their respective disciplines and their own personal and professional experiences to investigate the historical and psychological roots of terrorism Specifically what is it in human nature that allows people to terrorize and kill the other and what societal factors whether political economic or religious lead to terrorism And in turn how might terrorist ideologies and groups be defeated especially when a society s realistic fears are contaminated with xenophobia racism and fantasized

dangers Focusing specifically on modern day radical Islamist terrorism the authors argue that studying the minds of individual terrorists can tell us something about those individuals but that only by examining the deeper historical political and society wide psychological processes at work will we be able to uncover the core causes of terrorism Only through such understanding they conclude will the world be positioned to prevent further radicalization and create lasting and peaceful solutions to the seemingly intractable problem of terrorist violence

Communication and Culture in War and Peace

Colleen Roach,1993-02-01 Roach provides an excellent account of the contributions of feminist peace researchers to the analysis of cultural militarism and its twin cultural violence against women Altogether this book is a worthy enterprise that will help both activists and scholars gain a more in depth understanding of the barriers to change erected by the media s use of information technology and will be useful in developing scenarios and strategies for the creative use of that technology for peaceful social transformation Elise Boulding in Media Development Does the media have a perverse fascination with war and violence Do television newspapers and magazines neglect the forces of peace in favor of the more dramatic war machines thereby amplifying the guns rather than muting them If so how does media coverage reflect the culture for which it works By exploring the role of both culture and mass media this volume fills a crucial void in the study of war and peace Outstanding scholars provide a history and overview of critical mass media research and investigate emerging issues dealing with the ongoing debate over communication in war and peace Several chapters deal specifically with the role of communication culture in the Gulf War while others discuss more general themes including the military industrial communication complex cultural imperialism and transnational control of communication Many of the essays offer a uniquely feminist reading of war and peace a perspective typically unacknowledged in mainstream communication work This timely book also weaves peripheral concerns like multiculturalism international communication law women and peace and communication technology into the primary themes of media and war The research and practical information given here will be useful for courses in peace and conflict studies international mass communication and intercultural communication Professionals in international relations negotiations and the media will find this book to be both fascinating and illuminating Original research on the coverage of disarmament stories and peace issues in Canadian dailies and Vincent Mosco s excellent blueprint for converting the military machine to a peace system give Roach s work practical and positive dimensions Abstracts at the beginning of the chapters full bibliographies and a preface by the father of peace studies Johan Galtung add to the importance of this book Recommended for anyone interested in the use minuses of mass media to cover up explain promote governmental efforts to keep situations tense and warlike Choice Communication and Culture in War and Peace provides a strategic road map for scholarly and citizen action This is tightly edited passionately and convincingly argued and a broadly conceived book It fills a large gap and is likely to be a widely used seminal resource and text for some time to come George Gerbner Professor of Communication and Dean Emeritus University of Pennsylvania

Who Benefits from Global

Violence and War Marc Pilisuk, 2007-12-30 Military economic and environmental violence in the era of globalization cause immense suffering and may ultimately threaten the existence of life as we know it but author Pilisuk explains that the future can change if we understand and act upon the roots of violence A professor emeritus of psychology and human and community development Pilisuk explains how most violence is the product of a human built social order in which some people and institutions control most of the resources make the decisions that necessitate violence and operate with minimal accountability The common root of war poverty environmental destruction and other forms of violence is spotlighted Such violence says Pilisuk is a natural consequence of a system inordinately influenced by a relatively small interconnected group of corporate military and government leaders with the power to instill fear to increase their excessive fortunes and to restrict information particularly about their own clandestine dealings This text includes scholarship hailing from across disciplines combined with information from investigative journalism and insights from nonprofit watchdog groups all shedding light on centralized power and its effects Pilisuk presents material including the range of tactics used to manipulate and destroy adversaries the human capacity to kill as a challenge and how media is used by powerful groups to manipulate fear and maintain their power Here readers find solid social science to support what whistleblowers and social critics are observing about a system that needs change

The Culture of War Richard A. Gabriel, 1990-04-23 Although war has been analyzed from many perspectives no scholar has satisfactorily explained why the human race fights and how we came to create a degree of military sophistication capable of destroying the entire species Gabriel addresses these questions in his study of the origins and development of warfare He looks particularly at the relationship between the evolution of the social institution of war and the development of the military institutions tactical sciences and technology required for organized conflict Beginning with a discussion of the biological and evolutionary history of man Gabriel investigates the proposition that the human race is genetically predisposed to warlike behavior He next reviews the archaeological record to test the common assumption that war has existed from the earliest times He traces the evolution of the social institutions and technology of war in a succession of ancient cultures beginning with the Bronze Age The development of armies tactics logistics and weapons is examined together with the psychological and social implications of mankind's choice to use them The work concludes with a discussion demonstrating how the practice of war in modern times relates to the perpetuation of values and institutional forms created by earlier societies especially those of classical Greece and Rome The first study to integrate the findings of cultural anthropology with the concerns of military analysis this work will be of interest to students and academics in these and related fields

Why War? Richard Overy, 2024-06-04 An Economist Best Book of the Year Richard Overy is one of the world's finest military historians His book is timely for those interested in preventing war Gen Mark Milley U S Army retired 20th Chairman of the Joint Chiefs of Staff Army magazine Why has war been such a consistent presence throughout the human past A leading historian explains drawing on rich examples and keen insight Richard Overy

is not the first scholar to take up the title question In 1931 at the request of the League of Nations Albert Einstein asked Sigmund Freud to collaborate on a short work examining whether there was a way of delivering mankind from the menace of war Published the next year as a pamphlet entitled *Why War* it conveyed Freud's conclusion that the death drive made any deliverance impossible the psychological impulse to destruction was universal in the animal kingdom The global wars of the later 1930s and 1940s seemed ample evidence of the dismal conclusion A preeminent historian of those wars Overy brings vast knowledge to the title question and years of experience unraveling the knotted motivations of war His approach is to separate the major drivers and motivations and consider the ways each has contributed to organized conflict They range from the impulses embedded in human biology and psychology to the incentives to conflict developed through cultural evolution to competition for resources conflicts stirred by the passions of belief the effects of ecological stresses the drive for power in leaders and nations and the search for security The discussions show remarkable range delving deep into the Neolithic past through the twentieth century world wars and up to the current conflict in Ukraine The examples are absorbing from the Roman Empire's voracious appetite for resources to the impulse to power evident in Alexander the Great Napoleon and Hitler The conclusion is not hopeful but Overy's book is a gift to readers a compact judicious engrossing examination of a fundamental question

Chimpanzees, War, and History R. Brian Ferguson, 2023

The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that

killing is instead due to human disturbance has been pronounced dead and buried In Chimpanzees War and History R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill *Handbook of Psychology: Personality and social psychology* Irving B.
