Warriors Settlers And Nomads:

Warriors, Settlers and Nomads Terence Watts, 2000-04-27 Based upon the concept of evolutionary psychology this is a guide to self discovery and self liberation Warriors Settlers Nomads utilises powerful hypnosis and visualisation techniques in a programme designed to release our hidden potential A work of genius Joseph Keaney PhD DPsych BA DCH Director ICHP Cork Ireland *Warriors, Settlers and Nomads* Terence Watts, 2001 **An End To Murder** Colin Wilson, Damon Wilson, 2015-09-24 Creatively and intellectually there is no other species that has ever come close to equalling humanity's achievements but nor is any other species as suicidally prone to internecine conflict We are the only species on the planet whose ingrained habit of conflict constitutes the chief threat to our own survival Human history can be seen as a catalogue of cold hearted murders mindless blood feuds appalling massacres and devastating wars but with developments in forensic science and modern psychology and with raised education levels throughout the world might it soon be possible to reign in humanity's homicidal habits Falling violent crime statistics in every part of the world seem to indicate that something along those lines might indeed be happening Colin and Damon Wilson who between them have been covering the field of criminology for over fifty years offer an analysis of the overall spectrum of human violence They consider whether human beings are in reality as cruel and violent as is generally believed and they explore the possibility that humankind is on the verge of a fundamental change that we are about to become truly civilised As well as offering an overview of violence throughout our history from the first hominids to the twenty first century touching on key moments of change and also indicating where things have not changed since the Stone Age they explore the latest psychological forensic and social attempts to understand and curb modern human violence To begin with they examine questions such as Were the first humans cannibalistic Did the birth of civilisation also lead to the invention of war and slavery Priests and kings brought social stability but were they also the instigators of the first mass murders Is it in fact wealth that is the ultimate weapon They look at slavery and ancient Roman sadism but also the possibility that our own distaste for pain and cruelty is no more than a social construct They show how the humanitarian ideas of the great religious innovators all too quickly became distorted by organised religious structures The book ranges widely from fifteenth century Baron Gilles de Rais Bluebeard the first known and possibly most prolific serial killer in history to Victorian domestic murder and the invention of psychiatry and Sherlock Holmes and the invention of forensic science from the fifteenth century Taiping Rebellion in China in which up to 36 million died to the First and Second World Wars and more recent genocides and instances of ethnic cleansing and contemporary terrorism They conclude by assessing the very real possibility that the internet and the greater freedom of information it has brought is leading gradually to a profoundly more civilised world than at any time in the past **BWRT** Terence Watts, 2022-03-02 BWRT is a completely personalised therapy that is customised specifically to the way your brain and mind work The technique has a strong foundation in science and evolutionary biology and is designed to work directly in the

cognitive gap between the reptilian complex responding to a trigger such as a stressful situation and the individual becoming aware of what's happening. This enables the individual to overwrite whatever problem they're experiencing with new information and in this book Terence Watts details the steps of the procedures to help you achieve this outcome. You'll discover the how and why of the technique's efficiency and after an experiential exercise to whet your appetite Terence then presents the procedures to help you tackle a range of different challenges including Preparing to get the very best out of the major changes you're going to make Boosting your self-worth what you've been taught about yourself shapes what you think about yourself but a lot of it is fake news Understanding anxiety in all its different forms why we have it and why we just don't need it most of the time Dealing with the simple phobia even when it seems far from simple and getting rid of it for good Performance enhancement harnessing the resources you thought you had but weren't sure how to find BrainWorking Recursive Therapy BWRT is a registered trademark of Terence Watts Suitable for anyone wanting to rewire their psychological responses to life's challenges
