Water Ice And Stone Science And Memory On The Antarctic Lakes:

Water, Ice & Stone Bill Green, 2020-07-07 John Burroughs Medal for Distinguished Natural History Book PEN Martha Albrand Award Finalist Green's prose rings with the elemental clarity of the ice he knows so well PEN Awards Committee citation A classic of contemporary nature writing the award winning *Water Ice Stone* is both a scientific and poetic journey into Antarctica addressing the ecological importance of the continent within the context of climate change Bill Green has been traveling to this remote and primordial place at the bottom of the Earth since 1968 With this book he focuses on the McMurdo Dry Valleys an area that is deceptively timeless as a stark landscape of rock and ice Here Green delves into the geochemistry of the region and discovers a wealth of data which vividly speaks to the health and climate of the larger world Bill Green is a geochemist and professor emeritus at Miami University in Oxford Ohio He first traveled to Antarctica in 1968 and began conducting research there in 1980 He is also the author of Boltzmann's Tomb *Travels in Search of Science*

The Transantarctic Mountains Gunter Faure, Teresa M. Mensing, 2010-09-21 This book presents a summary of the geology of the Transantarctic Mountains for Earth scientists who may want to work there or who need an overview of the geologic history of this region In addition the properties of the East Antarctic ice sheet and of the meteorites that accumulate on its surface are treated in separate chapters The presentation ends with the Cenozoic glaciation of the Transantarctic Mountains including the limnology and geochemical evolution of the saline lakes in the ice free valleys The subject matter in this book is presented in chronological order starting about 750 million years ago and continuing to the present time The chapters can be read selectively because the introduction to each chapter identifies the context that gives relevance to the subject matter to be discussed The text is richly illustrated with 330 original line drawings as well as with 182 color maps and photographs The book contains indexes of both subject matter and of authors names that allow it to be used as an encyclopedia of the Transantarctic Mountains and of the East Antarctic ice sheet Most of the chapters are supplemented by Appendices containing data tables additional explanations of certain phenomena e g the formation and seasonal destruction of stratospheric ozone and illustrative calculations e g ^{38}Cl dates of meteorites The authors have spent a combined total of fourteen field seasons between 1964 and 1995 doing geological research in the Transantarctic Mountains with logistical support by the US Antarctic Program Although Antarctica is remote and inaccessible tens of thousands of scientists of many nationalities and their assistants have worked there and even larger numbers of investigators will work there in the future

[Encyclopedia of the Antarctic](#) Beau Riffenburgh, 2007 Publisher description **Polar Explorers for Kids** Maxine Snowden, 2003-11-01 Heroism and horror abound in these true stories of 16 great explorers who journeyed to the Arctic and Antarctic regions two exquisite and unique ice wildernesses Recounted are the exciting North Pole adventures of Erik the Red in 982 and the elusive searches for the Northwest Passage and Farthest North of Henry Hudson Fridtjof Nansen Fredrick Cook and Robert Peary Coverage of the South Pole begins with Captain Cook in 1772 continues through the era of

land grabbing and the race to reach the Pole with James Clark Ross Roald Amundsen Robert Scott and Ernest Shackleton and ends with an examination of the scientists at work there today Astounding photographs and journal entries sidebars on the Inuit and polar animals and engaging activities bring the harrowing expeditions to life Activities include making a Viking compass building a model igloo making a cross staff to measure latitude creating a barometer making pemmican and writing a newspaper like William Parry's Winter Chronicle The North and South Poles become exciting routes to learning about science geography and history

Slicing the Silence Tom Griffiths, 2007 The author reflects on his experiences exploring Antarctica the last true wilderness

Lakes Warwick F. Vincent, 2018-01-12 From the mysterious depths of Lake Vostok Antarctica to tropical floodplain lakes inland seas hydro reservoirs and the variety of waterbodies in our local environment lakes encompass a huge diversity of shapes sizes depths colours and even salinities Often very large and very deep they sustain important and unique ecosystems which can be hotspots of biodiversity and are used by humans as sources of drinking water and food in particular fish What is the origin of differences among lakes and how does that affect the life within them What are the seasons of a lake and how do human actions alter lake ecosystems locally and at a global scale In this Very Short Introduction Warwick Vincent outlines the essential features of lake environments and their biology offering an up to date view of lake ecosystems Vincent traces the origins of lake science limnology from the seminal work of François Forel on Lake Geneva at the edge of the Swiss Alps to modern approaches such as environmental sensors satellite observations stable isotope analysis and DNA based technologies which are used to probe the microbial life support systems that lead from sunlight to fish Drawing on varied case studies he considers the intimate relationship between humans and lakes the value of lakes as indicators of environmental change the impact of pollution and our urgent need to improve the protection and management of these vitally important living resources via an integrated understanding of their ecology

ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

The Biology of Polar Regions D. N. Thomas, G. E. Fogg, P. Convey, C. H. Fritsen, J. -M. Gili, R. Gradinger, J. Laybourn-Parry, K. Reid, D. W. H. Walton, 2008-03-20 There is now an increased awareness of the importance of polar regions in the Earth system as well as their vulnerability to anthropogenic derived change including of course global climate change This new edition offers a concise but comprehensive introduction to polar ecology and has been thoroughly revised and updated throughout providing expanded coverage of marine ecosystems and the impact of humans It incorporates a detailed comparison of the Arctic and Antarctic systems with a particular emphasis on the effects of climate change and describes marine freshwater glacial and terrestrial habitats This breadth of coverage is unique in the polar biology literature As with other titles in the Biology of Habitats Series particular emphasis is placed on the organisms that dominate these extreme

environments although pollution conservation and experimental aspects are also considered This accessible text is suitable for both senior undergraduate and graduate students taking courses in polar ecology often as part of a wider marine biology degree programme It will also be of value and use to the many professional ecologists and conservation biologists requiring a concise overview of the topic

The Complete Idiot's Guide to the Arctic and Antarctic Jack Williams, 2003 Now armchair adventurers can find out about the physical geological and climatological conditions of the poles their unique flora fauna and human inhabitants the history of the greatest polar expeditions the exciting scientific research being conducted there and what changing climate conditions might mean to the future of this vast and fascinating realm

Hoosh Jason C. Anthony, 2012-11-01 Antarctica the last place on Earth is not famous for its cuisine Yet it is famous for stories of heroic expeditions in which hunger was the one spice everyone carried At the dawn of Antarctic cuisine cooks improvised under inconceivable hardships castaways ate seal blubber and penguin breasts while fantasizing about illustrious feasts and men seeking the South Pole stretched their rations to the breaking point Today Antarctica's kitchens still wait for provisions at the far end of the planet's longest supply chain Scientific research stations serve up cafeteria fare that often offers more sustenance than style Jason C Anthony a veteran of eight seasons in the U S Antarctic Program offers a rare workaday look at the importance of food in Antarctic history and culture Anthony's tour of Antarctic cuisine takes us from hoosh a porridge of meat fat and melted snow often thickened with crushed biscuit and the scurvy ridden expeditions of Shackleton and Scott through the twentieth century to his own preplanned three hundred meals plus snacks for a two person camp in the Transantarctic Mountains The stories in Hoosh are linked by the ingenuity good humor and indifference to gruel that make Anthony's tale as entertaining as it is enlightening

The Wide White Page Bill Manhire, 2004 The wide white page spans eight centuries of writing from Dante's epic account of Ulysses's last southbound ocean journey to Michael Chabon's writing of a WWII US army base on the ice in Kavalier and Clay There is fiction and poetry from nearly a dozen different countries and genres range from Coleridge's Rime of the ancient mariner via H P Lovecraft's Gothic fantasy and Kim Stanley Robinson future fiction to the surreal comedy of Monty Python's Scott of the Sahara book jacket

at the same time giving face to the major players in the world of scientific study Eloquent and entertainingly described as well as richly illustrated science has never been more involving or entertaining A Short History of Nearly Everything Bill Bryson, 2012-05-15 Bill Bryson's quest to understand everything that has happened in the history of the earth from the Big Bang theory to the rise of civilization and beyond revised to reflect the last two decades of scientific advancement How did we get from being nothing at all to where we are today How did the age of the dinosaurs eventually give way to the age of the iPhone In this completely revised update to the international phenomenon *A Short History of Nearly Everything* Bill Bryson returns to answer these questions and many more Bryson brings a groundbreaking account of life itself to a new generation of readers and wonderers as he takes subjects often passed off as boring and incomprehensible and renders them accessible fascinating and outright amusing to anyone who's ever wondered about the world around them Introducing readers to a long list of the world's most impressive archaeologists paleontologists physicists astronomers anthropologists and mathematicians from their offices and laboratories to dig sites and field camps Bryson embarks on a journey to discover answers to the biggest questions about the universe and ourselves *A Short History of Nearly Everything 2.0* is a profoundly enlightening surprisingly humorous and charmingly clever adventure into the realm of human knowledge as only Bryson can render it His revamped *Short History* is a thrilling journey through time and space and his writing will make readers both new and old see the world in a whole new way **Antarctica** Bernadette Hince, Rupert Summerson, Arnan

Wiesel, 2015-04-30 This is the first book whose subject is the music sounds and silences of Antarctica From 2011 until 2014 Australia marked its long standing connection with Antarctica by celebrating the centenary of the Australasian Antarctic Expedition The icy continent with its extremes of climate and environment and unique soundscapes offers great potential for creative achievements in the world of music and sound This book demonstrates the intellectual and creative engagement of artists musicians scientists and writers Consciousness of sounds in particular musical ones has not been at the forefront of our aims in polar endeavours but listening to and appreciating them has been as important there as elsewhere *Beneath the Shadow* Justin Gardiner, 2019 In February 2010 with the help of a friend who works as a photographer with a National Geographic sponsored cruise line Justin Gardiner boarded a ship bound for Antarctica A stowaway of sorts Gardiner used his experiences on this voyage as the narrative backdrop for *Beneath the Shadow* a compelling firsthand account that breathes new life into the nineteenth century journals of Antarctic explorers such as Captain Robert Falcon Scott Sir Ernest Henry Shackleton and Captain Roald Amundsen *Beneath the Shadow* is centered on journal excerpts by eight famous explorers which Gardiner uses as touchstones for modern day experiences of harsh seas chance encounters rugged terrain and unspeakable beauty With equal parts levity and lyricism Gardiner navigates the distance between the historical and the contemporary the artistic and the scientific the heroic and the mundane The bold and tragic tales of Antarctic explorers have long held our collective imagination almost as much as the mythically remote land such explorers ventured to and this book

makes those voices come to life as few ever have Outstanding Books for the College Bound Angela Carstensen (Ed), Young Adult Library Services Association, 2011-05-27 Connecting teens to books they'll truly enjoy is the aim of every young adult librarian and the completely revamped guide Outstanding Books for the College Bound will give teen services staff the leg up they need to make it happen Listing nearly 200 books deemed outstanding for the college bound by the Young Adult Library Services Association YALSA this indispensable resource Examines how the previous lists in the series were developed and explains the book's new layout Features engaging helpful book descriptions useful for readers advisory Offers programming tips and other ideas for ways the lists can be used at schools and public libraries Includes indexes searchable by topic year title and author More than simply a vital collection development tool this book can help librarians help young adults grow into the kind of independent readers and thinkers who will flourish at college **The Paradise Notebooks** Richard J.

Nevle, Steven Nightingale, 2022-04-15 In The Paradise Notebooks Richard J. Nevle and Steven Nightingale take us across the spectacular Sierra Nevada mountain range on a journey illuminated by incandescent poetry and fascinating fact Over the course of twenty one pairs of short essays Nevle and Nightingale contemplate the natural phenomena found in the Sierra Nevada From granite to aspen to fire to a rare endemic species of butterfly these essay pairs explore the natural history and mystical wonder of each element with a balanced and captivating touch As they weave in vignettes from their ninety mile backpacking trip across the range Nevle and Nightingale powerfully reconceive the Sierra Nevada as both earthly matter and transcendental offering letting us into a reality in which nature holds just as much spiritual importance as it does physical In a time of rapid environmental degradation The Paradise Notebooks offers a way forward a whole minded learned loving attention to place that rekindles our joyful relationship with the living world *Rhetoric, Through Everyday Things* Scot

Barnett, Casey Boyle, 2016-09-06 Rhetoric Through Everyday Things is the first book length collection of essays that explore the vibrant materiality of everyday objects in rhetorical theory practice and writing It examines how things such as food bicycles and typewriters can influence history and sociality The Animal Who Writes Marilyn M. Cooper, 2019-02-15

Writing begins with unconscious feelings of something that insistently demands to be responded to acted upon or elaborated into a new entity Writers make things that matter treaties new species software and letters to the editor as they interact with other humans of all kinds As they write they also continually remake themselves In The Animal Who Writes Cooper considers writing as a social practice and as an embodied behavior that is particularly important to human animals The author argues that writing is an act of composing enmeshed in nature cultures and is homologous with technology as a mode of making
