Water Finance Neil S. Grigg, 2011-05-23 A detailed look at the water industry and the trends that can lead to investment opportunities Water has quickly grown into a big global business with annual revenues in the United States alone reaching over 200 billion In the years ahead companies as well as governments must find innovative ways to address important issues within this field without sacrificing basic needs such as safety of drinking water or the reliability of water for energy production Nobody understands this better than author Neil Grigg a forty year veteran of the water industry and now with Water Finance he shares his extensive experience with you Most of the water business operates under the radar but with this reliable resource Grigg shines a bright light on this essential area and offers comprehensive coverage of the public responsibilities and private opportunities associated with it While Water Finance does contain many facts and figures it also takes the time to pull together the various aspects of water going far beyond water as just a commodity to skillfully explain it as the integrated business that it is Opens with a detailed discussion of the water industry before turning its focus to water handling which includes water supply wastewater industrial water storm water irrigation and drainage and instream flows Reveals the different driving forces and issues surrounding the water industry such as government involvement privatization law and regulations financial structure water and health and workforce capacity Offers insights on water industry business careers and investments Organized around the idea that the water business is about all aspects of handling water from the global environment to your tap Water Finance contains the information you need to succeed in this dynamic field

Financing and Charges for Wastewater Systems WEF MOP 27 : WEF Manual of Practice No. 27 Water Environment Federation, 2004-09-12 Provides a general overview of the current practices and procedures that should be considered for financing and establishing rates and charges for wastewater collection and treatment systems It updates the 1984 Edition of Financing and Charges for Wastewater Systems co published by American Society of Civil Engineers ASCE and American Public Health Association APHA then in its second edition and serves as a guide to wastewater utility managers municipal officials engineers accountants and rate analysts Because the material was updated using a more rigorous peer review process the publication is now classified as a Manual of Practice This manual is not intended to provide a simplistic cook book or universal approach to cost allocation and rate making Rather it is meant to illustrate the various ways of analyzing and allocating the operating and capital costs associated with collecting and treating wastewater and developing rates and charges that reasonably and equitably reflect the cost of service The

manual stresses the complexity of the integrated considerations involved in developing wastewater system cost allocation and rates for services
