Clifford Lane

Too Much Luck The Mining Boom And Australias Future:

Too Much Luck Paul Cleary, 2011 We think we are the lucky country but what we really have is dumb luck a lot of luck without the planning or strategy to make sure our good fortune lasts Paul Cleary In *Too Much Luck* Paul Cleary shows that the resources boom which seems like a blessing has the potential to become a curse unless our governments take urgent action Today under taxed and under regulated multinational companies make a tidy profit by selling off our non renewable resources As the mining boom accelerates it will drive the dollar sky high forcing up the cost of doing business for everybody Industries such as tourism and education industries that unlike mining involve many jobs will fade away But what happens if commodity prices suddenly collapse as they did with the GFC in 2008 or worse when the resources run out Many countries before us have been caught by the resources trap a heady period of boom and growth followed by a painful bust Paul Cleary maps out the pitfalls considers what has worked overseas and suggests a better way forward *Too Much Luck* Paul Cleary, 2011-08-10 We think we are the lucky country but what we really have is dumb luck too much luck more than we know what to do with Paul Cleary In *Too Much Luck* Paul Cleary shows how the resource boom which seems a blessing could well become a curse We have never seen a boom quite like this one Under taxed and under regulated multinational companies are making colossal profits by selling off non renewable resources New projects are being rushed through weekly but who is looking out for the public interest As the boom accelerates it will drive the dollar higher and higher and force up the cost of doing business for everyone else Industries that involve many jobs such as tourism and education will fade away What happens if commodity prices suddenly collapse as they have in the past Or worse when the resources run out Many countries before us have been caught by the resource trap a heady period of boom and growth followed by a painful bust Paul Cleary maps out the pitfalls counts the human and environmental costs shows what has worked overseas and suggests a better way forward one which would turn this one off windfall into a lasting legacy **Climate Change and Capitalism in Australia** Hans A. Baer, 2021-09-30 Recognizing that climate politics has been an increasingly contentious and heated topic in Australia over the past two decades this book examines Australian capitalism as a driver of climate change and the nexus between the corporations and Coalition and Australian Labor parties As a highly developed country Australia is punching above its weight in terms of contributing to greenhouse gas emissions despite rising temperatures droughts water shortages and raging bushfires storm surges and flooding and the bleaching of the Great Barrier Reef Drawing upon both archival and ethnographic research Hans Baer examines Australian climate politics at the margins namely the Greens the labour union the environmental NGOs and the grass roots climate movement Adopting a climate justice perspective which calls for system change not climate change as opposed to the conventional approach of seeking to mitigate emissions through market mechanisms and techno fixes particularly renewable energy sources this book posits system challenging transitional steps to shift Australia toward an eco socialist vision in keeping with a burgeoning global socio ecological revolution Accessibly

written and including an interview with renowned comedian and climate activist Rod Quantock OAM this book is essential reading for academics students and general readers with an interest in climate change and climate activism **Neoliberal Australia and US Imperialism in East Asia** E. Paul, 2012-10-23 A critical analysis of Australia's neoliberal state and role in the American imperial project in Asia In exposing the causal mechanisms for violence and prospects for more wars it argues for emancipatory alternatives to the existing dominant and anti democratic neoliberal governmentality *Rural Change in Australia* John Connell, 2016-04-08 New twenty first century economic social and environmental changes have challenged and reshaped rural Australia They range from ageing populations youth out migration immigration policies that seek to place skilled migrants in rural Australia tree changers agricultural restructuring and new relationships with indigenous populations Challenges also exist around the patchwork economy and the wealth that the mining boom offers some areas while threatening regional economic decline in others Rural Australia is increasingly not simply a place of production of agriculture and minerals but an idea that individuals seek and are encouraged to consume The socio economic implications of drought water rights and changing farming practices have prefaced new social cultural and economic reforms This book provides a contemporary perspective on rapidly evolving population economic and environmental changes in rural and regional Australia itself a significant concept Bringing together a range of empirical studies the book builds on established rural studies themes such as population change economic restructuring and globalisation in agriculture but links such changes to environmental change culture class gender and ethnic diversity Presenting original and in depth interventions on these issues and their intersections this book assembles the best of contemporary research on rural Australia *Environmental Crime and Social Conflict* Avi Brisman, Nigel South, Rob White, 2016-03-09 This impressive collection of original essays explores the relationship between social conflict and the environment a topic that has received little attention within criminology The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems Largely informed by green criminology perspectives the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world With a goal of creating a typology of environment social conflict relationships useful for green criminological research this study is essential reading for scholars and academics in criminology as well as those interested in crime law and justice *The Architecture of Industry* Mathew Aitchison, 2016-03-16 From the Rust Belt to Silicon Valley the intersection between architecture and industry has provided a rich and evolving source for historians of architecture In a historical context industrial architecture evokes the smoking factories of the nineteenth century or Fordist production complexes of the twentieth century This book documents the changing nature of industrial building and planning from the end of the nineteenth century to the beginning of the twenty

first century Drawing on research from the United States Europe and Australia this collection of essays highlights key moments in industrial architecture and planning representative of the wider paradigms in the field Areas of analysis include industrial production factories hydroelectricity aerospace logistics finance scientific research and mining The selected case studies serve to highlight architectural and planning innovations in industry and their contributions to wider cultural and societal currents This richly illustrated collection will be of interest for a wide range of built environment studies incorporating findings from both historical and theoretical scholarship and design research

Mining in the Asia-Pacific Terry O'Callaghan,Geordan Graetz,2017-09-06 This book provides the most comprehensive survey of mining activity and the principal challenges confronting the resources industry in the Asia Pacific region today and presents new theoretical and practical insights into the political and business risks faced by mining companies operating in the region from both academic and corporate perspectives It focuses on the exploration production and trade of the principal commodities coal iron ore uranium oil and gas and gold as well as the emerging commodities unconventional gas and rare earth minerals provides the reader with a valuable understanding of resource activity in the region In addition it also integrates and draws attention to eight key issue areas which have the potential to pose significant risks challenges and opportunities for the industry going forward which include sustainable development resource governance and economic contributions declining ore grades and territorial expansion community aspects of mining mining and indigenous peoples climate change and impact assessment The contributors to this volume are experts in their respective fields and the diversity of voices makes this book a must read for scholars industry participants investors and policy makers with an interest in mining in the Asia Pacific

The Future of Federalism Richard Eccleston,Richard Krever,2017-01-27 The crisis and its aftermath had a dramatic short term effect on federal relations and as the twelve case studies in this volume show set in place a new set of socio political factors that are shaping the longer run process of institutional evolution and adaptation in federal systems This illuminating book illustrates how an understanding of these complex dynamics is crucial to the development of policies needed for effective and sustainable federal governance in the twenty first century

Natural Resources and Economic Growth Marc Badia-Miró,Vicente Pinilla,Henry Willebald,2015-05-22 The relationship between natural capital and economic growth is an open debate in the field of economic development Is an abundance of natural resources a blessing or a curse for economic performance The field of Economic History offers an excellent vantage to explore the relevance of institutions technical progress and supply demand drivers Natural Resources and Economic Growth contains theoretical and empirical articles by leading scholars who have studied this subject in different historical periods from the 19th century to the present day and in different parts of the world Part I presents the theoretical issues and discusses the meaning of the curse and the relevance of the historical perspective Part II captures the diversity of experiences presenting thirteen independent case studies based on historical results from North and South America Africa Asia Oceania and Europe This book emphasizes that an abundance of

natural resources is not a fixed situation It is a process that reacts to changes in the structure of commodity prices and factor endowments and progress requires capital labour technical change and appropriate institutional arrangements This abundance is not a given but is part of the evolution of the economic system History shows that institutional quality is the key factor to deal with abundant natural resources and especially with the rents derived from their use and exploitation This wide ranging volume will be of great relevance to all those with an interest in economic history development economic growth natural resources world history and institutional economics
