Piccinini, 1969 **Fifteen Papers on Algebra** , 1965-12-31 **Algebra, Topology, and Category Theory** Alex Heller, Myles Tierney, 2014-05-10 Algebra Topology and Category Theory A Collection of Papers in Honor of Samuel Eilenberg is a collection of papers dealing with algebra topology and category theory in honor of Samuel Eilenberg. Topics covered range from large modules over artin algebras to two dimensional Poincaré duality groups along with the homology of certain H spaces as group ring objects. Variable quantities and variable structures in topoi are also discussed. Comprised of 16 chapters this book begins by looking at the relationship between the representation theories of finitely generated and large not finitely generated modules over an artin algebra. The reader is then introduced to reduced bar constructions on deRham complexes some properties of two dimensional Poincaré duality groups and properties invariant within equivalence types of categories. Subsequent chapters explore the work of Samuel Eilenberg in topology local complexity of finite semigroups global dimension of Ore extensions and the spectrum of a ringed topos. This monograph will be a useful resource for students and practitioners of algebra and mathematics. **Proceedings of the Conference on Categorical Algebra** S. Eilenberg, D. K. Harrison, H. Röhrh, S. MacLane, 2012-12-06 This volume contains the articles contributed to the Conference on Categorical Algebra held June 7-12 1965 at the San Diego campus of the University of California under the sponsorship of the United States Air Force Office of Scientific Research. Of the thirty seven mathematicians who were present seventeen presented their papers in the form of lectures. In addition this volume contains papers contributed by other attending participants as well as by those who after having planned to attend were unable to do so. The editors hope to have achieved a representative if incomplete coverage of the present activities in Categorical Algebra within the United States by bringing together this group of mathematicians and by soliciting the articles contained in this volume. They also hope that these Proceedings indicate the trend of research in Categorical Algebra in this country. In conclusion the editors wish to thank the participants and contributors to these Proceedings for their continuous cooperation and encouragement. Our thanks are also due to the Springer Verlag for publishing these Proceedings in a surprisingly short time after receiving the manuscripts. **Algebra, Algebraic Topology and their Interactions** Jan-Erik Roos, 2006-11-14 *The*
