Topological Transformation Freuds Theory:

The Topological Transformation of Freud's Theory Jean-Gerard Bursztein, 2018-03-22 In this book the author presents his reading of psychoanalysis in the spirit of its founder Sigmund Freud and explores the transformations of Freud's work by his followers. The author notes that some of these followers trimmed it down even to exclude the death drive which was one of Freud's fundamental principles. Freud's theory has also been transformed by Lacan who in the mid 1950s embarked on a lifelong enterprise to recast it in a fruitful debate with the sciences and the humanities. Such a transformation brought by Lacan was somewhat paradoxically necessary to show the importance of Freud's findings for the understanding of subjectivity.

Freud, the Contemporary Super-ego, and Western Morality Giosuè Ghisalberti, 2023-10-09 Freud the Contemporary Super ego and Western Morality traces the origins of the relationship between the morality of the super ego and the destructive impulse of the death drive in the liberal democracies of the 21st century. Giosuè Ghisalberti begins by refuting the analysis by contemporary social theorists of the phenomenon described as the return of the religious, presenting instead a comprehensive set of ideas as outlined by Freud in the writings of the 1920s and the analysis of a contemporary theological-political unconscious. Ghisalberti argues that the psyche of the liberal West has regressed to an infantile and primitive present driven by an unconscious hostility towards the Oedipus complex and more comprehensively to Western civilization as a whole. The book re-examines Freud's psychoanalytic ideas on the nature of obsessions interpreted first from the murder of the primal father in Totem and Taboo and turns to his grounding ideals of intelligence, creativity and freedom as the affirmation of the coming to be human in modernity. Freud the Contemporary Super ego and Western Morality will be of great interest to psychoanalysts in practice and in training. It will also be key reading for academics and scholars of psychoanalytic studies, philosophy, political theory and the humanities.

Lacan, Mortality, Life and Language Berjanet Jazani, 2021-09-30 This work presents thoughts on the Lacanian subject. What are we as a speaking being? What makes us a human subject from a psychoanalytic perspective? Is it feelings and affect that make us a human? Or was it the Freudian invention of the unconscious that drew a line between human and a non-human? What can be learnt from the subject of the unconscious in the clinic of psychoanalysis that can help us to approach these questions? Berjanet Jazani takes examples from the psychoanalytic clinic as well as cultural references ranging from ancient Persia to London's Theatreland in order to elaborate the question of subjectivity, reality and truth from a psychoanalytic perspective. In the era of hyperreality, the agency of branding and marketing strategies has overshadowed the reality of a human being, his true nature and agency. The hyperreality of contemporary society creates in each individual a false hope of becoming a high fidelity copy of their idols and such a fallacy has led many to believe that this is what determines their being in a social bond. Jazani explores the question of the reality and mortality of a subject through a Lacanian prism from the theorising of analytical subjectivity that starts with the Freudian Oedipal myth more than a century ago to the futurist aspiration to fabricate human beings according to some

ideal model This book will be important reading for students and academics of Lacanian psychoanalysis as well as professionals concerned with complex social problems **The Lacan Tradition** Lionel Bailly, David Lichtenstein, Sharmini Bailly, 2018-04-09 The Lacanian Tradition is unique among psychoanalytic schools in its influence upon academic fields such as literature philosophy cultural and critical studies This book aims to make Lacan's ideas accessible and relevant also to mainstream psychoanalysts and to showcase developments in Lacanian thinking since his death in 1981 The volume highlights the clinical usefulness of such concepts as the paternal metaphor the formula of fantasy psychic structure the central role of desire and the interlinking of the individual subject in the matrix of the Other While these themes are woven through all the papers each is a highly individual reflection upon some aspect of Lacanian theory practice or history

integration **Topological Properties and Global Structure of Space-Time** Peter G. Bergmann, Venzo De Sabbata, 2013-12-19 The Ninth Course of the International School of Cosmology and Gravitation of the Ettore Majorana Centre for Scientific Culture is concerned with Topological Properties and Global Structure of Space Time We consider this topic to possess great importance Our choice has also been influenced by the fact that there are many questions as yet unresolved Standard general relativity describes space time as a four dimensional pseudo Riemannian manifold but it does not prescribe its large scale structure In order to attempt answers to some topological questions such as whether our universe is open or closed whether it is orientable and whether it is complete or possesses singularities various theoretical approaches to global aspects of gravitational physics are presented here As topological questions play a role in non standard theories as well it will be found that some of the lectures and seminar talks in this volume adopt the point of view of standard relativity whereas others are based on different theories such as Kaluza Klein theories bimetric theories and supergravity We have found it difficult to organize these papers into classes say standard and non standard theory or models with and without singularities One paper by R Reasenberg is experimental Its purpose was to give the theorists present an inkling of the opportunities as well as the pitfalls of experimental research in gravitational physics Accordingly we have arranged all contributions alphabetically by first named author **Freud's Schreber Between Psychiatry and Psychoanalysis**

Thomas Dalzell, 2018-03-29 This book investigates what was distinctive about the predisposition to psychosis Freud posited in Daniel Paul Schreber a presiding judge in Saxony's highest court It argues that Freud's 1911 Schreber text reversed the order of priority in late nineteenth century conceptions of the disposing causes of psychosis the objective biological and subjective biographical to privilege subjective disposition to psychosis but without returning to the paradigms of early nineteenth century Romantic psychiatry and without obviating the legitimate claims of biological psychiatry in relation to hereditary disposition While Schreber is the book's reference point this is not a general treatment of Schreber or of Freud's reading of the Schreber case It focuses rather on what was new in Freud's thinking on the disposition to psychosis what he learned from his psychiatrist contemporaries and what he did not and whether or not psychoanalysts have fully received his aetiology Theory Across Disciplines Jeffrey R. Di Leo, 2025-08-07 Surveying the extraordinary scope of contemporary

theory Jeffrey R Di Leo brings together contributors from around the world to speak to the ways in which theoretical concerns from a variety of disciplines operate within their respective fields of concern Contemporary theory is a multi and inter disciplinary endeavour that operates within and among the humanities the social sciences and many of the professions In addition to its now somewhat more standard fare work in these areas it has also made substantial inroads into the natural sciences and the formal sciences To be sure more disciplines from across the academy have integrated theory into their practice than at any other time in history Di Leo and his fellow contributors survey the workings of contemporary theory within and among the humanities sciences and professions including contributions on literary studies film studies gender

studies visual art law biology and geology They bring together distinguished theorists whose work spans the academy to speak to the ways in which theoretical concerns from a variety of disciplines work within their respective fields of concern

Is Oedipus Online? Jerry Aline Flieger, 2005-05-06 Psychoanalysis as a navigation device for the cultural maze of the twenty first century Can Freud be updated in the twenty first century or is he a venerated but outmoded genius asks Jerry Aline Flieger In *Is Oedipus Online* Flieger stages an encounter between psychoanalysis and the new century testing the viability of Freud's theories in light of the emergent realities of our time Responding to prominent critics of psychoanalysis and approaching our current preoccupations from a Freudian angle she presents a reading of Freudian theory that coincides with and even clarifies new concepts in science and culture Fractals emergence topological modeling and other nonlinearities for example can be understood in light of both Freud's idea of the symptom as a nodal point and Lacan's concept of networks rather than sequential cause and effect that link psychic realities At the same time Flieger suggests how emerging paradigms in science and culture may elucidate Freud's cultural theory Like Slavoj Žižek editor of the *Short Circuits* series Flieger shifts effortlessly from field to field discussing psychoanalysis millennial culture nonlinear science and the landscape of cyberspace In the first half of the book *Re-siting Oedipus* she draws on the work of Lyotard Žižek Deleuze Virilio Baudrillard Haraway and others to refute the assumption of Freud's outdatedness in the new century Then in *Freud Sitings in Millennial Theory* she recasts oedipal theory siting sighting citing Freud in a twenty first century context Thinking of Oedipus decipherer of enigmas wanderer as a navigator or search engine allows us to see psychoanalysis as a navigation device for the cultural maze of the bimillennial era and Oedipus himself as a circuit of intersubjective processes by which we become human For humanity still needed in the posthuman century is at the core of Freud's theory Reading Freud today Flieger writes reminds us of the complications of the Sphinx's riddle the enigma that Oedipus only thought he solved the question of what it is to be human Psychoanalysis continues to pose that question at the crossroads between instincts and their vicissitudes

The Politics of Vibration Marcus Boon, 2022-08-08 In *The Politics of Vibration* Marcus Boon explores music as a material practice of vibration Focusing on the work of three contemporary musicians Hindustani classical vocalist Pandit Pran Nath Swedish drone composer and philosopher Catherine Christer Hennix and Houston based hip hop musician DJ Screw Boon outlines how music constructs a vibrational space of individual and collective transformation Contributing to a new interdisciplinary field of vibration studies he understands vibration as a mathematical and a physical concept as a religious or ontological force and as a psychological determinant of subjectivity Boon contends that music as a shaping of vibration needs to be recognized as a cosmopolitical practice in the sense introduced by Isabelle Stengers in which what music is within a society depends on what kinds of access to vibration are permitted and to whom This politics of vibration constitutes the hidden ontology of contemporary music because the organization of vibration shapes individual music scenes as well as the ethical choices that participants in these scenes make about how they want to live in the world
