### (1) Logic switching

Use SW1 to switch between logic.

Switch between logic before wiring to the inverter and without supplying power. If switching between sink, source and PLC is done when power is turned on after switching or when the inverter is supplied with power, the inverter might become damaged. Confirm it before supplying power.

### (2) Voltage-current output switching

Use the PM switch to switch between voltage output and current output.

Switch the PM terminal's voltage-current output before wiring to inverter or without supplying power.

Factory default settings of slide switches
