**Bodies in Protest** Steve Kroll-Smith, H. Hugh Floyd, 1997-06-01 Gulf War Syndrome Is It a Real Disease asks a recent headline in the New York Times This question are certain diseases real lies at the heart of a simmering controversy in the United States a debate that has raged in different contexts for centuries In the early nineteenth century the air of European cities polluted by open sewers and industrial waste was generally thought to be the source of infection and disease Thus the term miasma literally deathlike air came into popular use only to be later dismissed as medically unsound by Louis Pasteur While controversy has long swirled in the United States around such illnesses as chronic fatigue syndrome and Epstein Barr virus no disorder has been more aggressively contested than environmental illness a disease whose symptoms are distinguished by an extreme debilitating reaction to a seemingly ordinary environment The environmentally ill range from those who have adverse reactions to strong perfumes or colognes to others who are so sensitive to chemicals of any kind that they must retreat entirely from the modern world Bodies in Protest does not seek to answer the question of whether or not chemical sensitivity is physiological or psychological rather it reveals how ordinary people borrow the expert language of medicine to construct lay accounts of their misery The environmentally ill are not only explaining their bodies to themselves however they are also influencing public policies and laws to accommodate the existence of these mysterious illnesses They have created literally a new body that professional medicine refuses to acknowledge and one that is becoming a popular model for rethinking conventional boundaries between the safe and the dangerous Having interviewed dozens of the environmentally ill the authors here recount how these people come to acknowledge and define their disease and themselves in a suddenly unlivable world that often stigmatizes them as psychologically unstable Bodies in Protest is the dramatic story of human bodies that no longer behave in a manner modern medicine can predict and control

**The Body of Christ as Seen through the Eyes of a Physician** Pat Fosarelli, 2024-12-20 At a time when people have a heightened interest in and knowledge of the human body what makes it function well what makes it function poorly and at the same time when factions within our world country and church are at odds with each other an appeal to St Paul's idea of the body of Christ seems particularly apropos Although Christians have heard millions of sermons over the millennia about the body it is time to take a fresh look based on what we now know scientifically about the interconnection of the various parts of our bodies Harmonious interactions among systems in the body confer good health so too in the body of Christ Lack of harmony among bodily systems predicts illness so too in the body of Christ Building on what church leaders have taught throughout the ages a physician theologian approaches the body of Christ and its ills as well as its potential for flourishing with a deep understanding of how the human body works

Neo-Avant-Garde ,2016-08-01 The neo avant garde of the 1950s 60s and 70s is due for a thoroughgoing reassessment This collection of essays represents the first full scale attempt to deal with the concept from an interdisciplinary standpoint A number of essays in this book concentrate on fine art particularly painting and sculpture thereby adding significantly to the growing art historical literature in the field but a number of the contributions also focus on poetry performance theatre film architecture and music Given that there are also major essays here dealing with geographical blindspots in current neo avant garde studies with thematic issues such as art's entanglement with gender mass culture and politics with key neo avant garde publications and with the purely theoretical problems attaching to the theorisation of the topic this collection offers a multi dimensional approach to the subject which is noticeably lacking elsewhere Taken together these essays represent a consolidated attempt at re thinking the cultural logic of the immediate post World War II period

Health Education Katie Fitzpatrick, Richard Tinning, 2014-02-05 Health Education Critical perspectives provides a socio cultural and critical approach to health education The book draws together international experts in the fields of health and education who deconstruct contemporary discourses and practices and re imagine a health education that both connects with young people and offers a way forward in addressing issues of health and wellbeing Chapters within specifically link academic work on neoliberalism healthism risk and the body to wider discourses of health and health education They challenge current practices and call for a re thinking of current health programs in education settings A unique feature of this book is the analyses of health education from both political and applied levels across a range of international contexts The book is divided into three sections the social and political contexts informing health education how individual health issues sexuality alcohol mental

health the body and obesity nutrition articulate in education in complex ways alternative ways to think about health and health education pedagogy The overall theme of the book offers a perspective that the current approach to health education promoting a fear of ill health self surveillance and individual responsibility can become a form of health fascism and we need to be cognisant of this potential and its consequences for young people The book will be of key interest to academics and researchers exploring the political context of health education

A Body of Vision R. Bruce Elder,1998-10-14 Elder examines how artists such as Brakhage Artaud Schneemann Cohen and others have tried to recognize and to convey primordial forms of experiences He argues that the attempt to convey these primordial modes of awareness demands a different conception of artistic meaning from any of those that currently dominate contemporary critical discussion By reworking theories and speech in highly original ways Elder formulates this new conception His remarks on the gaps in contemporary critical practices will likely become the focus of much debate
