Computer Integrated Manufacturing Dr.R.Raghu Chand, Dr.Ram Subbiah, Dr.Gunaselvi Manohar, Dr.P.Subha Hency Jose, Dr.L.Girisha, Dr.D.K.Veeranna, 2020-12-01 This book covers computer integrated manufacturing systems analysis of automated flow line line balancing automated assembly systems computerized manufacturing planning systems CNC machining centers and robotics **Ergonomics Guidelines and Problem Solving** A. Mital, Å. Kilbom, S. Kumar, 2000-01-31 There is an urgent need to disseminate ergonomics know how to the work place This book meets that need by providing clear guidelines and problem solving recommendations to assist the practitioner in decisions that directly protect the health safety and well being of the worker The guidelines have evolved from a series of symposia on Ergonomic Guidelines and Problem Solving Initially experts in each area selected were asked to write draft guidelines These guidelines were circulated to participants at the symposia and to other experts for review before being comprehensively revised In some instances these guidelines cannot be considered complete but it is important now to put some recommendations forward as guidelines It is hoped that as new research emerges each guideline will be updated Each guideline has been divided into two parts Part I contains the guidelines for the practitioner and Part II provides the scientific basis or the knowledge for the guide Such separation of the applied and theoretical content was designed to facilitate rapid incorporation of the guide into practice The target audience for this book is the practitioner The practitioner may be a manager production system designer shop supervisor occupational health and safety professional union representative labor inspector or production engineer For each of the guidelines relevant practitioners are described Topics covered include work space design tool design work rest schedules illumination and maintenance **Energy Efficient Manufacturing** John W. Sutherland, David A. Dornfeld, Barbara S. Linke, 2018-07-04 Over the last several years manufacturers have expressed increasing interest in reducing their energy consumption and have begun to search for opportunities to reduce their energy usage In this book the

authors explore a variety of opportunities to reduce the energy footprint of manufacturing. These opportunities cover the entire spatial scale of the manufacturing enterprise from unit process oriented approaches to enterprise level strategies. Each chapter examines some aspect of this spatial scale and discusses and describes the opportunities that exist at that level. Case studies demonstrate how the opportunity may be acted on with practical guidance on how to respond to these opportunities.
