ABOUT THE CAMPAIGN

World TB Day

World TB Day is observed on March 24 each year to raise public awareness and understanding about one of the world's deadliest infectious killers — tuberculosis (TB) and its devastating health, social and economic impact on people around the world. The theme of World TB Day 2024 — “Yes! We can end TB!” — conveys a message of hope that getting back-on-track to turn the tide against the TB epidemic is possible through high level leadership, increased investments and faster uptake of new WHO recommendations.

Each day, over 3,500 people lose their lives to TB and close to 30,000 people fall ill with this preventable and curable disease. TB is the leading cause of death of people with HIV and a major contributor to antimicrobial resistance. World TB Day is an opportunity to focus on the people affected by this disease and to call for accelerated action to end TB suffering and deaths.

Campaign theme

The theme of World TB Day 2024 — “Yes! We can end TB!” — conveys a message of hope that getting back-on-track to turn the tide against the TB epidemic is possible through high level leadership, increased investments and faster uptake of new WHO recommendations. Following the commitments made by Heads of State at the UN High Level meeting in 2023 to accelerate progress to end TB, this year's focus shifts to turning these commitments into tangible actions.

To help countries scale-up access to TB preventive treatment, WHO will release an investment case on scaling up the roll out of TB preventive treatment.
