The Pictorial Third Liliane Louvel, 2018-05-23 The Pictorial Third An Essay into Intermedial Criticism examines the extent to which poetry intertwines with painting and the visual at large and studies the singular relationship established between language and image observing the modalities and workings of what is termed intermedial transposition By following a critical method of the close analysis of texts the book examines to what extent the pictorial tool may be of help to analyze literary texts and thus enlarge and enrich literary criticism Examining the technical notions typical of the medium and its history including perspective framing colour anamorphosis trompe l'œil Veronica veil still life portrait figure illusion apparatus genres and styles this volume presents a pragmatics of image in text and of the visual in text as an operative tool This pictorial reading necessarily includes synesthesia and the senses it also functions as a reading event or what happens to one when one unawares encounters a picture be it present in the book or the object of an ekphrasis Thus the body is eventually given back a role to play The sensitive approach has its own resonances and the eye or the gaze sometimes sees double in such intermedially oriented texts This volume proposes to identify the pictorial third as the phenomenon which can be apprehended in terms of effect or affect not only as a concept Poetics of the Iconotext Professor Liliane

Louvel, 2013-05-28 Poetics of the Iconotext makes available for the first time in English the theories of the respected French text image specialist Professor Liliane Louvel A consolidation of the most significant theoretical materials of Louvel's two acclaimed books *L'Œil du Texte* *Texte et image dans la littérature anglophone* and *Texte Image Images lire textes voir* this newly conceived work introduces English readers to the most current thinking in French text image theory and visual studies Focusing on the full spectrum of text image relations from medieval illuminated manuscripts to digital books Louvel begins by introducing key terms and situating her work in the context of significant debates in text image studies Part II introduces Louvel's typology of pictorial saturation through which she establishes a continuum along which to measure the effect of the most figurative to the most literal images upon writerly and readerly textual spaces Part III adopts a phenomenological approach towards the reading viewing experience as expressed in conceptual categories that include the trace focal range synesthesia and rhythm and speed The result is a provocative interplay of the categorical and the subjective that invites readers to think at once more precisely and more inventively about texts images and the intersections between the two
