Value Added Measures In Education What Every Educator Needs To Know:

Value-added Measures in Education Douglas N. Harris, 2011 The Strategic Management of Charter Schools addresses the challenges facing such schools by mapping out in straightforward and highly pragmatic terms a management framework for them The first charter school law in the United States was enacted in Minnesota in 1991 In the twenty years since that modest beginning the movement has burgeoned and spread across the country there are now more than five thousand charter schools attended by nearly two million students Yet due to this rapid growth in the number of charter schools and to their generally independent character the nature and quality of these institutions vary greatly The promise of charter schools is great but so are the organizational and educational challenges they face Organized around three crucial challenges to charter school leaders managing mission managing internal operations and managing the larger stakeholder environment the book provides charter school leaders with indispensable tools and insights for achieving educational and organizational success In its elucidation of these managerial challenges and in its equally helpful and detailed examinations of particular schools the book offers a clear credible approach to the efficient and sustainable management of what are still young and experimental educational institutions Publisher description

Rethinking Value-Added Models in Education Audrey Amrein-Beardsley, 2014-04-24 Since passage of the of No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research based ways

The Wiley Handbook of Educational Supervision Sally J. Zepeda, Judith A. Ponticell, 2018-09-11 An authoritative guide to educational supervision in today s complex environment The Wiley Handbook of Educational Supervision offers a comprehensive resource that explores the evolution of supervision through contributions from a panel of noted experts The text explores a wealth of topics including recent and dramatic changes in the complex context of today s schools This important resource Describes supervision in a historical context Includes a review of adult learning and professional community Reviews new teacher preparation and comprehensive induction systems Contains perspectives on administrative feedback peer coaching and collaboration Presents information on professional development and job embedding learning

Examines policy and implementation challenges in teacher evaluation Written for researchers policy analysts school administrators and supervisors The Wiley Handbook of Educational Supervision draws on concepts theories and research from other closely related fields of study to enhance and challenge our understanding of educational supervision **Student Growth Measures in Policy and Practice** Kimberly Kappler Hewitt, Audrey Amrein-Beardsley, 2016-10-05 This book examines the intersection of policy and practice in the use of student growth measures SGMs for high stakes purposes as per such educator evaluation systems The book also focuses on examinations of educators perceptions of and reactions to the use of SGMs ethical implications pertaining to the use of SGMs contextual challenges when implementing SGMs and legal implications of SGM use The use of student test score data has been the cornerstone of the recent transfiguration of educator evaluation systems in forty two states and the District of Columbia Three leading voices on SGMs Sean Corcoran Henry Braun and David Berliner also serve as section and concluding commentators **Encyclopedia of Education Economics and Finance** Dominic J. Brewer, Lawrence O. Picus, 2014-08-25 Economics can be a lens for understanding the behavior of schools districts states and nations in meeting education needs of their populaces as well as for understanding the individual decisions made by administrators teachers and students Insights from economics help decision makers at the state level understand how to raise and distribute funds for public schools in an equitable manner for both schools and taxpayers Economics also can assist researchers in analyzing effects of school spending and teacher compensation on student outcomes And economics can provide important insights into public debates on issues such as whether to offer vouchers for subsidizing student attendance at private schools This two volume encyclopedia contains over 300 entries by experts in the field that cover these issues and more Features This work of 2 volumes in both print and electronic formats contains 300 350 signed entries by significant figures in the field Entries conclude with cross references and suggestions for further readings to guide students to in depth resources Although organized in A to Z fashion a thematic Reader s Guide in the front matter groups related entries by topic Also in the front matter a chronology provides students with historical perspective on the development of education economics and finance as a field of study The entire work concludes with a Resources appendix and a comprehensive Index In the electronic version the index Reader s Guide and cross references combine to provide effective search and browse capabilities *Changing Conceptions, Changing Practices* Angela Glotfelter, Caitlin Martin, Mandy Olejnik, Ann Updike, Elizabeth Wardle, 2022-12-28 Changing Conceptions Changing Practices demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability Relating the experiences of faculty from disciplines as diverse as art history economics psychology and philosophy this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action The authors draw on the threshold concepts framework research in writing studies and theories of learning leadership and change to deftly explore

why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional development for faculty teams can help make such change possible This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected In today's climate courses programs and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning with grave consequences for students The stakes have never been higher particularly for public higher education Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students Professional developers have an important role to play in such change efforts WAC scholars and practitioners leaders of professional development and centers for teaching excellence program administrators and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in *Changing Conceptions Changing Practices* Contributors Juan Carlos Albarrán Jos Amador Annie Dell Aria Kate de Medeiros Keith Fennen Jordan A Fenton Carrie E Hall Elena Jackson Albarrán Erik N Jensen Vrinda Kalia Janice Kinghorn Jennifer Kinney Sheri Leafgren Elaine Maimon Elaine Miller Gaile Pohlhaus Jr Jennifer J Quinn Barbara J Rose Scott Sander Brian D Schultz Ling Shao L James Smart Pepper Stetler *Policy and Inequality in Education* Stephen Parker, Kalervo N. Gulson, Trevor Gale, 2017-04-12 This book is an edited collection introducing the Education Policy and Social Inequality series and presents chapters from authors on the editorial board It investigates relations between educational policy and social inequality not simply in terms of policy solutions for inequalities but also how education policy frames creates and at times exacerbates social inequalities It adopts a critical stance encompassing innovative and interdisciplinary theoretical and conceptual studies drawing on e.g. sociology cultural studies social and cultural geography and history as well as original empirical work that examines a range of educational contexts including early years education vocational and further education informal education K-12 schooling and higher education The book argues that critique and policy studies can have a transformative function positing new dimensions for understanding the role of education policy in connection with recurrent social problems and seeking the amelioration of social inequality in ways that challenge the possibility of equity in the liberal democratic state as well as in other forms of governance and government Failure Up Close Jay P. Greene, Michael Q. McShane, 2018-01-17 For many reasons failure in education reform is rarely admitted Even though it is incredibly hard work to try and improve the enormous and diverse American education system because there are political consequences of admitting that a particular effort did not live up to its promises and pressure from philanthropic funders to show success unsuccessful efforts are often swept under the rug or papered over with public relations efforts that avoid wrestling with the tough realities of educational improvement This doesn't help anyone As any educator will tell you failure is an essential part of learning Insofar as education reform needs to be a learning movement itself it has to be able to admit where it has failed and learn from it *Failure Up Close* engages a select group of scholars from across the ideological

spectrum to examine particular education reform efforts of recent years that have not succeeded and offer lessons for school and system improvement that can be learned from them Rather than view failure as negative this volume looks at failure as an opportunity to learn and grow In fact the editors endeavored to find authors that would analyze reforms for which they had some fundamental sympathy The goal is not to bash particular efforts or castigate their supporters but rather to help those supporters understand how to do what they do better and ultimately do better for children **A Straightforward**
