Van Der Zee,1998-01-01 Germany invaded the Netherlands in the spring of 1940 Life in occupied Holland was hideous enough but for the Dutch the worst was yet to come After the Western Allies lost the Battle of Arnhem in September 1944 the Dutch provinces north of the Rhine and Waal Rivers were in the hands of the Germans and to the south fighting raged for months In the winter of 1944 45 just as other parts of Europe were being liberated the Dutch seemed forsaken by the Allies who bypassed Holland on their drive to Berlin That last winter of the war with its severe food and fuel shortages was a terrible one for the Dutch people who also suffered from episodes of Nazi terrorism In some provinces there was nothing to eat but tulip bulbs and sugar beets and eighteen thousand Dutch civilians actually starved to death Henri van der Zee who was ten years old that winter remembers what happened to his people **Nico Bloembergen** Rob Herber,2019-11-25 This biography is a personal portrait of one of the best known Dutch physicists Nicolaas Bloembergen Born in 1920 in Dordrecht Bloembergen studied physics in Utrecht leaving after World War II for the United States where he became an American citizen in 1958 At Harvard University he pioneered nuclear magnetic resonance NMR used in chemistry and biology for structure identification moreover leading to MRI laser theory and nonlinear optics In 1978 he was awarded the Lorentz Medal for his contribution to the theory of nonlinear optics used in fiber optics and in 1981 he received the Nobel Prize for physics along with Arthur Schawlow and Kai Siegbahn The book is based on numerous conversations with Nicolaas Bloembergen himself his wife Deli Brink his family and colleagues in science It describes his childhood and study in Bilthoven and Utrecht the first postwar years at Harvard the discoveries of masers and lasers and the award of the Nobel Prize It also delves into Bloembergen s involvement in American politics particularly his role in Ronald Reagan s controversial Star Wars program Catalogue of books, periodical sets and pamphlets on general and local History of the Netherlands Martinus Nijhoff,2013-04-17 Van dollen Dinsdag tot de bevrijding J. nieuw tijdperk waarin de Rule of Law onder druk staat de sterke en zwakke punten van de huidige rechtsstaat Prof mr Ybo Buruma nam in juni 2025 afscheid als raadsheer in de Hoge Raad der Nederlanden en was daarvoor hoogleraar strafrecht aan de Radboud Universiteit in Nijmegen Van dollen dinsdag tot de bevrijding Johannes G. Economic Adjustment and Political Transformation in Small States Erik Jones, 2008-05-08 The smaller countries of Western Europe have a reputation for being more successful than their larger neighbours They are wealthier per capita they are more stable politically and they are more flexible economically The secret to this success lies in their consensual style of politics and their corporatist style of decision making Unfortunately however that may be about to change A political transformation underway in small states is undermining the politics of consensus and breakdown the effectiveness of corporatist institutions Small countries are becoming increasingly vulnerable to the vicissitudes of world markets as a result Belgium and the Netherlands offer clear examples of the problem at hand The political societies of both countries were tightly organized to avoid conflict and to promote consensus Over time however this tight organization has broken down politicians have opted for conflict over consensus and elections have become more volatile as a result In turn this political transformation of Belgium and the Netherlands has undermined their traditional approach to economic policymaking and economic adjustment Belgium and the Netherlands are now more vulnerable to world market forces than at any time since the end of the 1970s Their relative economic and political success can no longer be taken for granted The relative success of other small states should be brought into question as well
