Variation In Writing Functional And Linguistic Cultural Differences Paper

James E. Alatis

Variation In Writing Functional And Linguistic Cultural Differences Paper:

Cross-Cultural Approaches to Literacy Brian V. Street, 1993-03-25 Cross Cultural Approaches to Literacy investigates the meanings and uses of literacy in different cultures and societies In contrast to previous studies where the focus of research has been on aspects of cognition education and on the economic consequences of literacy these largely ethnographic essays bring together anthropological and linguistic work written over the last ten years Accounts of literacy practices in a variety of locations including Great Britain the United States Africa the South Pacific and Madagascar illustrate how these practices vary from one context to another and challenge the traditional view that literacy is a single uniform skill essential to functioning in a modern society

Landmark Essays on Writing Across the Curriculum Charles Bazerman, David Russell, 2020-11-25 Rhetoric as a general teaching while preaching locality of action and guidelines for handling that locality has tended from the beginning to serve as a universality It has offered a generalized techne with only limited categories appropriate for all discursive situations at least for those that were not excluded from the realm of rhetoric Nonetheless from its beginnings rhetoric limited its interests to certain activity fields such as law government religion and most important the educators of leaders in these activity fields This collection presents landmarks showing where the Writing Across the Curriculum WAC and Writing in the Disciplines WID movements have gone They have opened up a number of prospects that were impossible to see when rhetoric and composition confined their gaze to relatively few discursive activities This suggests that the rhetorical landscape is becoming more complex and interesting as well as more responsive to life in the complex differentiated societies that have emerged in the last few centuries This volume will reveal to scholars and researchers a range of possibilities for the study of disciplinary discourse and its teaching and suggest to them new prospects for the future and for the better *Resources in Education*, 1999

Ethnolinguistic Diversity and Education Marcia Farr, Lysa Seloni, Juyoung Song, 2009-12-04 In recent decades the linguistic and cultural diversity of school populations in the United States and other industrialized countries has rapidly increased along with globalization processes At the same time schooling as it is currently constituted continues to be ineffective for large numbers of students Exploring crucial issues that emerge at the intersection of linguistic diversity and education this volume provides an up to date review of sociolinguistic research and practice aimed at improving education for students who speak vernacular varieties of US English English based Creole languages and non English languages explores the impact of dialect differences and community languages on ethnolinguistically diverse students academic achievement challenges the dominant monolingual Standard language ideology presents sociolinguistically based approaches to language and literacy education that acknowledge and build on the linguistic and cultural resources students

bring into the school Throughout the authors argue for the application of research based knowledge to the dire situation as measured by school failure and drop out rates of many ethnolinguistic populations in US schools The overall aim of the volume is to heighten acknowledgement and recognition of the linguistic and cultural resources students bring into the schools and to explore ways in which these resources can be used to extend the sociolinguistic repertoires including academic English of all students

Theory and Practice in the Teaching of Writing Lee Odell,1993 Responding to recent powerful arguments that theory has only a limited role in the field teachers of composition suggest to their colleagues how they can and why they should teach from a theoretical stance developed from their own experience The ten essays focus on the process of knowing the historical and social context and mechanisms of teaching Paper edition 1947 0 19 95 Annotation copyright by Book News Inc Portland OR

Literacy Across Languages and Cultures Bernardo M. Ferdman,Rose-Marie Weber,Arnulfo G. Ramirez,1994-03-08 This book examines the linkage between literacy and linguistic diversity embedding them in their social and cultural contexts It illustrates that a more complete understanding of literacy among diverse populations and in multicultural societies requires attention to issues of literacy per se as well as to improving an educational process that has relevance beyond members of majority cultures and linguistic groups The focus of the book is on the social and cultural contexts in which literacy develops and is enacted with an emphasis on the North American situation Educators and researchers are discovering that cognitive approaches while very valuable are insufficient by themselves to answer important questions about literacy in heterogeneous societies By considering the implications of family school culture society and nation for literary processes the book answers the following questions In a multi ethnic context what does it mean to be literate What are the processes involved in becoming and being literate in a second language In what ways is literacy in a second language similar and in what ways is it different from mother tongue literacy What factors must be understood to better describe and facilitate literacy acquisition among members of ethnic and linguistic minorities What are some current approaches that are being used to accomplish this These are vital questions for researchers and educators in a world that has a large number of immigrants a variety of multi ethnic and multi lingual societies and an increasing degree of multinational activity Beyond addressing applied concerns attending to these questions can provide new insights into basic aspects of literacy
