The Decisive Network Nadya Bair,2020 Since its founding in 1947 the legendary Magnum Photos agency has been telling its own story Its photographers were concerned witnesses to history and artists on the hunt for decisive moments their pictures were humanist documents of the postwar world Based in unprecedented archival research The Decisive Network peels back layers of the Magnum mythology to offer a new history of what it meant to shoot edit and sell news images after World War II Between the 1940s and 1960s Magnum expanded the human interest story about the everyday life of ordinary people to global dimensions while bringing the aesthetic of news pictures into new markets Its best known work started as humanitarian aid promotion travel campaigns corporate publicity and advertising Working with this range of clients Magnum made photojournalism integral to visual culture Yet Magnum s photographers could not have done this alone This book unpacks the collaborative nature of photojournalism as it transpired on a daily basis focusing on how picture editors sales agents spouses and publishers helped Magnum photographers succeed in their assignments and achieve fame The Decisive Network concludes in the late 1960s and early 1970s when amidst the decline of magazine publishing and the rise of an art market for photography Magnum turned to photo books and exhibitions to manage its growing picture archives and consolidate its brand In that moment Magnum s photojournalists became artists and their assignments turned into oeuvres Such ideas were necessary publicity and they also managed to shape discussions about photography for decades Bridging art history media studies cultural history and the history of communication this book transforms our understanding of the photographic profession and the global circulation of images in the pre digital world

Toward the Visualization of History Mark Moss, 2008-06-19 Over the past 50 years the influence of visuals has impacted society with greater frequency No subject is immune from the power of visual culture and this fact becomes especially pronounced with regards to history and historical discourse Where once the study of the past was books and printed articles the environment has changed and students now enter the lecture hall with a sense of history that has been gleaned from television film photography and other new media They come to understand history based on what they have seen and heard not what they have read What are the implications of this process this visualization of history Mark Moss discusses the impact of visuals on the study of history with an examination of visual culture and the future of print Recognizing the visual bias of the younger generations and using this as a starting point for teaching history is a critical component for reaching students By providing an analysis of photography film television and computer culture Moss uses the Holocaust as an historical case study to illustrate the ways in which visual culture can be used to bring about an awareness of history as well as the potential for visual culture becoming a driving force for social and cultural change

Poetic Writing and the Vietnam War in West Germany Mererid Puw

Davies, 2023-05-30 In the 1960s and 1970s in the Federal Republic of Germany FRG or West Germany newspaper readers and television viewers were appalled by terrible images of fires burning half a world away The Vietnam War was a decisive catalyst for the era's wider protest movements and gave rise to an ardent anti war discourse This discourse privileged writing in many forms Within it poetry and poetic writing were key and because coverage of the conflict in Vietnam often focused on spectacular destructive conflagrations ignited by hi tech machines of war their dominant trope was fire Hundreds of poems and related writings about Vietnam circulated in the FRG yet they are almost entirely forgotten today Poetic Writing and the Vietnam War in West Germany uncovers and explores some of this rich production in order to present a new history of engaged poetic writing in the FRG in the 1960s and 1970s and to draw out distinctive characteristics of wider protest culture In doing so it makes the case for attending to marginal non canonical or neglected literary and cultural forms and for critical thinking about why they might over time have been obscured This book offers too a case study for reflection on the representation of war on ways in which German oppositional culture could imagine its others and the ways in which other voices could speak to it in turn and on the relationship of poetry to the historical world

Kornfeld their influence on the editors of Life the first decade of Black Star and the most notable post World War II experiences of the photo agency s founders are the focus of the second half of the book Family and governmental archives provide extensive new information about the three men and reveal harrowing investigations by J Edgar Hoover s FBI which believed Black Star s founders to be spies or agents of a foreign government The author argues that the refugee migr s successfully contested the never substantiated allegations on account of their strong views relating to the freedom of the press and the malevolence of discrimination on the basis of race religion or national origin Reframing Bodies Roger Hallas,2009-12-02 Examines how queer filmmakers and viedographers bore witness to the historical trauma of the AIDS epidemic in the late 1980s and 1990s Kosti Ruohomaa Deanna Bonner-Ganter,2016-03-15 Acclaimed photographer Kosti Ruohomaa is widely known for his photographs of hard scrabble Yankees in mid century Maine No one was more acutely aware than Ruohomaa that his work was capturing a way of life that was rapidly fading Before his work in Maine however Ruohomaa started out with Disney then went on to become a freelance photographer for the Black Star Agency where he was a regular contributor to Life National Geographic Look and Ladies Home Journal His true passion however was documenting the lives of the people of Maine In this biography by curator Deanna Bonner Ganter of the Maine State Museum Kosti s life and work is made relevant and important to an audience that may be unfamiliar with his work **Visual Communication Theory and Research** S. cofounders of the Magnum Photos cooperative with Robert Capa Henri Cartier Bresson and George Rodger He also wrote Magnum's 1955 bylaws which are still in effect today But he is the only one of those famous photographers who does not have a full biography to his name This book examines his life and work from Poland to France to the Spanish Civil War his work for British intelligence during World War II his reportage on Europe's children after the war his reportages on Italian actors illiteracy and religious festivals in Southern Italy his coverage of Israel's beginnings before his 1956 death during the Suez war His complex itinerary is emblematic of the displacements and passages of the XXth century **Now** Vincent Lavoie, 2003-01-01 While the crisis that took place in photojournalism during the 1960s brought about a significant shift in the practices discourses and institutional structures of press photography it also affected the practices of artists specifically with regard to work devoted to revitalizing the depiction of events The art world attempted to revitalize the historical genre by undertaking its critical rereading in the spirit of restoring a tradition diminished by the mass media The problem may be expressed in these terms How can history be depicted bearing in mind that the media mainly photojournalism and the electronic press have claimed a monopoly of the genre unto themselves At issue is the sizeable problem of mass media omnipotence as an obligatory referential universe for historiographical artistic practices Today it seems impossible to depict the event in any way other than by accentuating or eschewing the formal attributes rhetorical artifices and ideological precepts of the mass media These approaches to addressing historical moments have been examined in this article both because they epitomize contemporary historical writing and for the most part they constitute critical responses to stereotyped depictions of events Above all they represent a paradigm shift the mass media's prerogatives for depicting historical moments has shifted towards the field of art Contemporary depictions of catastrophe crimes sensationalist news items terrorist attacks humanitarian disasters genocides common themes in many of the artistic projects represented in the 8th edition of the *Mois de la Photo* a Montreal have been especially striking in this respect For of all contemporary events catastrophes are the most likely to be spontaneously propelled to the top of the news roster and the most susceptible to the various inflections of contemporary art photography *Image Brokers* Zeynep Devrim Gursel, 2016-04-12 *Image Brokers* is an in depth ethnography that reveals the labor and infrastructure behind news images and how they are circulated Zeynep Devrim Geursel presents an intimate look at the ways image brokers the people who manage the distribution or restriction of images construct and culturally mediate the images they circulate Through this framework news images become commodities that impact how politics and culture are visualized in the world Set against the backdrop of the War on Terror and based on fieldwork conducted at the photojournalism industry's centers of power in New York and Paris *Image Brokers* explores the transition from analog to digital technologies and shows how new digital and social media platforms continue to change photojournalism and create ever widening distribution networks The book is a powerful investigation of the processes of decision making amid the changing infrastructures of representation Provided by publisher *Getting the Picture* Jason

E. Hill, Vanessa R. Schwartz, 2020-09-08 Powerful and often controversial news pictures promise to make the world at once immediate and knowable Yet while many great writers and thinkers have evaluated photographs of atrocity and crisis few have sought to set these images in a broader context by defining the rich and diverse history of news pictures in their many forms For the first time this volume defines what counts as a news picture how pictures are selected and distributed where they are seen and how we critique and value them Presenting the best new thinking on this fascinating topic this book considers the news picture over time from the dawn of the illustrated press in the nineteenth century through photojournalism's heyday and the rise of broadcast news and newsreels in the twentieth century and into today's digital platforms It examines the many kinds of images sport fashion society celebrity war catastrophe and exoticism and many mediums including photography painting wood engraving film and video Packed with the best research and full colour illustrations throughout this book will appeal to students and readers interested in how news and history are key sources of our rich visual culture
