reliance on jet technology led to the world s first cruise missile attack on one of the world s largest cities and also heralded the first air to air combat between jet powered aircraft This is the story of that combat A total of 10 500 missiles were launched as part of the V1 attack of which 3 957 were destroyed by the defences Indeed it could have been much worse for by the end of the war the Germans had manufactured close to 32 000 flying bombs The defences put forward to guard against the V1 were formidable 23 000 men and women with their guns radar and communications networks were installed on coastal sites Squadrons of Britain s newest Spitfires the F XIVs and Hawker Tempest Vs were kept at home to battle the new menace Rushed into action in July 1944 to help counter the V1 threat Britain s Gloster Meteor I was the first jet fighter to enter RAF service On 4 August the Meteor scored its first V1 victory Having just closed in on a flying bomb its officer squeezed the trigger but his guns jammed Using the Meteor s superior speed he was able to overtake the missile and using his wing tip he tipped the craft over and sent it crashing into the ground This detailed illustrated account explores these historic interceptions between the V1 and Britain s Gloster Meteor and how they ushered in a new era of aerial combat

Messerschmitt Me 264 Amerika Bomber Robert Forsyth, 2016-09-22 Launching Osprey s X Planes series is a fascinating examination of Hitler s secret weapon This title is a must have for modellers aviation historians and enthusiasts of Germany s super hi tech aircraft programme As Europe plunged into World War II Hitler ordered the development of a hi tech weapon capable of taking the war across the Atlantic the Messerschmitt Me 264 Chosen from designs for an Amerika Bomber tendered by Messerschmitt Junkers and Focke Wulf this ultra long range aircraft would be capable of attacking cities in the United States Just one month before the attack on Pearl Harbor and the American entry into World War II Hitler was promising privately to wage a new war against the USA after his victories in Europe Dazzling digital artwork and 50 rare archive photographs perfectly complement the detailed analysis offered by Robert Forsyth as he examines the development

intended role and influence of the aircraft that Hitler planned to use to bomb New York City American Aircraft Development of the Second World War William Norton, 2019-07-06 This book presents a little known aspect of America's aircraft development of World War II in emphasizing unique and non production aircraft or modifications for the purpose of research and experimentation in support of aircraft development advancing technology or meeting narrow combat needs It describes some important areas of American aviation weapons maturation under the pressure of war with emphasis on advanced technology and experimental aircraft configurations The great value of the work is illumination of little known or minimally documented projects that significantly advanced the science of aeronautics propulsion aircraft systems and ordnance but did not go into production Each chapter introduces another topic by examining the state of the art at the beginning of the war advantages pursued and results achieved during the conflict This last is the vehicle to examine the secret modifications or experiments that are little known Consequently this is an important single source for a fascinating and diverse collection of wartime efforts never before brought together under a single cover The war stories are those of military staffs engineering teams and test pilots struggling against short schedules and tight resource constraints to push the bounds of technology These epic and sometimes life threatening endeavors were as vital as actual combat operations

German Guided Missiles of World War II Steven J. Zaloga, 2019-11-28 Although not as well known as the V 1 buzz bomb and the V 2 missile the first German missiles to see combat were anti ship missiles the Henschel Hs 293 guided missile and the Fritz X guided bomb These began to see extensive combat in the Mediterranean in 1943 In their most famous use the Italian battleship Roma was sunk by a Fritz X attack in September 1943 when Italy attempted to switch sides The serious threat posed by these missiles led to a vigorous but little known Wizard War by the Allies to develop electronic counter measures the first effort of its kind Besides the anti ship missiles the other major category of German missiles were the air defence missiles Germany suffered extremely heavy losses from Allied strategic bombing attacks and German fighter and flak defences proved increasingly unsuccessful As a result the Luftwaffe began an extensive programme to deploy several families of new air defence missiles to counter the bomber threat including the Wasserfall Schmetterling and others This book traces the origins of these missile programmes and examines their development and use in combat With full colour illustrations and detailed explorations of the stories behind the missiles this study offers a comprehensive overview of German guided missiles in the World War II era Railway Guns of World War II Steven J. Zaloga, 2016-02-25 World War II marked the zenith of

railway gun development Although many of the railway guns deployed at the start of the conflict were of World War I vintage Germany's ambitious development programme saw the introduction of a number of new classes including the world's largest the 80cm calibre Schwerer Gustav and Schwerer Dora guns which weighed in at 1 350 tons and fired a huge 7 ton shell This book provides an overview of the types of railway guns in service during World War II with a special focus on the German railway artillery used in France Italy and on the Eastern Front and analyzes why railway guns largely disappeared from use
