The Biopic and Beyond Melanie Piper, 2022-07-14 Biopics and other movies and television shows based on real events are increasingly appearing at the multiplex and on streaming platforms alongside blockbuster franchises and adaptations The appeal of movies and television shows based on true stories is that they claim to tell us what really happened with the public and private versions of events packaged into one coherent narrative But how do they do it and what makes this version of events so appealing The Biopic and Beyond investigates the process that turns the distant public figures that populate news and entertainment into screen

characters that we can engage with and try to understand a little better Even though they aren't the real thing our engagement with fictionalized versions of public figures can for better or worse color the way we understand the real person behind them Screen engagement with the fake person behind the real person doesn't only happen in biopics and docudramas with media as varied as sketch comedy fan fiction and the celebrity cameo contributing to the ways we understand public figures Using case studies such as Mark Zuckerberg and The Social Network Sarah Palin and Saturday Night Live and Louis C K and Louie The Biopic and Beyond will make you think about the way you see the world through a fictionalized version of it

Digital Storytelling for Brands Bridget Tombleson, Katharina Wolf, 2023-08-05 Digital storytelling for brands has become a non negotiable skill in the 21st century due to the need to connect and communicate with diverse audiences across multiple channels and platforms The ability to understand narrative s is now a prerequisite for many business communication marketing and public relations professionals as well as content creators and journalists This book teaches essential skills in deconstructing the traditional narrative and how to adapt narrative to fit contemporary platforms Co creative methods are emphasised and provide readers with a theoretical underpinning of participatory culture and narrative For the first time ever this book brings together extant arts and humanities based models with business theory It provides learners with a clear understanding of the creative and persuasive form of narrative within a digital context whilst building brand Contemporary case studies highlight challenges faced in the digital world including implications for reputation management considerations associated with mis and disinformation and the crucial role of the collective narrative A key principle guiding this book is the more digital we become the more we crave to feel human and it is this very space where digital storytelling can cut through the digital noise to provide an authentic connection Bridget Tombleson is an academic at Curtin University Perth Western Australia with more than twenty years experience in public relations and the communication industry Katharina Wolf is an Associate Professor at Curtin University in Perth Western Australia and Lead of the Faculty of Business and Law s public relations program

Examining Multiple Intelligences and Digital Technologies for Enhanced Learning

Opportunities Zheng, Robert Z., 2019-09-27 Multiple intelligences MI as a cognitive psychology theory has significantly influenced learning and teaching Research has demonstrated a strong association between individual intelligences and their cognitive processes and behaviors However it remains unknown how each of or a combination of these intelligences can be effectively optimized through instructional intervention particularly through the use of emerging learning technology On the other hand while efforts have been made to unveil the relationship between information and communication technology ICT and individual learner performance there is a lack of knowledge in how MI theory may guide the use of ICTs to enhance learning opportunities for students *Examining Multiple Intelligences and Digital Technologies for Enhanced Learning Opportunities* is an essential reference book that generates new knowledge about how ICTs can be utilized to promote MI in various formal and informal learning settings Featuring a range of topics such as augmented reality learning analytics and

mobile learning this book is ideal for teachers instructional designers curriculum developers ICT specialists educational professionals administrators instructors academicians and researchers *Social and Psychological Determinants of Value*
