Startup Neal Cabage, Sonya Zhang, 2013-02-27 Why do some startups succeed while others do not? In a maturing online market the cost of product development has fallen as quickly as competition has risen and building a viable product is no longer enough. In this new reality entrepreneurs must take a smarter, more strategic approach. In this book we'll discuss why some entrepreneurs are luckier than others, how to anticipate success or failure before you begin, why timing is everything for a startup, strategic positioning to beat the competition, building a business that cannot be commoditized, methods for improving user engagement and profits. This book was written by Neal Cabage and Sonya Zhang PhD after years of discussing and studying why some startups succeed. By combining known academic models with personal insights from building and selling two online startups, the authors answer the question of why some startups are more successful than others in order to help entrepreneurs reduce the risk of starting an online business.

Lemon-Aid New Cars and Trucks 2012 Phil Edmonston, 2011-01-01 Phil Edmonston Canada's automotive Dr Phil pulls no punches. He says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring, and mind-boggling depreciation. Many 2011-12 automobiles have chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save 2,000 by cutting freight fees and administrative charges. Diesel annual urea fill-up scams can cost you 300 including an 80 handling charge for 25 worth of urea.
