of the world's automobile makers as they re-engineer a post carbon present and future. Driving the narrative is the key to it all: the green transformation of the global auto parts supply chain. This book includes never before reported stories of the leaders, designers, engineers, and inventors leading the charge to decarbonize the transportation sector from packaging to tires and more. Boyer examines the prospects and plans for this disruptive change, starting with stories of several automotive visionaries: Tesla CEO Elon Musk, Vietnam billionaire Pham Nh t Vuong, Ceer CEO Jim DeLuca, Monolith Corp cofounder Rob Hanson, and GM CEO Mary Barra. Each protagonist has a vision for transforming the world of transportation into a greener, more carbon friendly industry while also earning profits in our predominantly capitalist world. Readers will learn how their breakthroughs and struggles illuminate the future while facing the question: Will an auto revolution lead the world to a more sustainable economic future or will it be too late.
