Understanding Change Understanding Change:

Understanding Change Linda Holbeche, 2007-06-07 Change is now so commonplace that people no longer talk in terms of the whitewater epoch Every sector of the economies of the developed world has experienced huge swathes of change in the last decade of the twentieth century alone Increased global competition aided and abetted by technological advances has led many organizations to seek to re invent themselves in the hope of being able to survive and thrive In mature sectors in particular where the pace of consolidation is accelerating organizations have had little option but to grow through acquisition or be absorbed Whether the change is labelled continuous process improvement restructuring downsizing or re engineering to employees change usually brings with it added pressures job insecurity and a consequent loss of commitment to the organization Understanding Change theory implementation and success argues that strategic change in the new millennium will be geared increasingly to achieving sustainable high performance rather than just short term gains Most theorists now agree that the real challenge of change lies in gaining employees willingness to commit to the change effort Change leaders at every level need to be able to understand the elements at work in any change process and to use judgement about the style of leadership required to give the change effort the best chance of success Understanding Change theory implementation and success provides an overview of change and organizational theory leading in particular to the authors definition of the input elements of the high performance organisation based on extensive research into UK and international organisations It also contains a section looking at the management of change with case studies illustrating approaches to managing change which are conducive to achieving sustainable high performance In her companion book The High Performance Organization creating dynamic stability the author explores some of the how tos of building an organizational culture which is supportive of high performance in todays challenging environment
