September 11, 2001 as a Cultural Trauma Christine Muller,2017-01-20 This book investigates the September 11 2001 attacks as a case study of cultural trauma as well as how the use of widely distributed easily accessible forms of popular culture can similarly focalize evaluation of other moments of acute and profoundly troubling historical change The attacks confounded the traditionally dominant narrative of the American Dream which has persistently and pervasively featured optimism and belief in a just world that affirms and rewards self determination This shattering of a worldview fundamental to mainstream experience and cultural understanding in the United States has manifested as a cultural trauma throughout popular culture in the first decade of the twenty first century Popular press oral histories literary fiction television and film are among the multiple ubiquitous sites evidencing preoccupations with existential crisis vulnerability and moral ambivalence with fate no win scenarios and anti heroes now pervading commonly told and readily accessible stories Christine Muller examines how popular culture affords sites for culturally traumatic events to manifest and how readers viewers and other audiences negotiate their fallout

Reading Sounds Sean Zdenek,2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue as one might assume at first but consists largely of making rhetorical choices For Sean Zdenek when captioners describe a sound they are interpreting and creating contexts they are assigning significance they are creating meaning that doesn t necessarily exist in the soundtrack or the script And in nine chapters he analyzes the numerous complex rhetorical choices captioners make from abbreviating dialogue so it will fit on the screen and keep pace with the editing to whether and how to describe background sounds

accents or slurred speech to nonlinguistic forms of sound communication such as sighing screaming or laughing to describing music captioned silences as when a continuous noise suddenly stops and sarcasm surprise and other forms of meaning associated with vocal tone Throughout he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing impaired viewers Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning thereby better serve the needs of hearing impaired viewers The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet where captioning can take on additional functions such as enhancing searchability While scholarly work has been done on captioning from a legal perspective from a historical perspective and from a technical perspective no one has ever done what Zdenek does here and the original analytical models he offers are richly interdisciplinary drawing on work from the fields of technical communication rhetoric media studies and disability studies
