the New Engineering Contract family of contracts continues to grow worldwide so does the importance of understanding its clauses and nuances to everyone working in the built environment. Currently in its third edition, this set of contracts is different to others in concept as well as format so users may well find themselves needing a helping hand along the way. Understanding NEC3 Professional Services Contract uses plain English to lead the reader through the NEC3 Professional Services Contract's key features including Main and Secondary Options, the use of early warnings, programme provisions, payment compensation events, preparing and assessing tenders. Common problems experienced when using the Professional Services Contract are signalled to the reader throughout and the correct way of reading each clause is explained. The ways in which the contract affects procurement processes, dispute resolution, project management and risk management are all addressed in order to direct the user to best practice. Written for construction professionals by a practising international construction contract consultant, this handbook is the most straightforward, balanced and practical guide to the NEC3 PSC available. It is an ideal companion for Employers, Consultants, Contractors, Engineers, Architects, Quantity Surveyors, Subcontractors and anyone else interested in working successfully with the NEC3 PSC. Innovative Project Management with FIDIC Contracts Adriana Spassova, 2023-12-05. This book provides comprehensive guidance for the implementation of the legal requirements of FIDIC contracts with a detailed application of modern project management principles. It demonstrates that the FIDIC suites for works and services contain many tools for good project management which can complement the innovation needed today to guide sustainable development. The author's experience in construction management, construction law and the application of FIDIC contracts as a FIDIC engineer, a procurement claims consultant and a FIDIC accredited certified adjudicator and trainer underpins this unique and much needed book linking FIDIC contract management with project management practices and concepts. It is structured around project management knowledge areas and details not only the FIDIC works contracts Red, Yellow, Silver 2017, Reprint 2022, Emerald 2019, Gold 2008 and Green Book 2021, but also the project management requirements of the contract between the Employer and Engineer White Book 2017 and the FIDIC supply chain contracts and explains how these all interface in project governance. Linking the project management knowledge areas from the PMBOK and its Construction Extension with the FIDIC Body of Knowledge FBOK, the book provides recommendations for integration of best practice and innovations. It

illustrates these processes with 54 flowcharts and 16 case studies as well as a railway scenario demonstrating the application of the book's recommended procedures. This will be an invaluable source of practical guidance for employers, contractors and engineers responsible for procuring and managing construction projects. It provides useful insight for technical, legal and financial experts on the management of processes, contracts and digital tools with recommendations on how to tailor and use the FIDIC contracts for project success. *Contracts for Infrastructure Projects* Philip Loots, Donald Charrett, 2022-05-18

Contracts for Infrastructure Projects An International Guide provides a guide to the law relating to construction contracts for infrastructure projects. It is intended for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts to enable them to understand the risks involved and how to minimise them. The principles of construction law outlined in this book apply to small construction contracts as well as very large contracts for which the contract sum may be in the billions of dollars. The focus of the book is on construction contracts entered into by commercial organisations operating in a business environment. Contract law generally assumes that such parties are of equal bargaining power and puts relatively few fetters on their ability to agree on the terms of their bargain. However, where legislation impacts on the execution of construction projects or the operation of construction contracts, it may be of major importance in protecting the rights of weaker parties or third parties. It is assumed that the users of this book will be familiar with the general concepts of tendering and contracting for engineering and construction projects but may not have any formal knowledge of the law. To the extent possible, the emphasis is on general principles of contract law that are widely accepted in many jurisdictions. Examples are drawn from case law in a number of common law jurisdictions as well as from civil codes. *Risk and Insurance in Construction* Nael G. Bunni, 2003-09-02

Those involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law which in themselves are so deeply and intensely complex. However, insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work, be they design, construction, supervision or operation or any combination of them. This thoroughly revised edition of Nael Bunni's successful book, formerly called *Insurance in Construction*, provides information on risk, construction law and construction insurance for those involved with all aspects of construction. The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity, namely construction. New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years, including FIDIC's new suite of contracts published in September 1999, ICE's seventh edition of the civil engineering standard form of contract and ICE's second edition of the design-build form. *International Contracting* Arjan Van Weele, 2014
