Urban gardeners Native seed saving collectives Ecovillage developments What is the connection between these seemingly disparate groups The ecological design system of permaculture is the common thread that weaves them into a powerful potentially revolutionary or reevolutionary movement Permaculture is a philosophy based on common ethics of sustainable cultures throughout history that have designed settlements according to nature s patterns and lived within its bounds As a movement that has been building momentum for the past 40 years it now is taking form as a growing network of sites developed with the intention of regenerating local ecologies and economies Permaculture strategies can be used by individuals groups or nations to address basic human needs such as food water energy and housing As a species humans are being called forth to evolve using our collective intelligence to meet the challenges of the future Yet if we are to survive our collective planetary crisis we need to revisit history integrating successful systems from sustainable cultures To boldly confront our position on the brink of the earth s carrying capacity and make changes that incorporate the wisdom of the past is truly revolutionary Sustainable Revolution features the work of a worldwide network of visionaries including journalists activists indigenous leaders and permaculturists such as David Holmgren Vandana Shiva Charles Eisenstein Starhawk Erik Assadourian Victoria Tauli Corpuz Albert Bates and Geoff Lawton This beautifully photographed collection of profiles interviews and essays features 60 innovative community based projects in diverse climates across the planet Edited by anthropologist Juliana Birnbaum Fox and award winning activist filmmaker Louis Fox it can be read as an informal ethnography of an international culture that is modeling solutions on the cutting edge of social and environmental change The research presented in the book frames the permaculture movement as a significant ally to marginalized groups such as the urban poor and native communities resisting the pressures of globalization Sustainable Revolution uplifts and inspires with its amazing array of dynamic activists and thriving vibrant communities

Economics for a Healthy Planet Iain Miller,2021-04-26 Scientists have told us we are destroying the planet Most of us get it we have even declared a climate change emergency So why aren t we treating it like an emergency As long as we strive to grow our economies we will consume more man made goods that damage the planet and take our lives further away

from nature Economic growth over the past century is unprecedented but the majority of the increased prosperity has been enjoyed by a tiny minority of billionaires while most of us feel far from wealthy We are trapped in vicious circles where the more we grow our economies the more we need to earn and spend to take part in modern society With the tipping point for irreversible damage from climate change only 10 years away we cannot simply rely on individuals to do their bit we also need top down policies to change collective behaviours This book proposes economic policies which access the vast profits of multinationals and billionaires to share the wealth with the many not the few break the vicious circles of economic growth and instead harness virtuous circles of nature in a way that is accessible to those outside the technical world of economics
