[Reading the Early Modern English Diary](#) Miriam Nandi, 2021-02-27 Reading the Early Modern Diary traces the historical genealogy formal characteristics and shifting

cultural uses of the early modern English diary It explores the possibilities and limitations the genre held for the self expression of a writer at a time which considerably pre dated the Romantic cult of the individual self The book analyzes the connections between genre and self articulation How could the diary come to be associated with emotional self expression given the tedium and repetitiveness of its early seventeenth century ancestors How did what were once mere lists of daily events evolve into narrative representations of inner emotions What did it mean to write on a daily basis when the proper use of time was a heavily contested issue Reading the Early Modern Diary addresses these questions and develops new theoretical frameworks for discussing interiority and affect in early modern autobiographical texts Dilemmas of Truth in Alain Badiou's Philosophy Giosuè Ghisalberti,2023-01-25 This book on Alain Badiou s philosophy begins with a central theme the attempt to trace how Badiou has replaced the tradition of critical theory and negation with an affirmative support of his four generic procedures art science love and art as inseparable from his revitalization of both the subject and the concept of truth By defining four procedures as conditions of philosophy Badiou makes the attempt to establish each as inter related and systematically necessary to make a new proposal for thought The fidelity to Badiou s project for the 21st century however requires a fundamental examination are his four truths complicated by an inescapable dilemma And if so can the four truths be retained as a whole or does the individual reader have to make a decision that will alter Badiou s project and conclusions By presenting the dilemmas of his thought the scholarly reader will be in a position to then pursue the necessary study to come to their own conclusions and by doing so become sufficiently free to resist the many coercions of social and political life in liberal democracies today Landscape and Gender in Italian Opera Emanuele Senici,2005-08-11 An unusual look at Italian opera in the nineteenth century *The Limits of Dream* J. F. Pagel,2010-07-28 The Limits of Dream focuses on what we currently know of the human central nervous system CNS examining the basic sciences of neurochemistry neuroanatomy and CNS electrophysiology as these sciences apply to dream then reaching beyond basic science to examine the cognitive science of dreaming including the processes of memory the perceptual interface and visual imagery Building on what is known of intrapersonal CNS processing the book steps outside the physical body to explore artificially created dreams and their use in filmmaking art and story as well as the role of dreaming in creative process and creative madness The limits of our scientific knowledge of dream frame this window that can be used to explore the border between body and mind What is known scientifically of the cognitive process of dreaming will lead the neuroscientist the student of cognitive science and the general reader down different paths than expected into an exploration of the fuzzy and complex horizon between mind and brain The clearest presentation of research and philosophy currently available relating to the mind brain interface Discusses the cognitive processes of dreaming utilized in film and artificial intelligence Describes the functioning of dream in the creative process **Oscar Romero** Julio O. A feminist analysis of the Chicano family that sees it as a site of political struggle with patriarchal masculinity nationalism and homophobia **Trouble With Gender** Alex Byrne,2023-10-04 Sex used to rule Now gender identity is on the throne Sex survives as a cheap imitation of its former self assigned at birth on a spectrum socially constructed and definitely not binary Apparently quite a few of us fall outside the categories male and female But gender identity is said to be universal we all have one Humanity used to be cleaved into two sexes whereas now the crucial division depends on whether our gender identity aligns with our body If it does we are cisgender if it does not we are transgender The dethroning of sex has meant the threat of execution for formerly noble words such as woman and man In this provocative bold and humane book the philosopher Alex Byrne pushes back against the new gender revolution Drawing on evidence from biology psychology anthropology and sexology Byrne exposes the flaws in the revolutionary manifesto The book applies the tools of philosophy accessibly and with flair to gender sex transsexuality patriarchy our many identities and our true or authentic selves The topics of *Trouble with Gender* are relevant to us all This is a book for anyone who has wondered Is sex binary Why are men and women different What is a woman or simply Where can I go to know more about these controversies Revolutions devour their own children and the gender revolution is no exception *Trouble with Gender* joins the forefront of the counter revolution restoring sex to its rightful place at the centre of what it means to be human Are Women Human? Catharine A.

MacKinnon,2007-11-30 More than half a century after the Universal Declaration of Human Rights defined what a human being is and is entitled to MacKinnon asks Are women human yet She exposes the consequences and significance of the systematic maltreatment of women and its systemic condonation as she points toward fresh ways of targeting its toxic orthodoxies Contesting the Politics of Genocidal Rape Debra B. Bergoffen,2013-03-01 Rape traditionally a spoil of war became a weapon of war in the ethnic cleansing campaign in Bosnia The ICTY Kunarac court responded by transforming wartime rape from an ignored crime into a crime against humanity In its judgment the court argued that the rapists violated the Muslim women s right to sexual self determination Announcing this right to sexual integrity the court transformed women s vulnerability from an invitation to abuse into a mark of human dignity This close reading of the trial guided by the phenomenological themes of the lived body and ambiguity feminist critiques of the autonomous subject and the liberal sexual social contract critical legal theory assessments of human rights law and institutions and psychoanalytic analyses of the politics of desire argues that the court by validating women s epistemic authority their right to establish the meaning of their

experience of rape and affirming the dignity of the vulnerable body thereby dethroning the autonomous body as the embodiment of dignity shows us that human rights instruments can be used to combat the epidemic of wartime rape if they are read as de-legitimizing the authority of the masculine autonomous subject and the gender codes it anchors

Civilized Violence Dr David Hansen-Miller, 2013-01-28 *Civilized Violence* provides a social and historical explanation for the popular appeal of cinema violence. There is a significant amount of research on the effects of media violence but less work on what attracts audiences to representations of violence in the first place. Drawing on historical sociology, cultural studies, feminist and queer theory, masculinity studies and textual analysis, David Hansen-Miller explains how the exercise of violence has been concealed and denied by modern society at the same time that it retains considerable power over how we live our lives. He demonstrates how discourses of sexuality and gender even romantic love are freighted with the micropolitics of violence. Confronted with such contradictions, audiences are drawn to the cinema where they can see violence graphically restored to everyday life. Popular cinema holds the power to narrate and interpret social forces that have become too opaque, diffuse and dynamic to otherwise comprehend. Through detailed engagement with specific narratives from the last century of popular film: *The Cabinet of Dr Caligari*, *The Sheik*, *Once Upon a Time in the West*, *Deliverance* and the pervasive violence of contemporary cinema, Hansen-Miller investigates the manner in which representations can transform our understanding of how violence works.

The Leprous Man Kate Simons, 2010 This book explores the extraordinarily violent and abusive nature of Stephen Donaldson's male protagonists. Thomas Covenant of the Chronicles is a leper, rotten and physically collapsing. In *Mordant's Need* and *The Gap* series, the male characters are moral lepers. *The Gap* offers a Janus-faced male lead in the form of two men who are both multiple rapists. The male hero in *Mordant's Need* is outwardly socially acceptable but his alter egos are overly corporeal and sexually obsessed. In spite of their

unappealing condition all these protagonists yearn to be loved Using the psychoanalytical theories of Julia Kristeva this book identifies reasons for Donaldson s derogatory characterization and provides an insight into why these novels cannot allow their male protagonists to establish viable love relationships This study also explains why maternal characters are jettisoned from the narratives considers the problematic nature of father figures and examines the incipient undertow of psychosis

Steeped in Blood Frances J. Latchford, 2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are At a time when interest in DNA and ancestry is exploding Frances Latchford questions the idea that knowing one s bio genealogy is integral to personal identity or a sense of family and belonging Upending our established values and beliefs about what makes a family *Steeped in Blood* examines the social and political devaluation of adoptive ties It takes readers on an intellectual journey through accepted wisdom about adoption twins kinship and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us sometimes violently to our families Latchford exposes how our desire for bio genealogical knowledge understood as it is by family and adoption experts pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation Rejecting the idea that a love of the self same is fundamental to family bonds her book is a reaction to the wounds families suffer whenever they dare to revel in their difference A rejoinder to rhetoric that defines adoptees adoptive kin and their family intimacies as inferior and inauthentic *Steeped in Blood* s view through the lens of critical adoption studies decentres our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood
