Companion to Public Space draws together an outstanding multidisciplinary collection of specially commissioned chapters that offer the state of the art in the intellectual discourse scholarship research and principles of understanding in the construction of public space Thematically the volume crosses disciplinary boundaries and traverses territories to address the philosophical political legal planning design and management issues in the social construction of public space The Companion uniquely assembles important voices from diverse fields of philosophy political science geography anthropology

sociology urban design and planning architecture art and many more under one cover It addresses the complete ecology of the topic to expose the interrelated issues challenges and opportunities of public space in the twenty first century The book is primarily intended for scholars and graduate students for whom it will provide an invaluable and up to date guide to current thinking across the range of disciplines that converge in the study of public space The Companion will also be of use to practitioners and public officials who deal with the planning design and management of public spaces

Public Space and the Challenges of Urban Transformation in Europe Ali Madanipour, Sabine Knierbein, Aglaée Degros, 2013-11-20 European cities are changing rapidly in part due to the process of de industrialization European integration and economic globalization Within those cities public spaces are the meeting place of politics and culture social and individual territories instrumental and expressive concerns Public Space and the Challenges of Urban Transformation in Europe investigates how European city authorities understand and deal with their public spaces how this interacts with market forces social norms and cultural expectations whether and how this relates to the needs and experiences of their citizens exploring new strategies and innovative practices for strengthening public spaces and urban culture These questions are explored by looking at 13 case studies from across Europe written by active scholars in the area of public space and organized in three parts strategies plans and policies multiple roles of public space and everyday life in the city This book is essential reading for students and scholars interested in the design and development of public space The European case studies provide interesting examples and comparisons of how cities deal with their public space and issues of space and society

Public Space Reader Miodrag Mitrašinović, Vikas Mehta, 2021-03-30 Recent global appropriations of public spaces through urban activism public uprising and political protest have brought back democratic values beliefs and practices that have been historically associated with cities Given the aggressive commodification of public resources public space is critically important due to its capacity to enable forms of public discourse and social practice which are fundamental for the well being of democratic societies Public Space Reader brings together public space scholarship by a cross disciplinary group of academics and specialists whose essays consider fundamental questions What is public space and how does it manifest larger cultural social and political processes How are public spaces designed socially and materially produced and managed How does this impact the nature and character of public experience What roles does it play in the struggles for the just city and the Right to The City What critical participatory approaches can be employed to create inclusive public spaces that respond to the diverse needs desires and aspirations of individuals and communities alike What are the critical global and comparative perspectives on public space that can enable further scholarly and professional work And what are the futures of public space in the face of global pandemics such as COVID 19 The readers of this volume will be rewarded with an impressive array of perspectives that are bound to expand critical understanding of public space

Evolving Public Space in South Africa Karina Landman, 2018-11-09 Evolving Public Space in South Africa discusses the transformation of public space highlighted in the

country Drawing on examples from major cities the author demonstrates that these spaces are not only becoming wasted space but are also adapting and evolving to accommodate new users and uses in various parts of the city This process of evolution tends to challenge the more traditional visions and general global views of declining public space in cities and argues that it rather resembles the resilience of these spaces and the potential for regeneration through continuously emerging and mutating forms functions and meanings Including over 20 black and white images this book would be beneficial to academics and students of urban planning and design and those interested in the regeneration of cities

Towards a Metropolitan Public Space Network João Rafael Santos, Maria Matos Silva, Ana Beja da Costa, 2024-10-01 This book explores the hypothesis that public space if conceptualised imagined and shaped at the metropolitan scale through innovative territorial design approaches offers the possibility to interconnect and integrate various systems in search for synergic responses to emerging societal challenges that impact large urbanised landscapes The book offers a multidimensional and multi geographic framework to discuss the role of public space on contemporary metropolitan territories as part of MetroPublicNet Building the foundations of a Metropolitan Public Space Network to support the robust low carbon and cohesive city Projects lessons and prospects in Lisbon research project The reader will find a critical and overarching perspective on the conceptual methodological and empirical lenses that unfolded throughout the research process namely a systematised decoding of the public space projects policies and rationales that shaped the recent transformation of Lisbon Metropolitan Area With a diverse range of authors actively engaged in academic research and professorship in design practice and in policy oriented roles the book concludes with the outlining of forward looking guidelines policy recommendations and design experimentations This book will be of interest to researchers and students of architecture urbanism landscape architecture and geography The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

Ethics, Design and Planning of the Built Environment Claudia Basta, Stefano Moroni, 2013-06-24 The book proposes a set of original contributions in research areas shared by planning theory architectural research design and ethical inquiry The contributors gathered in 2010 at the Ethics of the Built Environment seminar organized by the editors at Delft University of Technology Both prominent and emerging scholars presented their researches in the areas of aesthetics technological risks planning theory and architecture The scope of the seminar was highlighting shared lines of ethical inquiry among the themes discussed in order to identify perspectives of innovative interdisciplinary research After the seminar all seminar participants have elaborated their proposed contributions Some of the most prominent international authors in the field were subsequently invited to join in with this inquiry Claudia Basta teaches Network Infrastructures and Mobility at Wageningen University Between 2009 and 2011 she worked as Coordinator of the 3TU Centre of Excellence for Ethics and Technology of Delft University where she completed her post doc research on the shared areas of investigation between risk theories

planning theories and ethical inquiry Her main research interests concern the matter of assessing and governing technological risks in relation to sustainable land use planning She wrote a number of journal articles and contributions to collective books on these themes Stefano Moroni teaches Land use ethics and the law at Milan Politecnico His main research interests concern planning theory and ethics He is the author of a number of books and journal articles Recent publications as co author Contractual Communities in the Self Organizing City Springer 2012 **Public Space Unbound** Sabine Knierbein,Tihomir Viderman,2018-03-15 Through an exploration of emancipation in recent processes of capitalist urbanization this book argues the political is enacted through the everyday practices of publics producing space This suggests democracy is a spatial practice rather than an abstract professional field organized by institutions politicians and movements Public Space Unbound brings together a cross disciplinary group of scholars to examine spaces conditions and circumstances in which emancipatory practices impact the everyday life of citizens We ask How do emancipatory practices relate with public space under post political conditions In a time when democracy solidarity and utopias are in crisis we argue that productive emancipatory claims already exist in the lived space of everyday life rather than in the expectation of urban revolution and future progress The Urban Design Reader Michael Larice,Elizabeth Macdonald,2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current

debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

Public Space in Informal Settlements Jaime Hernández-García, 2013-12-05 *Public Space in Informal Settlements The Barrios of Bogotá* contributes to the debate on informal settlements by viewing them as an opportunity to understand different ways of seeing and thinking about the city Public spaces in informal settlements like the housing stock are to a large extent the product of local self help and self managed processes however the equivalent level of understanding has not been achieved partly because such settlements are often seen as spare spaces with little value Public spaces in informal settlements are public in terms of ownership and accessibility but are communal in terms of use and attachment They play an important role in the physical and social dynamics of the barrios and have done since their inception however the improvement and consolidation of such spaces may not be realised for many years The book will be of primary importance to architects urban planners and researchers who are interested in the city in general and in informal settlements in particular The book will also be of interest to those in the humanities and social sciences who are concerned with politics and postcolonial studies and to academics working in people environment studies and in the relationship between people and place in terms of place self building place attachment and place identity However the volume will be of most interest for Latin Americanists who do not read Spanish or Portuguese and would like to know more about the region the problems and the views from the perspective of an insider with extended knowledge of the field

Rethinking Public Space Ali Madanipour, 2023-01-17 Taking a critical perspective this book rethinks public space in the context of contemporary global health and economic crises as well as technological political and cultural change In order to do so Ali Madanipour brings together two often unrelated discourses public space and social inclusion interrogating the potential for public spaces to contribute to inclusive social practices

Perspectives on Public Space in Rome, from Antiquity to the Present Day Jan Gadeyne, 2016-04-22 This volume provides readers interested in urban history with a collection of essays on the evolution of public space in that paradigmatic western city which is Rome Scholars specialized in different historical periods contributed chapters in order to find common themes which weave their way through one of the most complex urban histories of western civilization Divided into five chronological sections Antiquity Middle Ages Renaissance Baroque Modern and Contemporary the volume opens with the issue of how public space was defined in classical Roman law and how ancient city managers organized the maintenance of these spaces before moving on to explore how this legacy was redefined and reinterpreted during the Middle Ages The third group of essays examines how the imposition of papal order on feuding families during the Renaissance helped introduce a

new urban plan which could satisfy both functional and symbolic needs The fourth section shows how modern Rome continued to express strong interest in the control and management of public space the definition of which was necessarily selective in this vastly extensive city The collection ends with an essay on the contemporary debate for revitalizing Rome's eastern periphery Through this long term chronological approach the volume offers a truly unique insight into the urban development of one of Europe's most important cities and concludes with a discuss of the challenges public space faces today after having served for so many centuries as a driving force in urban history

Capital Spaces Matthew Carmona, Filipa Wunderlich, 2013-05-02 In recent years it has become common place to hear claims that public space in cities across the globe has become the exclusive preserve of the wealthy and privileged at the expense of the needs of wider society Whether it is the privatization of public space through commerical developments like shopping malls and business parks the gentrification of existing spaces by campaigns against perceived anti social behaviour or the increasing domination of public areas by private transport in the form of the car the urban public space is seen as under threat But are things really that bad Has the market really become the sole factor that influences the treatment of public space Have the financial and personal interests of the few really come to dominate those of the many To answer these questions Matthew Carmona and Filipa Wunderlich have carried out a detailed investigation of the modern public spaces of London that most global of cities They have developed a new typology of public spaces applicable to all cities a typology that demonstrates that to properly assess contemporary urban places means challenging the over simplification of current critiques Global cities are made up of many overlapping public spaces good and bad this book shows how to analyze this complexity and to understand it

Reframing the Role of Public Open Space Miriam Bodino, 2022-02-26 This book explores the growing spatial inequality in contemporary cities and the opportunity of reframing the role of public open space as a tool of inclusion in a context of an increasing economic gap between the urban poor and rich The first part outlines the geographical and theoretical frames of reference which are then tested in the analysis of a case study Cape Town This city in South Africa was selected since its spatial aspects of separation are particularly evident due to the legacy of both apartheid and modernism The examination of the policies of the City of Cape Town confirms the rising attention to public space since the 1990s This slow progress of desegregation is tested through a critical study of one of the most disadvantaged areas of the city Khayelitsha The book explores the relevance and impact of an urban design project and reframes the role of public open space not only as a tool for restructuring the apartheid city but also for reinterpreting other fragmented contemporary cities

Authenticity and Urbanism Ali Madanipour, 2025-06-02 This book investigates authenticity an important but controversial cultural concept and its relevance for urban socio spatial processes Defining authenticity as an evaluative relationship with an origin it unpacks a range of origins from a critical non essentialist perspective self author substance event time place and society Authenticity is a key concept in contemporary culture It was selected as the word of the year 2023 by Merriam Webster it is

significant for UNESCO in designating the world heritage a philosophical battleground and reflecting concerns about truth and trust in the digital age This book offers a clear understanding of the concept and discusses its implications for urbanism understood as both material and relational both physical and social It critically examines whether authentic urbanism may be possible through seeking a solid ground in the self in the act of making in the substance of objects in transformative events in particular times and places and in society and culture Analysing the complexities nuances and controversies of the concept of authenticity and their implications for urban space and society this book explores the promises and pitfalls of authenticity looking for ways of avoiding its dangers and searching for its creative potential Students and scholars in urban studies geography urban design planning and architecture as well as in sociology and cultural studies would find this interface between ideas and practices informative and insightful

Urban Challenges in the Globalizing Middle-East Simona Azzali, Silvia Mazzetto, Attilio Petruccioli, 2021-04-20 This publication aims to investigate the nature of social life in public and urban spaces in the cities of the Middle East considering the value of environmental approaches It aims to develop a better understanding of the patterns of social interactions and activities in public places which have been influenced by cultural heritage values Sustainable and livable open spaces can help in improving living conditions in cities Public spaces are relevant as they satisfy many human needs In public spaces people interact and meet people with different cultures and social backgrounds can communicate and learn from each other in social and spontaneous ways However decision makers tend to forget the value of public spaces especially in the absence of a national regulatory framework in emerging globalized cities The book provides a multi disciplinary approach in reading the characteristics and values of public spaces in the emerging cities of the Middle East

Advances in Ergonomics in Design Francisco Rebelo, Marcelo Soares, 2016-07-26 This book provides readers with a timely snapshot of ergonomics research and methods applied to design development prototyping as well as evaluation training and manufacturing of products systems and services It includes theoretical contributions case studies and reports on technical interventions The book covers a wide range of topics in ergonomic design such as ecological design educational and game design cultural and ethical aspects in design user research and human computer interaction in design as well as design for accessibility and extreme environments and many others The book gives special emphasis to new technologies such as virtual reality state of the art methodologies in information design and human computer interfaces Based on the AHFE 2016 International Conference on Ergonomics in Design held on July 27 31 2016 in Walt Disney World Florida USA this book represents a timely guide for both researcher and design practitioners including industrial designers human computer interaction and user experience researchers production engineers and applied psychologists

Fourth Places Patricia Aelbrecht, 2022-08-26 This book challenges current views that public life is in decline and that contemporary urban design trends reliant on privatisation control events and thematic designs are to be blamed Drawing on detailed and extensive analysis of a case study that illustrates well such urban design trends it shows

that informal social life and interaction occur more than its necessary in new master planned environments and new designed public settings whether public or private owned and or managed Furthermore it reveals the existence of a new category of informal public social settings which it calls fourth places because of their close relationship to Oldenburg s third places in terms of social and behavioural characteristics radical departure from the routines of home and work inclusivity and social comfort but distinct in terms of activities locations and spatial conditions being characterised by spatial temporal and managerial in betweenness i e indeterminacy in form function and times and a great sense of publicness The acceptance of these findings problematises well established urban design theories about master planning expands existing social theories about the optimal conditions for public social life by empirically and spatially elaborating on them and redefines several spatial concepts for designing public space in relation to the specific dynamics of informal social interaction More importantly it brings optimism to urban design practice offering new insights into designing more lively and inclusive public spaces
