Why We Argue about Climate

Change Eric Knight, 2013 A new perspective on a diabolical problem Climate change is one of the most polarising issues of our time but it doesn't have to be that way In *Why We Argue about Climate Change* Eric Knight unpicks the misconceptions that keep us arguing about and stop us seeing the true nature of the problem and its solutions Why can't we learn anything about climate change from snowstorms or scorching temperatures How have sceptics and believers confused politics and science in their war for public opinion Is climate change a moral challenge or a technological one With optimism and clarity Knight cuts through the distortions and distractions and proposes a better way forward *Why We Argue about Climate Change* is essential reading for anyone who wants to solve the puzzle of a warming planet rather than squabble about the weather It contains expanded and updated chapters from Knight's acclaimed book *Reframe* as well as much new material Knight is not just logical and lucid but also consistently interesting and challenging The *Age* Redbacks Books with *Bite* Redbacks are short books on big issues by prominent Australian writers and thinkers These timely interventions offer accessible and vital arguments about society and politics Redbacks will equip, provoke and persuade readers to engage with the national debates that truly matter

Persuasive Gaming in Context Teresa La Hera, Jeroen Jansz, Joost Raessens, Ben Schouten, 2025-10-01 The rapid developments in new communication technologies have facilitated the popularization of digital games which has translated into an exponential growth of the game industry in recent decades The ubiquitous presence of digital games has resulted in an expansion of the applications of these games from mere entertainment purposes to a great variety of serious purposes In this edited volume we narrow the scope of attention by focusing on what game theorist Ian Bogost has called persuasive games that is gaming practices that combine the dissemination of information with attempts to engage players in particular attitudes and behaviors This volume offers a multifaceted reflection on persuasive gaming that is on the process of these particular games being played by players The purpose is to better understand when and how digital games can be used for persuasion by further exploring persuasive games and some other kinds of persuasive playful interaction as well The book critically integrates what has been accomplished in separate research traditions to offer a multidisciplinary approach to understanding persuasive gaming that is closely linked to developments in the industry by including the exploration of relevant case studies

A New Zealand Book of Beasts Annie Potts, Philip Armstrong, Deidre Brown, 2014-03-01 Touching on indigenous Maori relationships with the now extinct flightless moa the attitudes of Pakeha or European settlers toward sheep the iconography of whales and dolphins the problems of pest control and the pleasures of pet keeping this modern day bestiary is a fascinating study of human animal relations In the book's four parts the authors unravel the contradictory ways New Zealanders nurture and eradicate glorify and demonize cherish and devour and describe and imagine animals The study brings together insights from New Zealand's arts and literature popular culture historiography media and everyday life to describe and analyze their interactions with *nga kararehe* and *nga manu* the beasts and birds of the land In doing so it illuminates fundamental aspects of New Zealand society how New Zealanders understand

their own identities and those of others how they regard inhabit and make use of the natural world and how they think about what they buy eat wear watch and read Rich multifaceted and engaging A New Zealand Book of Beasts satisfyingly explores how culture both shapes and is shaped by the beasts of Aotearoa A Return to Healing Andy Lazris, Alan Roth, 2025-03-25 Drawing from their extensive experience in primary care and backed by decades of academic research primary care physicians Andy Lazris MD and Alan Roth DO unravel the complexities of the modern health care system in A Return to Healing Through a wealth of patient stories and meticulous research they dig into the roots of American health care challenges and seek its cure Utilizing poignant patient narratives and rigorous analysis Lazris and Roth expose the flaws in our modern approach to health care The book dissects the current philosophy of medical care addressing foundational issues in health care infrastructure the pitfalls of screening the dishonesty of the pharmaceutical industry and a lack of common sense among health care providers By exploring common diseases and medical scenarios demonstrating how doctors arrive at their conclusions and focusing on the perverse incentives and outdated training that drive doctors to rely on protocols and numerical based care Lazris and Roth demonstrate what is wrong with the system and reveal how to fix it Advocating for patient empowerment the book offers a road map for reform that is accessible to patients and policymakers alike This solution oriented approach aims to dismantle barriers to patient centred care and foster informed decision making In this compelling critique and call to action A Return to Healing provides a clear path towards a more equitable and effective health care system Climate Change Justice Eric A. Posner, David Weisbach, 2010-02-22 A provocative contribution to the climate justice debate Climate change and justice are so closely associated that many people take it for granted that a global climate treaty should indeed must directly address both issues together But in fact this would be a serious mistake one that by dooming effective international limits on greenhouse gases would actually make the world s poor and developing nations far worse off This is the provocative and original argument of Climate Change Justice Eric Posner and David Weisbach strongly favor both a climate change agreement and efforts to improve economic justice But they make a powerful case that the best and possibly only way to get an effective climate treaty is to exclude measures designed to redistribute wealth or address historical wrongs against underdeveloped countries In clear language Climate Change Justice proposes four basic principles for designing the only kind of climate treaty that will work a forward looking agreement that requires every country to make greenhouse gas reductions but still makes every country better off in its own view This kind of treaty has the best chance of actually controlling climate change and improving the welfare of people around the world Climate Change Mischa Wu, 2017-06-03 Why We Disagree about Climate Change Mike Hulme, 2009-04-30 Climate change is not a problem waiting for a solution It is an environmental cultural and political phenomenon which is re shaping the way we think about ourselves our societies and humanity s place on Earth Drawing upon twenty five years of professional work as an international climate change scientist and public commentator Mike Hulme

provides a unique insider's account of the emergence of this phenomenon and the diverse ways in which it is understood. He uses different standpoints from science, economics, faith, psychology, communication, sociology, politics, and development to explain why we disagree about climate change. In this way, he shows that climate change far from being simply an issue or a threat, can act as a catalyst to revise our perception of our place in the world. **Why We Disagree About Climate Change** is an important contribution to the ongoing debate over climate change and its likely impact on our lives. **Why Climate**

Change Isn't Real John Gillchrist, 2019-10-18 Everyone is talking about this in your Facebook addressing climate change. Dr. John lists all of the science-backed evidence that climate change isn't real. The good news is there isn't any, so the pages of this book are blank. It's a great notebook and the most effective conversation starter you've ever pulled from your bag. Imagine the looks on faces when people see the cover. Then imagine the laughs when you show them the pages inside. Do your part: start the conversation. **The Troubled Rhetoric and Communication of Climate Change** Philip

Eubanks, 2015-05-15 Despite an overwhelming scientific consensus, climate change remains one of the most controversial issues of our time. Focusing on the rhetoric that surrounds the issue of climate change, this groundbreaking book analyses why the debate continues to rage and examines how we should argue when winning the argument really matters. Going beyond routine condemnations of the wildest statements made by religious fundamentalists or spokespeople for fossil fuel interests, the book explains the mutually exacerbating problems that permit many of us to greet catastrophic predictions with an equivocal shrug. It argues that the argumentative situation around climate change makes a certain kind of skepticism, fair-minded skepticism, not only possible but likely. The book also strikes a hopeful note, reminding us that people do change their minds in response to effective argumentation that appeals to deeply shared values. Offering new insight into an ongoing academic discussion about the nature of argument and how it can be undertaken more effectively and ethically, as well as a new perspective on the rhetoric of science and technology, this book will be a valuable resource to students and scholars of climate change, environmental humanities, rhetoric, environmental communication, sociology, and science and technology studies. **The Climate War** Eric Pooley, 2010-06-08 In *The Climate War*, Eric Pooley, deputy editor of Bloomberg

BusinessWeek, does for global warming what Bob Woodward did for presidents and Lawrence Wright did for terrorists. In this epic tale of an American civil war, Pooley takes us behind the scenes and into the hearts and minds of the most important players in the struggle to cap global warming pollution, a fight in which trillions of dollars and the fate of the planet are at stake. Why has it been so hard for America to come to grips with climate change? Why do so many people believe it isn't really happening? As President Obama's science advisor John Holdren has said, "We're driving in a car with bad brakes in a fog and heading for a cliff. We know for sure that cliff is out there. We just don't know exactly where it is." Prudence would suggest that we should start putting on the brakes. But powerful interests are threatened by the carbon cap that would speed the transition to a clean energy economy, and their agents have worked successfully to deny the problem and delay the solutions.

To write this book Pooley the former managing editor of Fortune and chief political correspondent for Time spent three years embedded with an extraordinary cast of characters from the flamboyant head of one of the nation's largest coal burning energy companies to the driven environmental leader who made common cause with him from leading scientists warning of impending catastrophe to professional skeptics disputing almost every aspect of climate science from radical activists chaining themselves to bulldozers to powerful lobbyists media gurus and advisors in Obama's West Wing and to top it off unprecedented access to former Vice President Al Gore and his team of climate activists Pooley captures the quiet determination and even heroism of climate campaigners who have dedicated their lives to an uphill battle that's still raging today He asks whether we have what it takes to preserve our planet's habitability and shows how America's climate war sends shock waves from Bali to Copenhagen No other reporter enjoys such access to this cast of characters No other book covers this terrain From the trenches of a North Carolina power plant to the battlefields of Capitol Hill Madison Avenue and Wall Street *The Climate War* is the essential read for anyone who wants to understand the players and politics behind the most important issue we face today

Don't Even Think About It George Marshall, 2014-08-19 An Esquire Essential Book on Climate Change From the founder of the Climate Outreach and Information Network a groundbreaking take on the most urgent question of our time Why despite overwhelming scientific evidence do we still ignore climate change Please read this book and think about it Bill Nye Most of us recognize that climate change is real and yet we do nothing to stop it What is this psychological mechanism that allows us to know something is true but act as if it is not George Marshall's search for the answers brings him face to face with Nobel Prize winning psychologists and the activists of the Texas Tea Party the world's leading climate scientists and the people who denounce them liberal environmentalists and conservative evangelicals What he discovered is that our values assumptions and prejudices can take on lives of their own gaining authority as they are shared dividing people in their wake With engaging stories and drawing on years of his own research Marshall argues that the answers do not lie in the things that make us different and drive us apart but rather in what we all share how our human brains are wired our evolutionary origins our perceptions of threats our cognitive blindspots our love of storytelling our fear of death and our deepest instincts to defend our family and tribe Once we understand what excites threatens and motivates us we can rethink and reimagine climate change for it is not an impossible problem Rather it is one we can halt if we can make it our common purpose and common ground Silence and inaction are the most persuasive of narratives so we need to change the story In the end *Don't Even Think About It* is both about climate change and about the qualities that make us human and how we can grow as we deal with the greatest challenge we have ever faced

The New Climate War Michael E. Mann, 2021-01-12 Shortlisted for the FT McKinsey Business Book of the Year award A renowned climate scientist shows how fossil fuel companies have waged a thirty year campaign to deflect blame and responsibility and delay action on climate change and offers a battle plan for how we can save the planet Recycle Fly less Eat less meat These are some of the ways

that we've been told can slow climate change. But the inordinate emphasis on individual behavior is the result of a marketing campaign that has succeeded in placing the responsibility for fixing climate change squarely on the shoulders of individuals. Fossil fuel companies have followed the example of other industries deflecting blame: think guns don't kill people, people kill people, or greenwashing: think of the beverage industry's Crying Indian commercials of the 1970s. Meanwhile, they've blocked efforts to regulate or price carbon emissions, run PR campaigns aimed at discrediting viable alternatives, and have abdicated their responsibility in fixing the problem they've created. The result has been disastrous for our planet. In *The New Climate War*, Mann argues that all is not lost. He draws the battle lines between the people and the polluters: fossil fuel companies, right-wing plutocrats, and petrostates. And he outlines a plan for forcing our governments and corporations to wake up and make real change, including a common-sense, attainable approach to carbon pricing and a revision of the well-intentioned but flawed, currently proposed version of the Green New Deal. Allowing renewable energy to compete fairly against fossil fuels. Debunking the false narratives and arguments that have worked their way into the climate debate and driven a wedge between even those who support climate change solutions. Combatting climate doomism and despair mongering. With immensely powerful, vested interests aligned in defense of the fossil fuel status quo, the societal tipping point won't happen without the active participation of citizens everywhere, aiding in the collective push forward. This book will reach, inform, and enable citizens everywhere to join this battle for our planet.

Now Or Never Tim Fridolf Flannery, 2009. Offers a powerful argument for immediate action on climate change, discussing issues ranging from balancing energy demands and food supply in India and China to the possibility of a viable electric car that could spell the end of big oil.
