Why Women Don't Ask Linda Babcock,Sara Laschever,2008 Did you know that by neglecting to negotiate her starting salary for her first job a woman may sacrifice over a half a million pounds in earnings by the end of her career Yet as research reveals men are four times as likely to ask for higher pay than are women with the same qualifications In this eye opening book Linda Babcock and Sara Laschever draw on research in psychology sociology economics and organisational behaviour as well as dozens of interviews to explore the personal and societal reasons women seldom ask for what they need want and deserve at work and at home Women Don t Ask a sensation when published in the US in 2003 is a call to arms that will help you recognise the ways in which our culture perpetuates inequalities and how you can begin to overcome them

Women Don't Ask Linda Babcock,2003 By looking at the barriers holding women back and the social forces constraining them this book shows women how to reframe their interactions and more accurately evaluate their opportunities It teaches them how to ask for what they want in ways that feel comfortable and possible taking into account the impact of asking on their relationships It teaches all of us how to recognize the ways in which our institutions child rearing practices and unspoken assumptions perpetuate inequalities that are not only fundamentally unfair but also inefficient and economically unsound Drawing on research in psychology sociology economics and organizational behavior as well as dozens of interviews with men and women from all walks of life this is the first book to identify the dramatic difference between men and women in their propensity to negotiate for what they want It tells women how to ask and why they should

Negotiating at Work Deborah M. Kolb, Jessica L. Porter, 2015-01-06 Understand the context of negotiations to achieve better results Negotiation has always been at the heart of solving problems at work Yet today when people in organizations are asked to do more with less be responsive 24/7 and manage in rapidly changing environments negotiation is more essential than ever What has been missed in much of the literature of the past 30 years is that negotiations in organizations always take place within a context of organizational culture of prior negotiations of power relationships that dictates which issues are negotiable and by whom When we negotiate for new opportunities or increased flexibility we never do it in a vacuum We challenge the status quo and we build out the path for others to negotiate those issues after us In this way negotiating for ourselves at work can create small wins that can grow into something bigger for ourselves and our organizations Seen in this way negotiation becomes a tool for addressing ineffective practices and outdated assumptions and for creating change *Negotiating at Work* offers practical advice for managing your own workplace negotiations how to get opportunities promotions flexibility buy in support and credit for your work It does so within the context of organizational dynamics recognizing that to negotiate with someone who has more power adds a level of complexity The is true when we negotiate with our superiors and also true for individuals currently under represented in senior leadership roles whose managers may not recognize certain issues as barriers or obstacles *Negotiating at Work* is rooted in real life cases of professionals from a wide range of industries and organizations both national and international Strategies to get the other person to the table and engage in creative problem solving even when they are reluctant to do so Tips on how to recognize opportunities to negotiate bolster your confidence prior to the negotiation turn asks into a negotiation and advance negotiations that get stuck A rich examination of research on negotiation conflict management and gender By using these strategies you can negotiate successfully for your job and your career in a larger field you can also alter organizational practices and policies that impact others **Don't Forget Your Keys** B. across the field of psychology This volume is a crucial interdisciplinary investigation into the variety of perspectives and approaches to the psychology of competition facilitating new research and integration in the field **Friend & Foe** Adam Galinsky, Maurice Schweitzer, 2015-09-29 What does it take to succeed This question has fueled a long running debate Some have argued that humans are fundamentally competitive and that pursuing self interest is the best way to get ahead Others claim that humans are born to cooperate and that we are most successful when we collaborate with others In FRIEND AND FOE researchers Galinsky and Schweitzer explain why this debate misses the mark Rather than being hardwired to compete or cooperate we have evolved to do both In every relationship from co workers to friends to spouses to siblings we are both friends and foes It is only by learning how to strike the right balance between these two forces that we can improve our long term relationships and get more of what we want Here Galinsky and Schweitzer draw on original cutting edge research from their own labs and from across the social sciences as well as vivid real world examples to show how to maximize success in work and in life by deftly navigating the tension between cooperation and competition They offer insights and advice ranging from how to gain power and keep it how to build trust and repair trust once it s broken how to diffuse workplace conflict and bias how to find the right comparisons to motivate us and make us happier and how to succeed in negotiations ensuring that we achieve our own goals and satisfy those of our counterparts Along the way they pose and offer surprising answers to a number of perplexing puzzles when does too much talent undermine success why can acting less competently gain you status and authority where do many gender differences in the workplace really come from how can you use deception to build trust and why do you want to go last on American Idol and in many interview situations but make the first offer when negotiating the sale of a new car We perform at our very best when we hold cooperation and competition in the right balance This book is a guide for navigating our social and professional worlds by learning when to cooperate as a friend and when to compete as a foe and how to be better at both **Nevertheless, She Persisted** Pratima Rao Gluckman, 2018-04-17 It is no secret that the technical world is a male dominated space From the cultural belief that Computer Science is a subject for boys to the assumptions and discrimination women experience in the field it can be challenging for women at every stage to thrive in tech careers Nevertheless some high performing women persist and succeed as leaders in tech despite the gender biases pitted against them Pratima Rao Gluckman a female leader in tech herself embarked on a project to collect stories of the leadership journeys of such women She wanted to know the details of these women s stories and how they accomplished their achievements What influenced them during their childhoods Who were their mentors What successes and failures did they experience What magical ingredients helped them thrive in a male dominated industry These questions and more inspired Gluckman to interview nineteen women leaders in several levels of technology industry including VPs CEOs and directors all of which are collected in this groundbreaking book Nevertheless She Persisted Whether you are a young woman thinking of a career in software a middle career or executive woman a parent or a man curious about the role gender plays in

tech this book reveals the secrets successes and hidden struggles that women have endured to become both highly accomplished in their technical skills and effective senior leaders in their organizations Their stories are illuminating intended to inspire generations of women and help free our society from the limiting belief that ability is somehow linked to gender Glass Ceilings and Ivory Towers Rachael Johnstone,Bessma Momani,2024-05-01 Even as Canadian universities suggest their gender issues have largely been resolved many women in academia tell a different story Systemic discrimination the underrepresentation of women in more senior and lucrative roles and the belief that gender related concerns will simply self correct with greater representation add up to a serious gender problem Although these issues are widely acknowledged reliable data is elusive Glass Ceilings and Ivory Towers fills this research gap with a cross disciplinary data driven investigation of gender inequality in Canadian universities Research presented in this book reveals for example that women are more likely to hold sessional teaching positions and to face difficulties obtaining funding They are also poorly represented at the upper echelons of the professoriate and must contend with a gender pay gap that widens as they move up the ranks Contributors consider the daily grind of academic life social structural and systemic challenges and the gendered dynamics of university leadership all with an eye to laying the groundwork for practical and meaningful institutional change

THE INTELLIGENCE OF MACHINES Patrick K. Kalifungwa, 2024-11-13 In a 1951 lecture Turing Alan 1951 Turing argued It seems probable that once the machine thinking method had started it would not take long to outstrip our feeble powers There would be no question of the machines dying and they would be able to converse with each other to sharpen their wits At some stage therefore we should have to expect the machines to take control in the way that is mentioned in Samuel Butler's Erewhon Also in a lecture broadcast on the BBC Turing Alan 1951 He expressed the opinion If a machine can think it might think more intelligently than we do and then where should we be Even if we could keep the machines in a subservient position for instance by turning off the power at strategic moments we should as a species feel greatly humbled This new danger is certainly something which can give us anxiety as interpreted by Seth Baum Hubert Dreyfus writes In general by accepting the fundamental assumptions that the nervous system is part of the physical world and that all physical processes can be described in a mathematical formalism which can in turn be manipulated by a digital computer one can arrive at the strong claim that the behavior which results from human information processing whether directly formalizable or not can always be indirectly reproduced on a digital machine Dreyfus 1972 John Searle writes Could a man made machine think Assuming it possible produce artificially a machine with a nervous system the answer to the question seems to be obviously yes Could a digital computer think If by digital computer you mean anything at all that has a level of description where it can be correctly described as the instantiation of a computer program then again the answer is of course yes since we are the instantiations of any number of computer programs and we can think Searle 1980
