Whos Who On The Moon A Biographical Dictionary Of Lunar Nomenclature:

Who's Who on the Moon Elijah E. Cocks, Josiah C. Cocks, 2009-01-01 **The Women of the Moon** Daniel R. Altschuler, Fernando J. Ballesteros, 2019-07-04 Philosophers and poets in times past tried to figure out why the stainless moon smoothly polished like a diamond in Dante's words had stains The agreed solution was that like a mirror it reflected the imperfect Earth Today we smile but it was a clever way to understand the Moon in a manner that was consistent with the beliefs of their age The Moon is no longer the thing We see it as often as the Sun and give it little thought we've become indifferent However the Moon does reflect more than just sunlight The Moon or more precisely the nomenclature of lunar craters still holds up a mirror to an important aspect of human history Of the 1586 craters that have been named honoring philosophers and scientists only 28 honor a woman These 28 women of the Moon present us with an opportunity to meditate on this gap but perhaps more significantly they offer us an opportunity to talk about their lives mostly unknown today

Dante Alighieri, *Galileo's Planet* Thomas A Hockey, 2020-11-26 Since the earliest times one of the brightest lights in the heavens has been that of Jupiter mythical king of the gods and the largest planet in the solar system It was only natural that peoples from the dawn of history would be interested in such a planet and indeed Jupiter was one of the first objects to be observed with the telescope Even today Jupiter captures the public interest like no other planet a vast gaseous world home to violent storms larger than the Earth that have raged for centuries Galileo's Planet Observing Jupiter before Photography presents the history of humankind's quest to understand the giant planet in the era before photography a time when the only way to observe the universe was with the human eye The book provides a comprehensive and fascinating account of the people involved in this quest their observations and the results of their findings Many of the planetary features studied in detail by today's space probes were once glimpsed by keen-eyed amateur astronomers These Earth-bound explorers made up for their modest instruments and viewing conditions with their patience perseverance and passion for the night sky Their greatest challenge was the fifth planet from the Sun and the search for its imagined surface a revelation of the real Jupiter In the process these part-time observers redefined the meaning of the word planet The book recounts their story from the earliest times right up until the invention of the camera **ARBA Guide to Biographical Resources,**

1986-1997 Robert L. Wick, Terry Ann Mood, 1998 This single source guide to selected biographical dictionaries and directories covers the entire spectrum of biographical sources serial and nonserial that have been published in the last ten years In each entry the book gives complete bibliographic information along with price and a critical evaluation Most entries have been selected from American Reference Books Annual ARBA between 1986 and 1997 Organized in two broad categories International and National Biographies and Biographies in Professional Fields listings are also easily accessed through detailed author title and subject indexes This work will be valuable to reference librarians researchers and others who require information on the lives of individuals from all fields of study and all time periods and of particular use to those
