Rationalities in History D. L. d'Avray,2010-09-23 In Rationalities in History the distinguished historian David d Avray writes a new comparative history in the spirit of Max Weber In a strikingly original reassessment of seminal Weberian ideas d Avray applies value rationality to the comparative history of religion and the philosophy of law Integrating theories of rational choice anthropological reflections on relativism and the recent philosophy of rationality with Weber s conceptual framework d Avray seeks to disengage rationalisation from its enduring association with Western modernity This mode of analysis is contextualised through the examples of Buddhism Imperial China and sixteenth century Catholicism in the latter case building upon unpublished archival research This ambitious synthesis of social theory and comparative history will engage social scientists and historians from advanced undergraduate level upwards stimulating interdisciplinary discourse and making a significant contribution to the methodology of history D Avray explores the potential of this new Weberian analysis further in his companion volume Medieval Religious Rationalities

modern theories of aesthetics and religion in the Enlightenment He then outlines the role of aesthetics in the theories of religion proposed by Otto Eliade van der Leeuw and Tillich in the cultural anthropology of Geertz and in the thought of Santayana Dewey Whitehead Heidegger and Wittgenstein In a global context Martin explores the relation of aesthetic theory to religious thought in the traditions of India China and Japan and concludes with reflections on the viability of modern aesthetic and religious theory in the light of contemporary cultural and methodological pluralism Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Comparative Essays in Early Greek and

Chinese Rational Thinking Jean-Paul Reding, 2017-03-02 This collection of essays by Reding in the emergent field of Sino Hellenic studies explores the neglected inchoative strains of rational thought in ancient China and compares them to similar themes in ancient Greek thought right at the beginnings of philosophy in both cultures Reding develops and defends the bold hypothesis that Greek and Chinese rational thinking are one and the same phenomenon Rather than stressing the extreme differences between these two cultures as most other writings on these subjects Reding looks for the parameters that have to be restored to see the similarities Reding maintains that philosophy is like an unknown continent discovered simultaneously in both China and Greece but from different starting points The book comprises seven essays moving thematically from conceptual analysis logic and categories to epistemology and ontology with an incursion in the field of comparative metaphorology One of the book's main concerns is a systematic examination of the problem of linguistic relativism through many detailed examples

Values of Our Times Deshun Li, 2013-06-01 Philosophers have gradually accepted axiology as one branch of philosophy As a basic category belonging to axiology and philosophy value is the general abstraction of concrete value formation in various fields including utility ethics and appreciation of the beauty The problem of value is essentially a problem of historical activities of practice in human society The axiology based on the scientific practice view insists on the principle of unification between theory and practice truth and value In research of axiology the relation between subjectivity and objectivity of values is a problem that must be solved in the first place The modern conversation of value philosophy is the academic and practical demands of the value philosophy research in China Value evaluation is an important part of the axiology In order to deepen the research of value philosophy and to promote the development of current value philosophy we must have scientific mode of thinking suitable for the nature of value It is the base of value relation the origin of value needs the process of value creation and actualization and the fundamental way to proving one's value as a human being

Theories of Truth in Chinese Philosophy

Alexus McLeod, 2015-12-01 *Theories of Truth in Chinese Philosophy* deals with debates surrounding the concept of truth in early Chinese thought from the earliest periods through to the Han dynasty. Alexis McLeod focuses first on the question of whether there is a concept of truth in early Chinese thought, giving a critical overview of the positions of contemporary scholars on this issue, outlining their arguments and considering objections and possible problems and alternatives. McLeod then goes on to consider a number of possible theories of truth in early Chinese philosophy, giving an overview of what he takes to be the main contenders for truth concepts in the early material and surrounding concepts and positions. In addition, the author considers how these theories of truth might be relevant in contemporary debates surrounding truth as well as in the context of theories of truth in the history of philosophy, both in Western and Indian thought.

East Meets West Daniel A. Bell, 2000-05-08 Is liberal democracy a universal ideal? Proponents of Asian values argue that it is a distinctive product of the Western experience and that Western powers shouldn't try to push human rights and democracy onto Asian states. Liberal democrats in the West typically counter by questioning the motives of Asian critics, arguing that Asian leaders are merely trying to rationalize human rights violations and authoritarian rule. In this book, written as a dialogue between an American democrat named Demo and three East Asian critics, Daniel A. Bell attempts to chart a middle ground between the extremes of the international debate on human rights and democracy. Bell criticizes the use of Asian values to justify oppression but also draws on East Asian cultural traditions and contributions by contemporary intellectuals in East Asia to identify some powerful challenges to Western style liberal democracy. In the first part of the book, Bell makes use of colorful stories and examples to show that there is a need to take into account East Asian perspectives on human rights and democracy. The second part is a fictitious dialogue between Demo and Asian senior statesman Lee Kuan Yew, examining the pros and cons of implementing Western style democracy in Singapore. The third part of the book is an argument for an as yet unrealized Confucian political institution that justifiably differs from Western style liberal democracy. This is a thought provoking defense of distinctively East Asian challenges to Western style liberal democracy that will stimulate interest and debate among students of political theory, Asian studies, and international human rights.

Epistemological Issues in Classical Chinese Philosophy Hans Lenk, Gregor Paul, 1993-01-01 This book shows that classic Chinese philosophy is as rational as Western approaches dealing with the problems of logic, epistemology, language analysis, and linguistic topics from a philosophical point of view. It presents detailed analyses of rational and methodological features in Confucianism, Taoist philosophy, and the School of Names, as well as Mohist approaches in classical Chinese philosophy, especially in regard to ideas of valid knowledge. The authors also provide new arguments against cultural relativism and antirational movements like religious fundamentalism that do not pay due attention to what all human beings have in common to cultural universals.
