Why Religion is Natural and Science is Not Robert N. McCauley, 2011-11-01 A comparison of the cognitive foundations of religion and science and an argument that religion is cognitively natural and that science is cognitively unnatural **An Introduction to the Cognitive Science of Religion** Claire White, 2021-03-14 In recent decades a new scientific approach to understand explain and predict many features of religion has emerged The cognitive science of religion CSR has amassed research on the forces that shape the tendency for humans to be religious and on what forms belief takes It suggests that religion like language or music naturally emerges in humans with tractable similarities This new approach has profound implications for how we understand religion including why it appears so easily and why people are willing to fight and die for it Yet it is not without its critics and some fear that scholars are explaining the ineffable mystery of religion away or showing that religion is natural proves or disproves the existence of God An Introduction to the Cognitive Science of Religion offers students and general readers an accessible introduction to the approach providing an overview of key findings and the debates that shape it The volume includes a glossary of key terms and each chapter includes suggestions for further thought and further reading as well as chapter summaries highlighting key points This book is an indispensable resource for introductory courses on religion and a much needed option for advanced courses Religious Diversity Roger Trigg, 2014-04-21 Religious Diversity examines whether believing in a religion's truth increases intolerance and how the existence and growth of multiple religions affects political societies The Natural Method Eddy Nahmias, Thomas W. Polger, Wenqing Zhao, 2020-08-04 Prominent philosophers explore themes in the work of Owen Flanagan focusing on debates about the nature of mind the self and morality Owen Flanagan's work offers a model for how to be a naturalistic and scientifically informed philosopher who writes beautifully and deeply about topics as varied as consciousness and Buddhism moral psychology and dreaming identity and addiction literature and neuroscience In this volume leading philosophers Flanagan's friends colleagues and former students explore themes in his work focusing on debates over the nature of mind the self and morality Some contributors address Flanagan's work directly others are inspired by his work or methodology Their essays are variously penetrating and synoptic cautious and speculative The contributors offer proposals for productive interdisciplinary research exploring consciousness personhood religious cognition mental disorders addiction the narrative self virtue the social sciences forgiveness and comparative philosophy The authors share a commitment to virtues exemplified in Flanagan's work interdisciplinary inquiry an optimistic temperament and a willingness to change one's mind Contributors Jack Bauer Patricia S Churchland Peggy DesAutels George Graham Philip J Ivanhoe Alasdair MacIntyre Robert N McCauley Eddy Nahmias Thomas W Polger Galen Strawson erife Tekin Robert Van Gulick David B Wong Wenqing Zhao *Arguing from Cognitive Science of Religion* Hans Van Eyghen, 2020-04-02 This book considers whether recent theories from Cognitive Science of Religion CSR undermine the epistemic status of religious belief After introducing the key theories

in the growing area of CSR Hans Van Eyghen explores some of the epistemic questions surrounding CSR including Is CSR incompatible with the truth of religious belief How might CSR show that religious belief is unreliably formed And finally does CSR undermine the justification of religious belief by religious experiences In addressing these questions he demonstrates how CSR does not undermine the epistemic bases for religious belief This book offers a clear and concise overview of the current state of cognitive science of religion and will be of particular interest to scholars working in philosophy and epistemology of religion

The Intelligent Design Debate and the Temptation of Scientism Erkki Vesa Rope Kojonen,2016-04-28 The controversy over Intelligent Design ID has now continued for over two decades with no signs of ending For its defenders ID is revolutionary new science and its opposition is merely ideological For its critics ID is both bad science and bad theology But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides A balanced and deep analysis of a controversial debate this volume argues that beliefs about the purposiveness or non purposiveness of nature should not be based merely on science Rather the philosophical and theological nature of such questions should be openly acknowledged

The Religion of the Mithras Cult in the Roman Empire Roger Beck,2006-01-12 A study of the religious system of Mithraism one of the mystery cults popular in the Roman Empire contemporary with early Christianity Mithraism is described from the point of view of the initiate engaging with its rich repertoire of symbols and practices

Natural science and religion, 2 lectures Asa Gray,1880 Is Religion Natural? Dirk Evers,Michael Fuller,Antje Jackelen,Taede Smedes,2012-10-06 An exploration of the relationship between evolutionary psychology naturalism and theological reflections published by ESSSAT the European Society for the Study of Science and Theology

Finding Answers History! Religion! Science! Pauline Schiappa,2018-04-28 A mysterious and tremendous thing comes to reveal itself in the course of the lifetime of an earthly human So mysteriously confronted by it the earthly human becomes awed by this compelling human attribute The earthly human becomes so enraptured by it that he begins to consider it as a quality that defines and explains his human nature The earthly human desires to know the earthly human desires to understand that which his physical body sense experiences of earthly reality The earthly human holds so much psychological and intellectual desire toward knowing it that he gives it a nametruth How does the earthly human discover truth

Natural Science ,1896 Science vs. Religion Elaine Howard Ecklund,2010-05-06 That the longstanding antagonism between science and religion is irreconcilable has been taken for granted And in the wake of recent controversies over teaching intelligent design and the ethics of stem cell research the divide seems as unbridgeable as ever In Science vs Religion Elaine Howard Ecklund investigates this unexamined assumption in the first systematic study of what scientists actually think and feel about religion In the course of her research Ecklund surveyed nearly 1 700 scientists and interviewed 275 of them She finds that most of what we believe about the faith lives of elite scientists is wrong Nearly 50 percent of them are religious Many others are what she calls spiritual entrepreneurs seeking creative ways to work with the

tensions between science and faith outside the constraints of traditional religion The book centers around vivid portraits of 10 representative men and women working in the natural and social sciences at top American research universities Ecklund's respondents run the gamut from Margaret a chemist who teaches a Sunday school class to Arik a physicist who chose not to believe in God well before he decided to become a scientist Only a small minority are actively hostile to religion Ecklund reveals how scientists believers and skeptics alike are struggling to engage the increasing number of religious students in their classrooms and argues that many scientists are searching for boundary pioneers to cross the picket lines separating science and religion With broad implications for education science funding and the thorny ethical questions surrounding stem cell research cloning and other cutting edge scientific endeavors *Science vs Religion* brings a welcome dose of reality to the science and religion debates

Science and Faith within Reason Jaume Navarro, 2016-04-01 Scientists historians philosophers and theologians often engage in debates on the limitations and mutual interactions of their respective fields of study Serious discussions are often overshadowed by the mass produced popular and semi popular literature on science and religion as well as by the political agendas of many of the actors in these debates For some reducing religion and science to forms of social discourse is a possible way out from epistemological overlapping between them yet is there room for religious faith only when science dissolves into one form of social discourse The religion thus rescued would have neither rational legitimisation nor metaphysical validity but if both scientific and religious theories try to make absolute claims on all possible aspects of reality then conflict between them seems almost inevitable In this book leading authors in the field of science and religion including William Carroll Steve Fuller Karl Giberson and Roger Trigg highlight the oft neglected and profound philosophical foundations that underlie some of the most frequent questions at the boundary between science and religion the reality of knowledge and the notions of creation life and design In tune with Mariano Artigas's work the authors emphasise that these are neither religious nor scientific but serious philosophical questions

The American Jewish Chronicle, 1918 *The Ottawa Naturalist*, 1889 **The Religion and Science Debate** Harold W. Attridge, 2009-09-01 Eighty one years after America witnessed the Scopes trial over the teaching of evolution in public schools the debate between science and religion continues In this book scholars from a variety of disciplines sociology history science and theology provide new insights into the contemporary dialogue as well as some perspective suggestions for delineating the responsibilities of both the scientific and religious spheres Why does the tension between science and religion continue How have those tensions changed during the past one hundred years How have those tensions impacted the public debate about so called intelligent design as a scientific alternative to evolution With wit and wisdom the authors address the conflict from its philosophical roots to its manifestations within American culture In doing so they take an important step toward creating a society that reconciles scientific inquiry with the human spirit This book which marks the one hundredth anniversary of The Terry Lecture Series offers a unique perspective for anyone interested in the debate between science and religion in America

The Science of Religion: A Defence Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies. The Science of Religion: A Defence offers a brilliant overview of Professor Wiebe's contributions on methodology in the academic study of religion, of the development of his thinking over time, and of his intellectual commitment to a science of religion. The work is divided into three parts. The first part identifies pertinent connections between religion, religious studies, and science, and why reductionism in the academic study of religion, when properly applied, can bridge the explanatory gap between the sceptic and the devotee. The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief, understanding, and meaning in the modern study of religion. The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome. Finally, two new essays are included: a critique on The Preconceptions of a Science of Religion by Anthony J. Palma and an accompanying reply by Donald Wiebe. The Science of Religion: A Defence is an essential resource for both scholarly and non-scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion.

Introduction to the Science of Religion Friedrich Max Müller, 1870 Oracles of Science Karl Giberson, Mariano Artigas, 2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science, how it works, and how it relates to other fields of human endeavor, especially religion. Biologists Stephen Jay Gould, Richard Dawkins, and Edward O. Wilson, and physicists Carl Sagan, Stephen Hawking, and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview. The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science. Their controversial, often personal, sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative. Curiously, the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community. Many of them are even hostile to religion, creating a false impression that science as a whole is incompatible with religion. Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists, carefully distinguishing science from philosophy and religion in the writings of the oracles. This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion, and will challenge others to reexamine their own preconceptions about this crucial topic.

Knowledge and Evolution Michael Chaberek, 2021-08-31 The question of the origins of the universe is probably one of the most dwelled upon and argued about over the last couple of centuries. Ever since Charles Darwin proposed his theory, evolutionists and creationists want to settle the issue on their sides. But science did not stop at Darwin's time. It progressed enormously, creating significant problems for Darwinian explanations. Is there a better answer than the dominant neo-Darwinian synthesis? Even more fundamental is the question of whether natural science, by

itself can explain the origins of nature What are the limits of science and where should we turn to philosophy and theology How do these three domains science philosophy and theology relate when addressing the question of origins Theistic evolution the idea of God using evolution as a means of creating the universe faces problems from both classic Christian theology as well as classic metaphysics Today things do not look good for the dominant views The time has come to propose a new faith and science synthesis one that offers a serious approach to the Bible on the one hand and an honest look at biological findings on the other This book sets a path to such a new synthesis
