The Protection of Community Interests in the International Law of State Responsibility Julia Lemke, 2025-04-29 This book redefines the traditional understanding of state responsibility It presents a compelling argument that international law s effectiveness hinges on its ability to protect not only state interests but also those of the global community Drawing from principles established in the Articles on the Responsibility of States for Internationally Wrongful Acts ARSIWA the book examines how states conceptualised as rational actors navigate collective action challenges Through a law and economics lens it sheds light on the role of international state responsibility in providing global public goods and safeguarding common pool resources This interdisciplinary book offers valuable insights and normative suggestions for enhancing the ARSIWA s efficacy in promoting community interests It will appeal to scholars and practitioners in public international law law and economics and international relations interested in a better understanding of international law s role in tackling pressing global issues

Constructing Global Public Goods James C. Roberts, 2019-05-23 Why do international actors provide global public goods when they could free ride on the production of others Constructing Global Public Goods examines this question by understanding the identities and preferences of the actors Most rational choice models of public goods explain the public goods decision by examining the strategic interactions among the actors They generally avoid the question of how utilities and preferences are formed Constructing Global Public Goods brings a constructivist approach to the study of public goods

by recognizing that the actors utilities and preferences are socially constructed from the identities the actors take on in the choice situation The book develops a formal model that links the interpretation of unobserved utilities to preferences for the public goods outcome It then applies the model to case studies on global monetary management collective security and protecting human rights Bringing constructivism into the public goods decision allows the analysis to look beyond the limited Prisoner s Dilemma based model of most rational choice approaches and recognizes that the decision whether or not to produce a global public good is a complex web of social political and cultural factors

The EU as a Global Regulator for Environmental Protection Ioanna Hadjiyianni, 2019-08-08 This book critically examines the extension of EU environmental legislation beyond EU borders through measures that determine access to the single market on the basis of processes that take place in third countries It makes a timely contribution to political debates about the relations between EU and non EU countries and the Union s role in the global governance of environmental policy where it has been considered a global leader The book aims to identify and explain the emerging legal phenomenon of internal environmental measures with extraterritorial implications as an important manifestation of EU global regulatory power and assesses the extraterritorial reach of EU environmental law from a legitimacy perspective It examines mechanisms that can bolster its legitimacy focusing on the legal orders of the EU and the World Trade Organization which are key legal fora for controlling the EU s global regulatory power

Problems, Promises, and Paradoxes of Aid J. Oloka-Onyango, Nicolas van de Walle, 2014-11-10 This book is an anthology of essays contributing new scholarship to the contemporary discourse on the concept of aid It provides an interdisciplinary investigation of the role of aid in African development compiling the work of historians political scientists legal scholars and economists to examine where aid has failed and to offer new perspectives on how aid can be made more effective Questions regarding the effectiveness of aid are addressed here using specific case studies The question of ownership is examined in the context of two debates 1 to what extent should aid be designed by the recipient country itself and 2 should aid focus on need or performance That is should donors direct aid to the poorest countries regardless of their policies and governance or should aid reward countries for doing the right thing The future of aid is also addressed should aid continue to be a part of the development agenda for countries in sub Saharan Africa If so how much and what type of aid is needed and how it can be made most effective The major criticism against aid is that it cripples the recipient country s economic growth by turning it into a passive receiver in addition it has been noted that aid is mostly supply driven depending upon donors rather than the actual needs of recipients For this reason aid may not meet the goals for which it was intended To meet the needs of the communities they want to help donors should work through consultation and a measure of recipient ownership Donors need to understand context to protect human rights and to be guided by principles of social and environmental justice Other suggested strategies for making aid more effective include peer review self assessment the empowerment of women encouraging accountability investing in agriculture helping smallholder subsistence farmers

justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for sharing innovating solutions and strategies for effective and essential global governance

Global Governance and Development José Antonio Ocampo, 2016 This volume examines the dialogue around global public goods and development cooperation It asks how will international cooperation and development institutions be changed How can we make sure that these global initiatives and institutions are innovating for the better Higher Realism Seyom Brown, 2015-12-22 For dealing with an increasingly chaotic and violence prone world Higher Realism offers a grand

strategy that rejects the imperial thrust of recent U S foreign policy as well as the conventional realist approach of focusing only on U S interests The emerging world order is one in which many powers of various sorts states and nonstate actors large and small allies and adversaries have an essential role Seyom Brown calls this the emergent international polyarchy and argues that neither the assertive interventionism of the neoconservatives nor the cool nonideological geopolitics of the conventional realists is the appropriate response Instead responsive to how U S interests have become inextricably bound up with world interests Brown proposes a foreign policy of higher realism centered on cooperation to ensure the security and well being of all Brown defines and analyzes those common interests in the environment peace and security health and economic vitality human rights and democracy and transnational accountability He faults the arrogant assumption that what is good for the United States is ipso facto good for the world insisting rather that U S policies for global development must respect religious and cultural diversity Brown s approach transcends the traditional dichotomies of realism versus idealism and self interest versus altruistic morality The recommended programs and policies are designed to help a new U S presidential administration reformulate a foreign policy that will ensure national security and promote international well being higher realism in philosophy and practice
