

VINCE ANDERSON Maximum Velocity Drill (also known as the "rocket drill") - Progressive Spacing Chart

200026

NOTE: THIS IS NOT FOR APPLICATIONS OF **THE SOLIDIFICATION CHART** / DIRECTIONS: All numbers on feet x all inches (24", 37", 2") = Feet x inches (such as 20x24). Each line of numbers refers to progressively spaced rows of 8" handles (1 to 8 on 1 handle), etc. For the best result, it is strongly recommended to photograph a 5 inch margin to the outside.

HOW TO SET THE RISE-UP: Logic states that the rise is made over the first handle (28 to 37) is exactly the same length as the space between the first two handles (21 and 32), etc. So with ground contact midway between the first two handles. (Example: If the space between the first two handles is 3' 4", then the stride over the first handle is also 3' 4". To be safe for the first over handle stride count for 28" before handle 2 and two follows a 28" after handle 2 (one handle x 28 inches). There are even **link ends of the chart** to mark the entry over a step in even numbers (5, 10, 2, 1, 0), by infusing each stride by 2 inches (5' 4", 5' 2", 4' 10", etc.). Show how! Artists should fill every row in stride on a marked ground surface should be midway between the markers, not close to them. Graphically, the marks for the "rocket" look like the diagram below (see also the **video**): 8 handles

Table with columns for distance (e.g., 10, 12, 14, 16, 18, 20, 22, 24, 26, 28) and rows of numerical data representing stride patterns for different velocities.
