Women and Poverty in 21st Century America Paula vW. Dáil,2011-12-22 Despite an overhaul in the 1990s the American welfare system remains with a business model focused on the bottom line Crafted by male dominated legislative bodies whose members most likely never had to choose between paying the rent or feeding their kids established policies primarily protect the popular programs that ensure politicians re election This book offers a feminist perspective on the 21st century attitude toward poverty illustrated by the words of women forced to live every day with social policies they had no voice in developing Topics include the struggles of daily life crime health care education employment and a discussion of capitalism inequality greed and moral obligation in a free society In the unrestrained pursuit of wealth this work shows that America has created a vast poverty problem making the rich richer and forcing the poor into a forgotten class We Rise to Resist Paula vW. Rugged Individualism and the Misunderstanding of American Inequality Lawrence M. Eppard, Mark Robert Rank, Heather E. Bullock, 2020-02-20 *Rugged Individualism and the Misunderstanding of American Inequality* explores and critiques the widespread perception in the United States that one's success or failure in life is largely the result of personal choices and individual characteristics As the authors show the distinctively individualist ideology of American politics and culture shapes attitudes toward poverty and economic inequality in profound ways fostering social policies that de-emphasize structural remedies Drawing on a variety of unique methodologies the book synthesizes data from large scale surveys of the American population and it features both conversations with academic experts and interviews with American citizens intimately familiar with the consequences of economic disadvantage This mixture of approaches gives readers a fuller understanding of skeptical altruism a concept the authors use to describe the American public's hesitancy to adopt a more robust and structurally oriented approach to solving the persistent problem of economic disadvantage Emerging Trends for EAPs in

Sociopolitics of Migrant Death and Repatriation Krista E. Latham, Alyson J. O'Daniel, 2017-10-03 As scholars have by now long contended global neoliberalism and the violence associated with state restructuring provide key frameworks for understanding flows of people across national boundaries and eventually into the treacherous terrains of the United States borderlands The proposed volume builds on this tradition of situating migration and migrant death within broad systems level frameworks of analysis but contends that there is another perhaps somewhat less tidy but no less important sociopolitical story to be told here Through examination of how forensic scientists define navigate and enact their work at the frontiers of US policy and economics this book joins a robust body of literature dedicated to bridging social theory with bioarchaeological applications to modern day problems This volume is based on deeply and critically reflective analyses submitted by individual scholars wherein they navigate and position themselves as social actors embedded within and perhaps partially constituted by relations of power cultural ideologies and the social structures characterizing this moment in history Each contribution addresses a different variation on themes of power relations production of knowledge and reflexivity in practice In sum however the chapters of this book trace relationships between institutions entities and individuals comprising the landscapes of migrant death and repatriation and considers their articulation with sociopolitical dynamics of the neoliberal state
