Andrew Selth,2016-11-03 For decades scholars have been trying to answer the question how was colonial Burma perceived in and by the Western world and how did people in countries like the United Kingdom and United States form their views This book explores how Western perceptions of Burma were influenced by the popular music of the day From the First Anglo Burmese War of 1824-6 until Burma regained its independence in 1948 more than 180 musical works with Burma related themes were written in English speaking countries in addition to the many hymns composed in and about Burma by Christian missionaries Servicemen posted to Burma added to the lexicon with marches and ditties and after 1913 most movies about Burma had their own distinctive scores Taking Rudyard Kipling's 1890 ballad Mandalay as a critical turning point this book surveys all these works with emphasis on popular songs and show tunes also looking at classical works ballet scores hymns soldiers songs sea shanties and film soundtracks It examines how they influenced Western perceptions of Burma and in turn reflected those views back to Western audiences The book sheds new light not only on the West's historical relationship with Burma and the colonial music scene but also Burma's place in the development of popular music and the rise of the global music industry In doing so it makes an original contribution to the fields of musicology and Asian Studies **Handbook of**

**Erosion Modelling** R. P. C. Morgan,Mark Nearing,2016-04-13 The movement of sediment and associated pollutants over the landscape and into water bodies is of increasing concern with respect to pollution control prevention of muddy floods and environmental protection In addition the loss of soil on site has implications for declining agricultural productivity loss of biodiversity and decreased amenity and landscape value The fate of sediment and the conservation of soil are important issues for land managers and decision makers In developing appropriate policies and solutions managers and researchers are

making greater use of erosion models to characterise the processes of erosion and their interaction with the landscape A study of erosion requires one to think in terms of microseconds to understand the mechanics of impact of a single raindrop on a soil surface while landscapes form over periods of thousands of years These processes operate on scales of millimetres for single raindrops to mega metres for continents Erosion modelling thus covers quite a lot of ground This book introduces the conceptual and mathematical frameworks used to formulate models of soil erosion and uses case studies to show how models are applied to a variety of purposes at a range of spatial and temporal scales The aim is to provide land managers and others with the tools required to select a model appropriate to the type and scale of erosion problem to show what users can expect in terms of accuracy of model predictions and to provide an appreciation of both the advantages and limitations of models Problems covered include those arising from agriculture the construction industry pollution and climatic change and range in scale from farms to small and large catchments The book will also be useful to students and research scientists as an up to date review of the state of art of erosion modelling and through a knowledge of how models are used in practice in highlighting the gaps in knowledge that need to be filled in order to develop even better models
