Zeventiendeeeuwse Geestesbloei:

Zeventiende eeuwse geestesbloei Cornelia W. Roldanus, 1961

Prophecy and Reason Andrew Cooper Fix, 2014-07-14

During the second half of the seventeenth century the entire intellectual framework of educated Europe underwent a radical transformation. A secularized view of humanity and nature was replacing faith in the direct operation of God's will in the temporal world while a growing confidence in human reason and the Scientific Revolution turned back the epistemological skepticism spawned by the Reformation. By focusing on the Dutch Collegiants, a radical Protestant group that flourished in Holland from 1620 to 1690, Andrew Fix explicates the mechanisms at work in this crucial intellectual transition from traditional to modern European worldview. Starting from Rijnsburg near Leiden, the Collegiants spread over the course of the century to every major Dutch city. At the same time, their thinking evolved from a millenarian spiritualism influenced heavily by the sixteenth-century Radical Reformation to a philosophical rationalism similar to the ideas of Spinoza. Fix has taken on an important topic in the history of ideas: the circumstances under which natural reason came to be accepted as an autonomous source of truth for the individual conscience. He also has fresh and concrete things to say about the relationship between religion and science in early modern European history. Originally published in 1990, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Handbook of Dutch Church History Herman J. Selderhuis, 2014-12-10

Herman Selderhuis, as editor of this volume, has brought together a team of experts resulting in a unique approach since each chapter is co-written by a Catholic and a Protestant author who have all integrated the latest research results. Each section begins with a brief historiographical overview. The same ecclesiastical events are always set within a greater framework of political, social, and cultural developments for which reason each author has taken the liberty to describe its own method. The user will find in this book tables, diagrams, and illustrations. Also, many source texts are integrated in the narration. These texts are intended to bring the described events and people closer to the reader and as it were to let them speak the words. The name of the book as *Handbook of the church history of the Netherlands* immediately brings to mind three problematic complexes which are relevant to its user. First, there is the nature of a handbook that is intended to be a good tool but also has its limitations; it stimulates and necessitates the use of further books. Second, the area The Netherlands is a plurality and that is also noticeable in its church history for each region, town, and village has its own church history. Third, the history of the church for sure is the most important aspect, but this history can only be understood if it is described in the context of political and social developments.
