Understanding Forest Disturbance and Spatial Pattern Michael A. Wulder, Steven E. Franklin, 2007 Understanding Forest Disturbance and Spatial Pattern Michael A. Wulder, Steven E. Franklin, 2006-07-27 Remote sensing and GIS are increasingly used as tools for monitoring and managing forests Remotely sensed and GIS data are now the data sources of choice for capturing documenting and understanding forest disturbance and landscape pattern Sitting astride the fields of ecology forestry and remote sensing GIS Understanding Forest Disturbance Object-Based Image Analysis Thomas Blaschke, Stefan Lang, Geoffrey Hay, 2008-08-09 This book brings together a collection of invited interdisciplinary perspectives on the recent topic of Object based Image Analysis OBIA Its content is based on select papers from the 1 OBIA International Conference held in Salzburg in July 2006 and is enriched by several invited chapters All submissions have passed through a blind peer review process resulting in what we believe is a timely volume of the highest scientific theoretical and technical standards The concept of OBIA first gained widespread interest within the GIScience Geographic Information Science community circa 2000 with the advent of the first commercial software for what was then termed object oriented image analysis However it is widely agreed that OBIA builds on older segmentation edge detection and classification concepts that have been used in remote sensing image analysis for several decades Nevertheless its emergence has provided a new critical bridge to spatial concepts applied in multiscale landscape analysis Geographic Information Systems GIS and the synergy between image objects and their radiometric characteristics and analyses in Earth Observation data EO **Contemporary Approaches in Urbanism and Heritage Studies** Rokhsaneh Rahbariyanazd , Editor, 2021-08-01 This book is an intellectual discourse and a concise compendium of current research in Architecture and Urbanism Primarily it is a book of readings of 24 chapters The book brings together theories manifestos and methodologies on contemporary architecture and urbanism to raise the understanding for the future of architecture and urban planning Overall the book aimed to establish a bridge between theory and practice in the built environment Thus it reports on the latest research findings and innovative approaches methodologies for creating assessing and understanding of contemporary built environment Global Perspectives on Sustainable Forest Management Dr. Clement A. Okia, 2012-04-25 This book is dedicated to global perspectives on sustainable forest management It focuses on a need to move away from purely protective management of forests to innovative approaches for multiple use and management of forest resources The book is divided into two sections the first section with thirteen chapters deals with the forest management aspects while the second section with five chapters is dedicated to forest utilization This book will fill the existing gaps in the knowledge about emerging perspectives on sustainable forest management It will be an interesting and helpful resource to managers specialists and students in the field of forestry and natural resources management *Integration of GIS and Remote Sensing* Victor Mesev, 2008-03-11 In an age of unprecedented proliferation of data from disparate sources the urgency is to create efficient methodologies that can

optimise data combinations and at the same time solve increasingly complex application problems Integration of GIS and Remote Sensing explores the tremendous potential that lies along the interface between GIS and remote sensing for activating interoperable databases and instigating information interchange It concentrates on the rigorous and meticulous aspects of analytical data matching and thematic compatibility the true roots of all branches of GIS remote sensing applications However closer harmonization is tempered by numerous technical and institutional issues including scale incompatibility measurement disparities and the inescapable notion that data from GIS and remote sensing essentially represent diametrically opposing conceptual views of reality The first part of the book defines and characterises GIS and remote sensing and presents the reader with an awareness of the many scale taxonomical and analytical problems when attempting integration The second part of the book moves on to demonstrate the benefits and costs of integration across a number of human and environmental applications This book is an invaluable reference for students and professionals dealing not only with GIS and remote sensing but also computer science civil engineering environmental science and urban planning within the academic governmental and commercial business sectors

Computers in Earth and Environmental Sciences Hamid Reza Pourghasemi, 2021-09-22 Computers in Earth and Environmental Sciences Artificial Intelligence and Advanced Technologies in Hazards and Risk Management addresses the need for a comprehensive book that focuses on multi hazard assessments natural and manmade hazards and risk management using new methods and technologies that employ GIS artificial intelligence spatial modeling machine learning tools and meta heuristic techniques The book is clearly organized into four parts that cover natural hazards environmental hazards advanced tools and technologies in risk management and future challenges in computer applications to hazards and risk management Researchers and professionals in Earth and Environmental Science who require the latest technologies and advances in hazards remote sensing geosciences spatial modeling and machine learning will find this book to be an invaluable source of information on the latest tools and technologies available Covers advanced tools and technologies in risk management of hazards in both the Earth and Environmental Sciences Details the benefits and applications of various technologies to assist researchers in choosing the most appropriate techniques for purpose Expansively covers specific future challenges in the use of computers in Earth and Environmental Science Includes case studies that detail the applications of the discussed technologies down to individual hazards
