just off the shores of the moneyed is a huge fast growing land of premium value which inspires people to get there even if they need to stretch their budget to reach it Premium by Design is a thoroughly researched well argued and well presented study that identifies how global business leaders have succeeded in achieving margins by design Thanks to original tools and processes this book shows how you might also succeed It is about better but reachable and real products and services The book features insights from the world of customer science and design research The key challenge for the world today is finding out how sustainable is the underlying process that is driving this apparent desire for more and more indulgent material possessiveness This book might not have all the answers but it will provoke and trigger a long overdue debate in the premium and image driven industries about tomorrow s values As a result it is a must read for anyone in this market or aspiring to it

"Ravanisation": The Revitalisation of Ravana among Sinhalese Buddhists in Post-War Sri Lanka Deborah de Koning,2022 This book discusses Ravanisation the revitalisation of Ravana among Sinhalese Buddhists in post war after 2009 Sri Lanka The Hindu Ramayana generally portrays Ravana as a cruel king How and why then has Ravana gained the interest of Sinhalese Buddhists This study takes an ethnographic perspective to answer these questions The book discusses multiple Ravana representations that have emerged at an urban Buddhist site the Sri Devram Maha Viharaya and a rural site Lakegala and discloses how Ravanisation relates to Sinhalese Buddhist ethno nationalism In addition the material ritual and spatial perspectives offer unique insights in the personal and local relevance of Ravana

Touch Down Tim Parker,2020-03-31 Touchdown of Apollo 11 had many unknowns for the first lunar landing Dodging the craters and boulders on the moon to land on a firm surface without totally running out of fuel for the return to Earth was a breathtaking experience The author recounts his press briefing to the world s journalists prior to the 1969 launch at Cape Kennedy followed by how he became an aerospace engineer Building a suit to protect the astronauts from the unknowns encountered in the extremes of space and on the lunar surface was an ongoing challenge Details such as the effects of cosmic rays thermal extremes and micro meteoroids on the human body were addressed as they were discovered over the eight year period following JFK s challenge Key engineering changes to meet the new requirements for the space suit that had to be tested and implemented before each mission are described Applications of the new technologies materials and processes developed in the space programs adapted to industrial and consumer products are also delineated

Solar Panels and Photovoltaic Materials Beddiaf Zaidi,2018-07-11 Despite their wide availability and relatively low prices the conventional energy sources have harmful consequences on the environment and are exhaustible In order to circumvent these negative effects the renewable energies in general and the photovoltaic energy in particular are becoming more and more attractive Solar cell is an electrical device that converts light into electricity at the atomic level These devices use inorganic or organic semiconductor materials that absorb photons with energy greater than their bandgap to promote energy carriers into their conduction band They do not pollute the atmosphere by releasing harmful gases do not require any fuel to produce electricity

and do not move parts so they are rugged Solar panels have a very long life and do not need much maintenance
