Zotero Mac Manual:

Manual de Escrita Científica: Teoria e Prática Aplicadas à Bioinformática Diego Mariano, Lucianna Helene

Santos, 2021-02-25 No mundo moderno a ciência surge como um elemento transformador para sociedade. Ao cientista atribuída a missão de compreender problemas que afetam as pessoas e propor soluções a partir de suas observações e experimentos. Além disso, não se deve esquecer que também tarefa do cientista documentar seus achados garantindo assim que o conhecimento adquirido se torne acessível a todos ou seja se torne público por isso diz-se que um trabalho acadêmico publicado. Entretanto a escrita muitas vezes se revela como uma pedra no sapato de jovens e até mesmo de experientes pesquisadores. Isso acontece porque o processo científico envolve diversas etapas e procedimentos e muitos acabam deixando as etapas de revisão bibliográfica e documentação das atividades para o fim. Assim por mais estranho que pareça escrever pode se tornar uma tarefa complicada aos acadêmicos caso não seja constantemente colocada em prática. Neste livro apresentamos alguns aspectos introdutórios da metodologia do trabalho científico. Propomos ainda algumas estratégias para escrita acadêmica focando principalmente em trabalhos da área de bioinformática, claro que as estratégias aqui apresentadas poderão ser adotadas por pesquisadores de outras áreas, entretanto os exemplos apresentados neste livro originam-se de dissertações e teses e artigos científicos da área de bioinformática e biologia computacional. Acreditamos que as metodologias apresentadas aqui poderão ser úteis principalmente para estudantes durante a escrita de trabalhos de conclusão de curso, dissertações e teses. Entretanto destacamos que não somos profissionais da área de letras, mas convenhamos você não precisa ser para saber elaborar textos que possam ser bem compreendidos por seus leitores. A escrita acadêmica científica deve ser técnica e concisa. Por fim destacamos que este livro não tem como meta estabelecer regras gramaticais que deverão ser seguidas rigidamente apesar de citarmos algumas. Nosso objetivo apresentar um guia introdutório para a escrita de trabalhos acadêmicos propondo algumas dicas e estratégias que poderão ser adotadas. Bons estudos.

Deporte Rafael Ramos-Véliz, Jesús Salado-Tarodo, Eduardo José Fernández-Ozcorta, En el ámbito de las Ciencias de la Actividad Física y del Deporte la actualización constante y el uso de la evidencia científica se han convertido en pilares fundamentales para el avance y la excelencia en la práctica profesional. Gracias a los avances en fisiología bioquímica y otras disciplinas afines contamos con una comprensión cada vez más profunda de los mecanismos que subyacen al rendimiento físico y a las adaptaciones al entrenamiento. Este manual de laboratorio de entrenamiento no solo refleja el compromiso con la precisión y la rigurosidad científica sino también con la educación de calidad que fomenta el pensamiento crítico y la capacidad de innovación en nuestros estudiantes. En un mundo donde la innovación docente es clave para el éxito académico este manual destaca por su enfoque vanguardista. Diseñado para ser un recurso esencial tanto en el presente como en el futuro busca inspirar a los estudiantes con la finalidad de que lleven a cabo investigaciones que continúen ampliando las fronteras del conocimiento en esta disciplina. La Universidad CEU Fernando III consciente de la importancia de la formación científica de calidad ha brindado un apoyo inestimable tanto económico como estructural para que esta obra vea la luz. Beatriz Hoster Cabo Vicerrectora de Ordenación Académica y Estudiantes Universidad CEU Fernando III CEU University *Find the Information You Need!* Cheryl Knott, 2016-02-15 *Find the Information You Need* is designed for the person who suspects that Google and Facebook aren't always giving them the best results for their specific information needs. Created for anyone who wants to understand how to select better information resources, deploy smarter search strategies and evaluate results more effectively. *Find the Information You Need* provides concrete exercises demonstrating successful queries on a variety of topics, clear explanations of search techniques and when to use them, descriptions of the different types of information resources available including commercial databases, digital libraries and open access repositories and helpful advice about evaluating and organizing search results. No existing book offers what *Find the Information You Need* does: a plain language text that teaches the layperson, the end user, what information brokers, competitive intelligence professionals and librarians know about finding authoritative information. A key advantage of this handbook is its arrangement. Students in an information discovery course can work through the book in a linear fashion from beginning to end. Others can dip into the text at any point that serves their needs. If someone is only interested in figuring out the best non-profit for their donations of money and time they can use the chapter presenting exercises and explanations for exactly that kind of search. If they're intrigued by the exercises they can use the chapters explaining the more technical side of information organization and access to learn more. *Find the Information You Need* is organized into two main sections. Section I, *Make It Work*, helps the reader become a better searcher right away by supplying practical exercises to try. The six chapters in Section I focus on concrete steps to take for results and give only as much explanation as needed to prevent confusion. The six chapters in Section II, *How and Why It Works*, provide technical details and explanations of search systems and retrieval methods. Three appendices present carefully selected web-based resources where readers can find information for a broad swath of subjects. Appendix I focuses on

commercial databases accessible from state library websites at no charge to residents of the respective states Appendix II lists freely available encyclopedias including not only Wikipedia but many others that are more focused and more authoritative Appendix III provides links to a variety of information resources including health related data and guidance from U S government agencies huge digital libraries from major educational institutions and other troves of knowledge treasures Find the Information You Need can be used by high school and college students undertaking research assignments But it treats such assignments as a quest for information that anyone in the real world of business government the sciences journalism and other fields might undertake As a result anyone wanting to go beyond the usual web search engine and the biases built into its algorithms can use the book to learn specific sophisticated resources and techniques not only to search but to also actually find useful authoritative information ICEL 2018 13th International Conference on e-Learning
