Touched With Fire Manic Depressive Illness And The Artistic Temperament:

Touched With Fire Kay Redfield Jamison, 1996-10-18 The definitive work on the profound and surprising links between manic depression and creativity from the bestselling psychologist of bipolar disorders who wrote *An Unquiet Mind* One of the foremost psychologists in America Kay Jamison is plainly among the few who have a profound understanding of the relationship that exists between art and madness William Styron The anguished and volatile intensity associated with the artistic temperament was once thought to be a symptom of genius or eccentricity peculiar to artists writers and musicians Her work based on her study as a clinical psychologist and researcher in mood disorders reveals that many artists subject to exalted highs and despairing lows were in fact engaged in a struggle with clinically identifiable manic depressive illness Jamison presents proof of the biological foundations of this disease and applies what is known about the illness to the lives and works of some of the world's greatest artists including Lord Byron Vincent Van Gogh and Virginia Woolf Touched with Fire Kay R. Jamison, 1994 From the author of the New York Times bestseller *An Unquiet Mind* *Touched with Fire* is an authoritative look at the relationship between manic depressive illness and the artistic temperament Psychiatrist Jamison advocates a restrained humanistic approach to treatment that does not cure the disorder at the expense of artistic inspiration

Creative Dimensions of Suffering A. M. Ghadirian, 2009 *Creative Dimensions of Suffering* is an intriguing combination of psychiatry and spirituality that illustrates the power of creativity to treat suffering An examination of the lives of many famous artists who suffered including Van Gogh Tchaikovsky and Beethoven gives insight into how they dealt with their adversity through creativity Dr Ghadirian explores how various conditions such as alcoholism depression bipolar disorder and dementia can influence a person's creative impulse and how creativity and spirituality can help a person deal with trauma He describes the courage of many other well known figures such as Helen Keller and Christopher Reeve who were able to overcome their suffering and emerge victorious over daunting odds Finally drawing on principles found in the teachings of the Baha'i Faith Ghadirian attempts to explain suffering its place in human society and how it can lead us to a closer happier relationship with God as well as a better relationship with ourselves and with others Indeed many of those who have suffered the most have found new meaning through adversity and have emerged victorious **The Most Intimate Revelations**

Mania and Literary Style Clement Hawes, 1996-01-26 This highly original study of the manic style in enthusiastic writing of the seventeenth and eighteenth centuries identifies a literary tradition and line of influence running from the

radical visionary and prophetic writing of the Ranters and their fellow enthusiasts to the work of Jonathan Swift and Christopher Smart Clement Hawes offers a counterweight to recent work which has addressed the subject of literature and madness from the viewpoint of contemporary psychological medicine putting forward instead a stylistic and rhetorical analysis He argues that the writings of dissident enthusiastic groups are based in social antagonisms and his account of the dominant culture's ridicule of enthusiastic writing an attitude which persists in twentieth century literary history and criticism provides a powerful and daring critique of pervasive assumptions about madness and sanity in literature

God and Evolution: Creativity In Action Jock MacIver, 2015-01-20 Atheism this book argues is unbelievable The universe's wonders couldn't have come about by chance Natural selection alone doesn't produce evolution Therefore since evolution resembles the creative process especially in using trial and error God's creative activity is responsible and human creators reveal much about him However that process is goal directed so evolution must be as well But the goal a Picasso or Darwin pursues is vague They don't know exactly where they're going and make mistakes and so therefore must God Thus MacIver rejects the perfect God assumed by many religions and Intelligent Design Why bring back God To restore meaning and purpose to existence and faith's many benefits To better explain how the universe scientific laws and life itself came about and living things attractive but useless properties Other discussions clarify both creativity and the creative God Is there one kind of creativity or many A sex difference Are creators neurotic
