Towards Cultural Psychology Of Religion Towards Cultural Psychology Of Religion:

Towards Cultural Psychology of Religion Jacob A. v. van Belzen, 2010-08-03 The aims pursued in this book are quite modest The text is not an introduction in the traditional sense to any psychological subdiscipline or field of application nor does it present anything essentially new Rather it shows work in progress as it attempts to contribute to an integration of two differently structured but already existing fields within psychology In order to explain this it is probably best to say a few words about how the book came into being and about what it hopes to achieve As a project the volume owes very much to others While lecturing in places ranging from South Africa to Canada and from California through European countries to Korea colleagues have often urged me to come up with a volume on cultural psychology of religion For reasons that should become clear in the text I feel uncomfortable with such a demand To my understanding there exists no single cultural psychology of religion Rather there are ever expanding numbers of divergent types of psychologies some of which are applied to understanding religious aspects of human lives or to researching specific religious phenomena while others are not Within this heterogeneous field that is correctly or not still designated as psychology there are also many approaches that are sometimes referred to as cultural psychology or as culturally sensitive psychologies It would be worthwhile applying many of these to research on religious phenomena but at present not too many are in fact so applied

Culture, Personality, and the Psychology of Religion Gerard Saucier, 2022-06-27 Culture and personality are deeply related Gerard Saucier articulates their interface and new insights regarding the psychology of religion and spirituality Rather than making assumptions of cultural homogeneity that promote stereotyping Gerard Saucier applies a distributive model of culture which assumes heterogeneity linking the

otherwise separate compartments of culture and personality Personality variation maps cultural non uniformity but variation in mindset attitudes beliefs values does so more directly Studies of isms concepts embedded in natural language demonstrate that matters of religion and spirituality make up a substantial fraction of culture relevant mindset and empirical evidence shows these have a large effect size contribution to cultural differences between nations around the globe This book will be of much interest to specialists and post graduate graduate students interested in culture personality and religion or spirituality

Towards a Cultural Psychology of Religion Neil Andrew C. Cortez, 2015 Current psychological research into religiosity can be located into two paradigms the cross cultural psychology interpretive tradition and the cultural psychology interpretive tradition To generate support for the latter paradigm American and Mainland Chinese respondents were asked to describe a religious or spiritual other as a way of exploring the impact of individualism collectivism cultural values on expressions of religiosity Statements from Chinese respondents were expected to have more socially related content compared to American respondents Responses were analyzed using a linguistic analysis computer program with attention given to social process family friends and humans content Raters were also instructed to generate categories based on the content of the responses No significant differences were found between American and Mainland Chinese respondents on all four content categories Religious self rating was found to significantly predict family content while religious and spiritual self ratings significantly predicted humans content Raters also generated 11 categories from American responses and 10 categories from Mainland Chinese responses Methodological and theoretical implications are also discussed

Religion and Spirituality Across Cultures Chu Kim-Prieto, 2014-08-07 This book presents an integrated review and critical analysis of the recent research in the positive psychology of religion with focus on the positive psychology of religion across different cultures and religions The book provides a review of the literature on different contributions of religion and spirituality to positive functioning and well being and reviews religions across the world including Christianity Islam Buddhism Judaism Sikhism Native American religions and Hinduism It fills a unique place in the market s increasing interest and demand in the psychology of religion as well as positive psychology While the target audience is researchers scholars and students in psychology cross cultural studies religious studies and social sciences it will be useful for anyone interested in better understanding the contributions of religion and culture in subjective well being

Integrating Psychology, Religion, and Culture Jenny H. Pak, 2020-12-15 Although science was originally broadly conceptualized as a systematic rigorous activity to produce trustworthy knowledge psychologists adopted a single philosophy of science and strictly enforced natural science as the only proper scientific psychology Qualitative research has been part of modern psychology from the beginning but it was obscured for nearly a century as positivist epistemology came to dominate the field Building culturally robust and intelligible theories capable of responding more effectively to complex problems faced by a rapidly changing world calls for openness in methodological diversity Deeply rooted in a hermeneutic tradition cultural psychology has

challenged the appropriateness of seeking reductive knowledge because higher mental processes such as religious beliefs values and choices are bound by historical and cultural context As greater interdisciplinary integration and methodological innovations are necessary to keep psychology of religion relevant narrative inquiry has emerged as a promising integrative paradigm

Cultural Psychology of Musical Experience Sven Hroar Klempe, 2016-05-01 This book forms a basis and a starting point for a closer dialogue between musicologists anthropologists and psychologists to achieve a better understanding of the cultural psychology of musical experience This is done by arranging a meeting point or an arena in which different aspects of psychology and musicology touch and encounters each other due to how the two fields might be defined today In line with this the book consists of a group of scholars that have their feet solidly grounded in psychology social science or musicology but at the same time have a certain interest in uniting them On this basis it is divided into five parts which investigates musical sensations musical experiences musical transformations musical fundamentals and the notion of a cultural psychology of music Thus another aim of this book is to prepare the basis for a further growth of a cultural psychology that is able to include the experiences of music as a basis for understanding the ordinary human life Thus this book should be of interest for those who want to investigate the mysterious intersection between music and psychology

ENDORSEMENTS Near a century ago Alfred North Whitehead a philosopher sensitive to the natural vitality of human intelligence warned against the restriction of awareness by products of logical discernment This book makes a bold and much needed effort to recover an appreciation of the creative agency in music of all kinds which supports mastery of all domains of cultural intelligence including language and artificial intelligence We need to replace a rational psychology of musical form with appreciation of impulses of musicality in the life of every human society From birth and before a human mind is eager to share the rhythms and tones of awareness with feeling in body movement elaborated in song instrumental performance or dance The scholastic disciplines of psychology anthropology musicology and ethnomusicology separated by artificial conventions need to recover this common ground by a project that aims at assembling disciplines that have been separated and developed individually for almost hundred years to achieve a better understanding of the cultural psychology of musical experience This collection of papers boldly meets this challenge with skillful respect for the complicated history of our understanding Colwyn Trevarthen Professor Emeritus of Child Psychology and Psychobiology School of Philosophy Psychology and Language Sciences The University of Edinburgh This book is an important marker in the next wave of interdisciplinary socio musical study Culture individual experience and social forces converge here and are addressed and sometimes redressed through musical means Bravo Tia DeNora Professor Sociology Philosophy Anthropology SPA Exeter University EX4 4RJ UK Klempe has crafted a fascinating collection of discussions that is accessible and inspiring Both students and experts will find this book invaluable Fathali Moghaddam Professor of Psychology Director of the Interdisciplinary Program in Cognitive Science Georgetown University

Religion, Personality, and Social Behavior

Vassilis Saroglou, 2013-07-24 Psychological interest in religion in terms of both theory and empirical research has been constant since the beginning of psychology. However, since the beginning of the 21st Century, partially due to important social and political events and developments, interest in religion within personality and social psychology has increased. This volume reviews the accumulated research and theory on the major aspects of personality and social psychology as applied to religion. It provides a high quality integrative, systematic and rigorous review of that work with a focus on topics that are both central in personality and social psychology and have allowed for the accumulation of solid and replicated and not impressionist knowledge on religion. The contributors are renowned researchers in the field who offer an international perspective that is both illuminating yet neutral with respect to religion. The volume's primary audience are academics, researchers and advanced students in social psychology, but it will also interest those in sociology, political sciences and anthropology.

Integrating Experiences Brady Wagoner, Nandita Chaudhary, Pernille Hviid, 2015-03-31 This book explores how individuals and social cultural worlds shape each other, emphasizing the role of culture in our lives. It features a lecture by Tania Zittoun and Alex Gillespie on the interaction between mind and society, illustrated with a WWII diary analysis. **The Priority of the Other** Mark Freeman, 2014 Contemporary psychology as well as our own self understanding remains largely ego centric in focus, with the self being seen as the primary source of meaning and value. According to Mark Freeman, this perspective is belied by much of our experience. Working from this basic premise, he proposes that we adopt a more ex-centric perspective, one that affirms the priority of the Other in shaping human experience. In doing so, he offers nothing less than a radical reorientation of our most basic ways of making sense of the human condition. In speaking of the Other, Freeman refers not only to other people but also to those non-human others, for instance nature, art, God, that take us beyond the ego and bring us closer to the world. In speaking of the Other's priority, he insists that there is much in life that comes before us. By thinking and living the priority of the Other, we can therefore become better attuned to both the world beyond us and the world within. At the heart of Freeman's perspective are two fundamental ideas. The first is that the Other is the primary source of meaning, inspiration and existential nourishment. The second is that it is the primary source of our ethical energies and that being responsive and responsible to the world beyond us is a defining feature of our humanity. There is a tragic side to Freeman's story, however. Enraptured though we may be by the Other, we frequently encounter it in a state of distraction and fail to receive the nourishment and inspiration it can provide. And responsive and responsible though we may be, it is perilously easy to retreat inward to the needy ego. The challenge, therefore, is to break the spell of the ordinary oblivion that characterizes much of everyday life. The Priority of the Other can help us rise to the occasion. Religious Voices in Self-Narratives Marjo Buitelaar, Hetty Zock, 2013-07-31 In present day pluralistic and individualized societies, the question of how individuals appropriate religious traditions has become particularly relevant. In this volume, psychologists, anthropologists and historians examine the presence of religious voices in narrative constructions of the self. The focus is on

the multiple ways religious stories and practices feature in self narratives about major life transitions The contributions explore the ways in which such voices inform the accommodation and interpretation of these transitions In addition to being inspired by Dan McAdams approach to life stories as personal myths that inform us about the quests of individuals for a satisfactory balance between agency and communion most of the contributors have found the theory of the dialogical self developed by Hubert Hermans particularly useful Thus the contributions explore the ways in which identity formation is shaped by internal dialogues between personal and collective voices in the context of the specific constellations of power in which these voices are embedded The volume is divided into three parts addressing theoretical and methodological considerations religious resources in narratives on life transitions and religious positioning in diaspora

Research in the Social Scientific Study of Religion Ralph L. Piedmont, Andrew Village, 2009 Research in the Social Scientific Study of Religion publishes empirical and theoretical studies of religion from a wide range of disciplines and from all parts of the globe This volume has a special section on Islam and Mental Health an important and neglected area of study The section draws on work from six countries that have applied different theoretical frameworks and empirical methods to examine the link between religion psychology and health in very diverse Muslim communities Other articles examine topics as diverse as spirituality psychological health conversion and the cultural psychology of religion Disciplines represented include those that draw on qualitative quantitative and theoretical methods of study which together represent an important contribution to the contemporary study of religion

The Cambridge Handbook of Social Representations Gordon Sammut, Eleni Andreouli, George Gaskell, Jaan Valsiner, 2015-05-25 A social representations approach offers an empirical utility for addressing myriad social concerns such as social order ecological sustainability national identity racism religious communities the public understanding of science health and social marketing The core aspects of social representations theory have been debated over many years and some still remain widely misunderstood This Handbook provides an overview of these core aspects and brings together theoretical strands and developments in the theory some of which have become pillars in the social sciences in their own right Academics and students in the social sciences working with concepts and methods such as social identity discursive psychology positioning theory semiotics attitudes risk perception and social values will find this an invaluable resource

Research in the Social Scientific Study of Religion, Volume 28 Andrew Village, Ralph W. Hood, 2017-07-10 This volume of Research in the Social Scientific Study of Religion includes a wide range of papers from a social science perspective The special section gives a unique insight into the rapidly growing field of psychological studies of religion in China It draws on experts from China and the USA who met for a conference at Fuller Theological Seminary and have together compiled a collection of original research and reviews that helps to locate the current state of the discipline from a specifically Chinese perspective Other papers in the volume examine intergenerational religious transmission and religious problem solving styles in the USA

Living according to Nature. Volume One: Myths,

Insights, and Perspectives ,2025-02-27 This edited collection is the first of two volumes offering critical philosophical and interdisciplinary perspectives on contemporary and historic accounts of living in accordance with the broad natural world as at the center of a good and wise life It also explores the meaning and idea of nature in these different perspectives as it relates to and is distinguished from cultural life It builds on the work of Pierre Hadot and others on the connection that philosophers mystics scholars and others ancient and modern have seen between nature as articulated in physics metaphysics ontologies ecologies biologies and evolutionary theories and forms of self communal cultivation Social Thinking and History Constance De Saint Laurent,2020-09-14 Social Thinking and History demonstrates that our representations of history are constructed through complex psychosocial processes in interaction with multiple others and that they evolve throughout our lifetime playing an important role in our relation to our social environment Building on the literature on social thinking collective memory and sociocultural psychology this book proposes a new perspective on how we understand and use our collective past It focuses on how we actively think about history to construct representations of the world within which we live and how we learn to challenge or appropriate the stories we have heard about the past Through the analysis of three studies of how history is understood and represented in different contexts in political discourses in France by intellectuals and artists in Belgium and when discussing a current event in Poland its aim is to offer a rich picture of our representations of the past and the role they play in everyday life This book will be of great interest to academics researchers and postgraduate students in the fields of psychology memory studies sociology political science and history It will also make an interesting read for psychologists and human and social scientists working on collective memory **The Oxford Handbook of Religious Conversion** Lewis Ray Rambo,Charles E. Farhadian,2014 The Oxford Handbook of Religious Conversion offers a comprehensive exploration of the dynamics of religious conversion which for centuries has profoundly shaped societies cultures and individuals throughout the world Scholars from a wide array of religions and disciplines interpret both the varieties of conversion experiences and the processes that inform this personal and communal phenomenon This volume examines the experiences of individuals and communities who change religions those who experience an intensification of their religion of origin and those who encounter new religions through colonial intrusion missionary work and charismatic and revitalization movements The thirty two innovative essays provide overviews of the history of particular religions including Hinduism Buddhism Confucianism Taoism Sikhism Islam Christianity Judaism indigenous religions and new religious movements The essays also offer a wide range of disciplinary perspectives psychological sociological anthropological legal political feminist and geographical on methods and theories deployed in understanding conversion and insight into various forms of deconversion Recovering Women's Voices Reham ElMorally,2024-09-09 Reham ElMorally draws upon Sylvia Walby's Six Structures of Patriarchy tailored for the Egyptian context to dissect how this patriarchal construct has historically suppressed and exploited women *Handbook of Cultural*
