Toxic Capitalism Corporate Crime And The Chemical Industry Socio Legal Series:

Toxic Capitalism Frank Pearce, Steve Tombs, 2019-01-15 Originally published in 1998 While there is a growing academic literature on corporate crime much of this focuses upon variants of economic or financial crimes there is a relative absence of studies of safety health and or environmental crimes This is curious given that recent years have witnessed a resurgence in popular academic and indeed state attention to questions related to environmental degradation and human safety Certainly in the latter context there is some recognition that environmental degradation must be understood partly in terms of environmental crimes by corporations Moreover recent experience in both the US and the UK attests to the fact that there is no ineluctable trend towards safer and healthier workplaces as deregulatory movements have resulted in increased risks for most workers and this text argues an increased opportunity for and incidence of safety crimes At the centre of environmental safety and health issues lie the chemicals industries These industries are of strategic importance to national economies while also having almost unique hazard and risk potential and it is for these reasons that these are the focus of this text Any understanding of the nature of these types of corporate crimes and thus any recognition of the potential for their more effective regulation requires an analysis that is grounded in more general sociological concerns and in political economy For this reason this text emphasises the need for understandings of the nature of contemporary and emergent forms of corporate organisation of their place in contemporary economies and of the relationships between these forms and state formations

Revisiting Crimes of the Powerful Steven Bittle, Laureen Snider, Steve Tombs, David Whyte, 2018-06-13 Frank

Pearce was the first scholar to use the term crimes of the powerful His ground breaking book of the same name provided insightful critiques of liberal orthodox criminology particularly in relation to labelling theory and symbolic interactionism while making important contributions to Marxist understandings of the complex relations between crime law and the state in the reproduction of the capitalist social order Historically crimes of the powerful were largely neglected in crime and deviance studies but there is now an important and growing body of work addressing this gap This book brings together leading international scholars to discuss the legacy of Frank Pearce s book and his work in this area demonstrating the invaluable contributions a critical Marxist framework brings to studies of corporate and state crimes nationally internationally and on a global scale This book is neither a hagiography nor a review of random areas of social scientific interest Instead it draws together a collection of scholarly and original articles which draw upon and critically interrogate the continued significance of the approach pioneered in Crimes of the Powerful The book traces the evolution of crimes of the powerful empirically and theoretically since 1976 shows how critical scholars have integrated new theoretical insights derived from post structuralism feminism and critical race studies and offers perspectives on how the crimes of the powerful and the enormous ongoing destruction they cause can be addressed and resisted **Canadian Books in Print. systems and laws may be amended Sometimes disasters produce meaningful change but often they do not In this text the politics of response is considered in studies of a factory fire the loss of an offshore oilrig lung disease among miners a mine explosion and the prosecution of health and safety offences This book will be of use to occupational health and safety activists and professionals academics and upper year students in industrial relations labour studies labour history law political science and sociology
