*Corrupted* Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Ethical Economics and Sustainable Development Devi Datt

Tewari, Kehinde Damilola Ilesanmi, 2025-11-04 As societies strive for economic progress they often prioritize metrics like GDP growth technological innovation and industrial expansion However amid the rush for material progress something important yet frequently overlooked comes into focus the influence of moral capital on the trajectory of economic expansion This book explores the role of moral capital and its relationship with economic growth It emphasises how investment in moral frameworks can promote social well being and sustainable development The book is divided into two sections The first part focuses on the theorisation of the moral capital and African economic sustainability nexus while the second part is devoted to some selected empirical studies on the impact of moral capital on African economic policies The book argues that firm growth is crucial not only for stakeholders but also for the broader economy underpinning the sustainability of the ecosystem and by adhering to ethical principles organisations can make a positive impact on social economic and environmental issues

Furthermore they can proactively address societal concerns promote fairness and justice and engage in sustainable practices Through their actions institutions become agents of positive change helping to shape a more inclusive equitable and sustainable world The key message of the book is that the cultivation of moral capital requires a collective effort from all stakeholders involved in institutional development governments institutions civil society and individuals must collaborate to create an ecosystem that incentivises and rewards ethical behaviour It includes diverse perspectives and combines conceptual theoretical and empirical research addressing contemporary issues in African economic policy and sustainability It presents global case studies to make the case for the importance of moral capital in addressing African leadership problems The book will appeal to academics students and researchers in economics ethics development studies and sustainability The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license [The Globalization of Legal Education](#) Bryant G. Garth, Gregory C. Shaffer, 2022 Legal academics and practitioners in recent decades increasingly emphasize the so called globalization of legal education The diffusion of the Juris Doctor JD degree to Australia Hong Kong Japan and South Korea as well as the advent of a very similar Juris Master JM degree in China and a shift in the late 1980s and beyond to a new US influenced format in India exemplify shifts toward US legal education practices Flood 2014 The global and Americanizing trend is evident on the web sites of law schools around the globe with many law schools competing to be the most global in terms of their faculty curricula teaching methods and students Less pronounced but related to the literature on legal globalization is that on transnationalization and transnational processes which is a strong component of the move toward globalization in legal education As this book shows if we look to see what is celebrated as part of globalized law schools and faculties we see increased cross border flows of professors and students teaching of transnational legal subjects development of particular forms of teaching practice such as legal clinics explicit focus on transnational rankings and transnationalized scholarly communities sharing teaching and research methods and approaches across domains of law

**Leadership for Sustainable and Educational Advancement** Joseph Crawford, 2023-05 Contemporary leadership scholars have been challenged by the need to develop well educated citizens capable of tackling climate change and social and environmental sustainability Across the levels of education leadership has been applied largely to strategic and governance contexts That is dominant models of leadership comprise position based leadership e.g. principal leadership and strategic leadership e.g. school leadership and distributed leadership There is an opportunity to better understand how educational leaders emerge the styles and approaches best suited to influencing in educational settings and the contextual leadership factors that educational leaders ought to be aware of This book unpacks these practical issues from a conceptual lens Likewise domains of sustainable leadership are also underdeveloped with a need to better enumerate the ways in which individuals assume leadership roles sense make and co construct solutions to social and environmental sustainability issues

The focus of this book is on enabling space for scholars to apply leadership theory and theorize alternatives to 21st century sustainability matters
