Upng 2015:

The Report: Papua New Guinea 2015 Oxford Business Group, 2016-09-17 In Papua New Guinea hopes are high that real change is on its way the country's political administrative financial and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources Many international actors are watching closely to see how this young country negotiates its path Papua New Guinea became a major exporter of gas in 2014 when the 19bn PNG liquefied natural gas LNG project was completed ahead of schedule and within budget significantly increasing the size and strength of the economy The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector fuelling the growth of its economy as a whole The LNG influx also poses challenges however in terms of ensuring inclusive growth and productive use of the new revenues PNG takes pride in being a final frontier of natural and cultural development but the task ahead is to protect the country's heritage while becoming part of the global economy Struggle, Reform, Boom and Bust Stephen Howes, Martin Davies, Rohan Fox, Maholopa Laveil, Manoj K. Pandey, Kelly Samof, Dek Joe Sum, 2015-07-31 Since Papua New Guinea's independence in 1975 economic growth has been slow but volatile with major changes in economic structure and policies as well as in politics and governance This economic history written to commemorate the fiftieth year of independence and the first to be produced in some 15 years divides the half century since independence into four periods the relative stability but also early struggles of the seventies and eighties the crises and reforms of the nineties the boom of the 2000s and the quiet bust of the 2010s Two chapters cover each period's major economic policy institutional and political developments The final three chapters provide an overall assessment of economic performance and policies since independence and link them with its politics and institutions The book combines painstaking documentation with original analysis to reveal both the strengths and weaknesses of the PNG economy and theorises that the country's hyper politics and insecurity have combined to produce and are reinforced by a weak but stable state and low and increasingly resource dependent growth Data driven frank insightful and engaging Struggle Reform Boom and Bust is written by an expert team of economists from the University of Papua New Guinea and The Australian National University under the leadership of Professor Stephen Howes Director of the ANU Development Policy Centre It is an essential resource for anyone interested in the economy of Papua New Guinea as well as an important contribution to the literature on the challenges and institutional determinants of post colonial development **The Statesman's Yearbook 2015** B. Turner, 2016-12-27 Now in its 151st edition The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions <http://www.statesmansyearbook.com> Indigenous People and Mobile Technologies Laurel Evelyn Dyson, Stephen Grant, Max Hendriks, 2015-10-05 In the rich tradition of mobile communication studies and new media this volume examines how mobile technologies are being embraced by Indigenous people all over the world As mobile phones

have revolutionised society both in developed and developing countries so Indigenous people are using mobile devices to bring their communities into the twenty first century The explosion of mobile devices and applications in Indigenous communities addresses issues of isolation and building an environment for the learning and sharing of knowledge providing support for cultural and language revitalisation and offering the means for social and economic renewal This book explores how mobile technologies are overcoming disadvantage and the tyrannies of distance allowing benefits to flow directly to Indigenous people and bringing wide ranging changes to their lives It begins with general issues and theoretical perspectives followed by empirical case studies that include the establishment of Indigenous mobile networks and practices mobile technologies for social change and finally the ways in which mobile technology is being used to sustain Indigenous culture and language

Hybrid Public Policy Innovations Mark Fabian, Robert Breunig, 2018-03-12 Political discourse in much of the world remains mired in simplistic ideological dichotomies of market fundamentalism for efficiency versus substantial socialism for equity Contemporary public policy design is far more sophisticated It blends market government and community tools to simultaneously achieve both equity and efficiency Unlike in the twentieth century this design is increasingly grounded in a deep evidence base derived by way of rigorous empirical techniques A new paradigm is emerging hybrid policies This volume provides a thorough introduction to this technical side of public policy analysis and development It demonstrates that it is possible to go beyond ideology and find there some powerful answers to our most pressing problems An international team of experts many of whom have experience

Foster, 2024-03-28 In the first years of the 21st century economic liberalisation began to transform telecommunications services throughout the Pacific Islands Government regulators corporate executives and everyday consumers hopefully imagined that opening mobile phone markets to competition would result in greater access lower costs and accelerated development *Uneven Connections* examines the ways in which liberalisation took hold in Papua New Guinea PNG when a unit of the Caribbean based mobile network operator Digicel Group Ltd seized the opportunity to compete with the state sponsored incumbent The book highlights how mobile phones entered the lives of urban and rural Papua New Guineans after Digicel's arrival in 2007 In so doing it describes a moral economy in which companies consumers and state agents continually negotiate who owes what to whom In what ways have these various actors invented and negotiated new forms of both freedom and constraint *Uneven Connections* advances understanding of how a so called digital revolution in PNG

unfolded resulting in outcomes that often confounded the expectations of policy makers and ordinary citizens alike It assesses the extent to which some of the promises of this revolution have been redeemed and identifies the challenges faced by companies consumers and state agents in establishing and experiencing novel forms of uneven connectivity The book provides a short and selective history of mobile phones in PNG ending with the sale of Digicel s Pacific operations to the Australian company Telstra in 2022
