systems yet the emphasis is placed on MATLAB and numerical methods which include graphing the solutions and obtaining tables of values Featured applications are easily understood Complete explanations of the mathematics and emphasis on methods for finding solutions are included

Metadata Management in Statistical Information Processing Karl A. Froeschl, 2013-12-21 As the integration of statistical data collected in various subject matter domains becomes more and more important in several socio economic etc investigation areas the management of so called metadata a formal digital processing of information about data gains tremendously increasing relevance Unlike current information technologies e g database systems computer networks facilitating merely the technical side of data collation a coherent integration of empirical data still remains cumbersome and thus rather costly very often because of a lack of powerful semantic data models capturing the very meaning and structure of statistical data sets Recognizing this deficiency Metadata Management proposes a general framework for the computer aided integration and harmonization of distributed heterogeneous statistical data sources aiming at a truly comprehensive statistical meta information system *Munson, Young and Okiishi's*
