Urban And Community Forestry In The Northeast:

Urban and Community Forestry in the Northeast John E. Kuser, 2006-11-14 During the latter part of 2004 Helen Buitenkamp of Springer Publishing emailed me that the first edition of Handbook of Urban and Community Forestry in the Northeast is the best volume in its field and inquired whether we'd be interested in compiling a second edition. I replied that we certainly would and started working on it immediately. We have revised 14 out of 26 chapters in the first edition and added two new authors. Many things in urban forestry have changed a great deal while others have not changed at all. Henry Gerhold has written an entirely new Chapter 1 based on a book that he and his graduate student Stacy Franks have written entitled Our Heritage of Community Trees. Dave Nowak has included the most up to date information on the environmental effects of trees in Chapter 2 and Peter Fengler and Tom Smiley have done the same with the diagnosis and treatment of hazard trees in Chapter 17. All told we have revised or replaced 16 chapters of the original 26; we've kept 10 chapters as originally written and substituted two entirely new chapters 1 and 14 respectively. With the emergence of urban and community forestry as the fastest growing part of our profession in the last several years, the need for a book such as this inevitably developed. The Society of American Foresters urban forestry working group counts over 40 universities now offering courses in this subject and the number is growing.

Urban and Community Forestry in the Northeast John E. Kuser, 2006 *Handbook of Urban and Community Forestry in the Northeast* John E. Kuser, 2013-11-11 With the emergence of urban and community forestry as the fastest growing part of our profession in the last 15 years, the need for a book such as this inevitably developed. The Society of American Foresters urban forestry working group counts 32 or more universities now offering courses in this subject and the number is growing. For the last several years I have coordinated a continuing education urban forestry course at Rutgers for nonmatriculated students. Registrants have included arborists, shade tree commissioners, landscape architects, city foresters, environmental commissioners, park superintendents, and others whose jobs involve care and management of trees. The course was started by Bob Tate in 1980 around a core of managerial subjects such as inventories, budgets, and public relations. After Bob left in 1984 to join Asplundh and later to start his own prosperous business in California, the course languished after it exhausted the local market for those subjects.
